

PROCEEDINGS OF THE SEVENTH INTERNATIONAL CONFERENCE ON COMPUTER
METHODS AND ADVANCES IN GEOMECHANICS / CAIRNS / 6 - 10 MAY 1991

Computer Methods and Advances in Geomechanics

Edited by

G. BEER

CSIRO, Division of Geomechanics

J.R. BOOKER & J.P. CARTER

University of Sydney

VOLUME 2

*Published on behalf of the International Association for Computer Methods
and Advances in Geomechanics by*

A.A. BALKEMA / ROTTERDAM / BROOKFIELD / 1991

Table of contents

8. Earthquakes and geophysical applications

A numerically robust modeling of cyclic mobility <i>Susumu Iai</i>	827
Numerical simulations of shaking table tests on dynamic sliding phenomena of offshore gravity structure on soft rock <i>M.Kanatani, K.Nishi, M.Ohnami & M.Aoyama</i>	833
Simulation of cyclic mobility by DEM <i>K.Miura, K.Ueno & S.Toki</i>	839
Numerical characterisation of material damping in wave propagation problems <i>V.Murti, Y.C.Wang & S.Valliappan</i>	845
A method for nonlinear seismic analysis of waterfront retaining walls <i>J.E.Quintanilha de Menezes, R.Moreno Delgado & M.Matos Fernandes</i>	851
A stochastic finite element analysis for the seismic response of earth dams <i>M.S.Rahman & C.W.Hwang</i>	857
Application of new constitutive model in design of concrete faced rockfill dams <i>Z.J.Shen</i>	863
FEM-FDM coupled liquefaction analysis of a fluid-saturated ground <i>Toru Shibata, Tadanobu Sato, Ryosuke Uzuoka, Fusao Oka, Atsushi Yashima & Mitsuru Kato</i>	869
Analysis of land slide due to liquefaction <i>Tadahiko Shiomi & Hiroshi Tsunekawa</i>	875
Hybrid experiments on nonlinear earthquake-induced soil-structure interaction <i>Kenzo Toki, Tadanobu Sato, Junji Kiyono, Nozar Kishi Garmroudi, Kazuya Oshima & Masaaki Yoshikawa</i>	881
Numerical simulation of water-gravity dam-foundation system under earthquake loading <i>S.Valliappan, Chongbin Zhao & Y.C.Wang</i>	887
Hydrodynamic pressures on dams with compound slopes during earthquakes <i>W.Xiong & S.Yu</i>	893
3-D dynamic analysis of effective stress of tailings dams <i>Xu Zhiying & Zhou Jian</i>	901

Seismic response of reinforced soil retaining walls <i>M.Yogendrakumar, R.J.Bathurst & W.D.Liam Finn</i>	907
Analysis of liquefaction induced displacements <i>W.D.Liam Finn, M.Yogendrakumar, R.H.Ledbetter & N.Yoshida</i>	913
Shaking table test and analysis of compacted sand-structure system for liquefaction <i>K.Fukutake, A.Ohtsuki, M.Sato & Y.Shamoto</i>	923
 9. Back analysis, comparison of field measurements and predictions	
The direct modulus factoring method for the back analysis of Young's moduli <i>S.Akutagawa, E.T.Brown, J.L.Meek