

PROCEEDINGS OF THE SEVENTH INTERNATIONAL CONFERENCE ON COMPUTER
METHODS AND ADVANCES IN GEOMECHANICS / CAIRNS / 6 - 10 MAY 1991

Computer Methods and Advances in Geomechanics

Edited by

G. BEER

CSIRO, Division of Geomechanics

J. R. BOOKER & J. P. CARTER

University of Sydney

VOLUME 1

*Published on behalf of the International Association for Computer Methods
and Advances in Geomechanics by*

A. A. BALKEMA / ROTTERDAM / BROOKFIELD / 1991

Table of contents

Preface	VII
<i>Keynote papers</i>	
Analytic methods in geomechanics <i>J.R.Booker</i>	3
Australian advances in geomechanics <i>E.T.Brown</i>	15
Constitutive modelling of geomaterials: Comments on past and future <i>Chandra S.Desai</i>	31
Environmental geotechnology: Some pertinent considerations <i>R.Kerry Rowe</i>	35
<i>1. CAD, Expert systems and software</i>	
An expert system to choose a stress analysis program for rock excavation design <i>M.A.Coulthard & V.Ciesielski</i>	51
Visualization of the microstructural response of lightly-cemented granular soils under uniaxial strain conditions <i>John J.Gill & Gregory Donohoe</i>	57
FE analysis and visualization utilizing X-windows in a distributed supercomputing environment <i>W.Haas & R.Brantner</i>	65
Three dimensional color computer graphics for the subsurface ground layer around Toyohashi <i>Makoto Kawamura, Susumu Segawa & Tomomi Arai</i>	69
Development of an intelligent computer program for foundation design <i>Fred H.Kulhawy & Charles H.Trautmann</i>	75
Three dimensional modeling for geological structure by CAD system <i>Ryohei Mura, Nobuo Hoshino & Takashi Ito</i>	81

Image analysis techniques for determining the fractal dimensions of rock joint and fragment size distributions <i>A.Ord & C.C.Cheung</i>	87
Lotus 1-2-3 in permanent displacement <i>H.V.Phuong Truong</i>	93
Automatic mesh generation of zero thickness interface elements <i>D.M.Potts & R.A.Day</i>	101
Computer aided teaching in geotechnical engineering <i>S.D.Priest, D.J.Walker & J.N.Kay</i>	107
A constrained Delaunay triangulation algorithm for generating finite element meshes <i>S.W.Sloan</i>	113
A numerical database system for rock triaxial tests using a microcomputer <i>Naohiko Tokashiki, Yasuaki Ichikawa & Toshikazu Kawamoto</i>	119
 2. Geotechnical engineering applications	
Downdrag forces in piles and pile groups <i>Y.K.Chow & J.T.Chin</i>	127
Performance of a pile-supported structure under strong ground motion <i>Phillip L.Gould & Kijun Ahn</i>	133
Pile-group settlement interaction considering soil non-linearity <i>H.Hirayama</i>	139
Three-dimensional finite element analysis of laterally loaded piles <i>M.Kimura, A.Yashima & T.Shibata</i>	145
Finite element analysis of embedded walls <i>S.A.S.Kulathilaka & I.B.Donald</i>	151
Analysis of novel retaining structures using explicit finite difference codes <i>Loren J.Lorig</i>	157
Soil-strip interaction in reinforced foundation beds <i>Madhira R.Madhav & N.Kumar Pitchumani</i>	165
Parametric study of deformation behavior of bored pile on a thin bearing layer <i>Tamotsu Matsui & Kazuhiro Oda</i>	171
Bearing capacity analysis of a raft foundation on soft clays depending on soil-structure interaction <i>Satoru Ohtsuka & Minoru Matsuo</i>	177
Analysis of piled strip foundations <i>H.G.Poulos</i>	183
Deformation analysis of improved soft ground under embankment <i>A.Sakai, N.Miura, G.Aramaki & K.Koga</i>	193

Mechanical behaviour of bottom ground heave due to excavation <i>T.Tamano, S.Fukui, S.Kadota & K.Ueshita</i>	199
Behaviour of axially loaded piles in Gibson soil <i>L.G.Tham & Guo Dajiang</i>	205
A new approach based on grey system theory for settlement prediction <i>S.Zhang, J.Li & R.N.Chowdhury</i>	211
A three dimensional nonlinear finite element analysis of stability of dam abutment by using fracture-damage mechanics model <i>Zhou Wei Yuan, Yang Yan Yi, Yang Ro Zieng & Yan Gong Ri</i>	217
 3. Experimental studies, testing and field instrumentation	
Finite element analyses of triaxial tests with different end and drainage conditions <i>D.W.Airey</i>	225
Mechanics of sampling disturbances in a soft clay <i>M.Budhu & C.S.Wu</i>	231
Numerical modelling of dynamic compaction <i>Y.K.Chow, D.M.Yong, K.Y.Yong & S.L.Lee</i>	237
The structural analysis of pavements: Studies based on the measurements of surface deflections <i>W.H.Cogill</i>	243
Calculation and method of verification of the 3-D insitu stress tensor <i>W.Lawrence & G.Sneddon</i>	249
Application of a 1-dimensional cavity expansion model to pressuremeter and piezocone tests in clay <i>A.Lee Goh & M.Fahey</i>	255
Dynamics of SPT: Application of the method of two-point strain measurements <i>T.Matsumoto, H.Sekiguchi, H.Yoshida & K.Kita</i>	261
PC-based data acquisition and electrohydraulic servo loading systems in laboratory shear testing <i>K-K.Ng & I.B.Donald</i>	267
Design strength S_u derived from pressuremeter tests <i>H.Ohta, A.Iizuka, A.Nishihara, R.Fukagawa & Y.Morita</i>	273
Numerical and centrifuge modelling of large strain consolidation <i>S.H.Toh & M.Fahey</i>	279
Pore pressure fields around piezocone penetrometers installed in clays <i>Andrew J.Whittle & Charles P.Aubeny</i>	285

4. Joints, localisation and structured materials

Boundary element analysis of excavations in anisotropic rock masses <i>H.Alehossein & J.P.Carter</i>	293
The structure of persistent shear bands in idealized granular media <i>J.P.Bardet & J.Proubet</i>	299
Rate-type and elastoplastic approaches for soil-structure interface behaviour: A comparison <i>M.Boulon & A.Jarzewowski</i>	305
An elastic-viscoplastic block theory for rock masses <i>S.H.Chen & W.L.Xiong</i>	311
Distinct elements vs Cosserat theory: A comparison for the case of an infinite shear layer <i>S.K.Choi & H-B.Mühlhaus</i>	315
Disturbed state concept for modelling soils and joints <i>C.S.Desai, S.Armaleh, D.Katti & Y.Ma</i>	321
Model of regularly jointed rock mass with consideration of the influence of couple stresses <i>Ge Xiurun & Feng Shuren</i>	327
The equivalent elastic properties of stratified and jointed rock masses <i>Charles Gerrard</i>	333
Quantifying soil properties using fractal measurements of soil microstructure <i>Steven G.Harris & John J.Gill</i>	339
Blasting effects in jointed rocks – New insights <i>F.E.Heuzé, T.R.Butkovich, O.R.Walton & D.M.Maddix</i>	347
Rank n plasticity theory and bifurcation condition <i>Y.Ichikawa & T.Ito</i>	353
Probabilistic joint network modelling in three dimensions including a verification <i>P.H.S.W.Kulatilake, D.N.Wathugala & O.Stephansson</i>	359
Modelling of sliding behaviour at rock interfaces <i>E.C.Leong & M.F.Randolph</i>	365
Fractals in geomechanics <i>Charles A.Moore, Monica Krepfl, Hui-Huang A.Chyou & John Gill</i>	371
Constitutive models and numerical analyses for inelastic materials with microstructure <i>H.-B.Mühlhaus, R.de Borst & E.C.Aifantis</i>	377
Numerical verification of sheet-pile countermeasure in soft ground <i>H.Ochiai, S.Hayashi, J.Otani, T.Umezaki & Y.Tanaka</i>	387
Fluid flow through patterned shear zones <i>A.Ord</i>	393
Numerical analysis of progressive failure in deep boreholes <i>P.C.Papanastasiou & I.G.Vardoulakis</i>	399

On mechanics of jointed media: Masonry and related problems <i>S. Pietruszczak</i>	407
Approximate equivalent moduli for use in the modelling of mining in elastic layered strata <i>J.A. Ryder & M.U. Ozbay</i>	415
Localization examined as a function of mesh configuration and load step <i>Suren Saxena, T.S. Hsu & C.T. Liu</i>	421
A damage model for discontinuous rock mass based on thermodynamic principles <i>M. Stumvoll, T. Kyoya, Y. Ichikawa & G. Swoboda</i>	427
Analysis of a dam foundation with jointed rock mass <i>A. Varadarajan & Anjani Kumar</i>	435
Continuum models for localized deformations in pressure sensitive materials <i>I. Vardoulakis, H.-B. Mühlhaus & E.C. Aifantis</i>	441
A finite element approach to analysing localization and post-critical behaviour in rock <i>P.M. Warburton</i>	449
Effects of anisotropy on three dimensional excavation analysis of jointed rock masses <i>Tadashi Yamabe, Masanobu Oda, Keisuke Maekawa, Yoshio Ishizuka, Hiroo Kumasaka & Hiroyuki Tada</i>	455
 5. Slopes, stability and distinct element methods	
Analysis of seepage failure of sandy soils, a coupling problem approach <i>A. Asaoka & T. Kodaka</i>	463
An integrated system for the stability of rock slopes <i>Ö. Aydan, Y. Ichikawa, Y. Shimizu & K. Murata</i>	469
Upper bound solutions to soil stability problems via general wedge methods <i>P.S.K. Giam & I.B. Donald</i>	475
Simulation analysis of dynamic nonlinear behavior of underground structures by the extended distinct element method <i>M. Hakuno & T. Yamamoto</i>	481
Nonassociated flow and instability of slopes <i>Poul V. Lade</i>	487
Numerical analysis of the collision between a falling rock and a cushion by distinct element method <i>H. Masuya & Y. Kajikawa</i>	493
Slope stability analysis by shear strength reduction technique <i>T. Matsui & K.C. San</i>	499
Open pit toppling failures: Experience versus analysis <i>Christopher M. Orr, Christopher F. Swindells & Christopher R. Windsor</i>	505
Simple shear simulations of sand using D.E.M. <i>Sumio Sawada, Tej B.S. Pradhan & Yoshinori Iwasaki</i>	511

The stability of a square tunnel in a purely cohesive material whose strength increases linearly with depth <i>S.W.Sloan & A.Assadi</i>	517
Analyses of active earth pressure problems based on simple constitutive equations for granular materials <i>K.Ugai</i>	527
 6. Constitutive modelling	
Finite element analysis with strain-softening constitutive model <i>Toshihisa Adachi, Feng Zhang, Fusao Oka & Atsushi Yashima</i>	535
Double structure model for the prediction of long-term movements in expansive materials <i>E.E.Alonso, A.Gens & A.Lloret</i>	541
Partially drained behaviour of soft clays and its application <i>A.Asaoka & M.Nakano</i>	549
A model for recent history and non-linearity in the stress-strain behaviour of overconsolidated soil <i>J.H.Atkinson & S.E.Stallebrass</i>	555
An anisotropic stress-strain model for sand <i>Upul D.Atukorala & Peter M.Byrne</i>	561
Determination of constitutive parameters for soils based on optimization <i>K.Axelsson, Y.Yu, K.Runesson & M.Klisinski</i>	569
Numerical model for elastic-viscoelastic-viscoplastic behaviour of bituminous concrete <i>P.G.Bonnier & E.Troost</i>	575
Use of incrementally non linear constitutive equations by the finite element method <i>Marc Boulon, Félix Darve, Hamid El Gamali & Jean Pierre Touret</i>	581
Evolution of shear modulus and fabric during shear deformation <i>Yao-Chung Chen & Hsiu-Yen Hung</i>	587
On the mechanics of state parameter models for sands <i>I.F.Collins</i>	593
Constitutive law for granular skeleton materials: Description of the anisotropic and viscous effects <i>H.Di Benedetto & O.Hameury</i>	599
A comparative study of incremental non-linear constitutive equations <i>T.Doanh & P.Royis</i>	605
Validity of using triaxial test data for calibration of constitutive relationships <i>A.B.Fourie</i>	611
Degradation instabilities in brittle material structures <i>G.Frantziskonis</i>	617

Noncoaxiality and stress-dilatancy relations for granular materials <i>Marte Gutierrez, Kenji Ishihara & Ikuo Towhata</i>	625
Elastoplastic constitutive modelling for unsaturated soils <i>Yuji Kohgo, Masashi Nakano & Tsuyoshi Miyazaki</i>	631
Constitutive model for frictional materials with application to concrete <i>Poul V.Lade & Moonkyum Kim</i>	637
Constitutive modeling of Ottawa sand by strain path tests <i>John F.Lupo, Nancy C.Patti & Thomas W.Thompson</i>	643
Constitutive model for coal under high stresses and temperatures <i>H.Meißner & F.Rogmann</i>	649
Kinematic hardening model for clay in three-dimensional stresses <i>T.Nakai & T.Hoshikawa</i>	655
A generalized plasticity model for anisotropic behaviour of sand <i>M.Pastor</i>	661
Microplane constitutive model for inelastic behavior of soils <i>Pere C.Prat & Zdeněk P.Bažant</i>	669
A three dimensional constitutive elasto-plastic model for sands following the 'Spatial Mobilized Plane' concept <i>F.M.Salgado & P.M.Byrne</i>	675
Creep behavior of fine-grained ocean sediments <i>A.J.Silva, W.-M.Tian, M.H.Sadd & H.G.Brandes</i>	683
A micromechanical theory of plastic non-local behavior of granular media <i>K.C.Valanis & John Gill</i>	689
MIT-E3: A constitutive model for overconsolidated clays <i>Andrew J.Whittle</i>	697
Numerical solution of ultimate bearing capacity of shallow strip footing on anisotropic and nonhomogeneous clays <i>Xu Gancheng, Zhen Yingren & Xie Dingyi</i>	703
Constitutive modeling of Pueblo sand <i>M.Musharraf Zaman & M.Omar Faruque</i>	709
Multi-yield surface theory for soils <i>Zheng Yingren</i>	715
 7. Dynamics and cyclic loading	
Vertical vibration of single piles in radially inhomogeneous soil <i>Huei-Tsyr Chen & Gin-Der Chang</i>	723
Influence of radiation damping on pile driving <i>Nawawi Chouw & Günther Schmid</i>	729

Evaluation of the inelastic response of an axisymmetric foundation to impact loading <i>A.J.Deeks & M.F.Randolph</i>	735
A numerical model for the stability analysis of off-shore embankments in storm wave conditions <i>G.P.Giani & A.M.Ferrero</i>	741
Thin layered element method for estimation of ground vibrations due to traffic loads <i>Toshokazu Hanazato, Keizo Ugai, Michio Mori & Rikuo Sakaguchi</i>	747
Model of cyclic behaviour of calcareous sand and its application to wave loading <i>W.S.Kaggwa & J.R.Booker</i>	753
Vibrations of the ground surface around rigid structures brought about by waves radiated from an adjacent source <i>Y.Kitamura</i>	759
Numerical investigation on the deformation of a marine foundation subjected to caisson-composite breakwater construction <i>M.Mimura, T.Shibata & S.Ohmaki</i>	765
Coupled finite and infinite elements in the dynamic analysis of geotechnical structures <i>C.S.Pan</i>	771
The effect of residual stresses in interpreting stress wave data <i>M.F.Randolph</i>	777
Model for cyclically loaded clay based on critical state theory <i>E.J.Sellers & F.Scheele</i>	783
Finite element analysis of pore pressure build-up beneath offshore gravity structures <i>E.X.Song & A.Verruijt</i>	789
Analytical formulations and a numerical procedure for analysis of non-uniform piles subject to vibration <i>H.H.Vaziri & J.Xie</i>	795
Surface Green's functions for continuously nonhomogeneous soil <i>C.Vrettos</i>	801
Calculation of bottom plate of turbine framed foundation considering frame foundation/soil interaction <i>J.R.Zhang & B.Z.Kang</i>	805
Blasting induced vibrations in discontinuous rock <i>G.Zenz, Li Ning & G.Swoboda</i>	811
Analytical theory of seismic pore pressure generation-dissipation in saturated sand layer <i>Zhang Jianmin, Xie Dingyi & Liu Jiawei</i>	819
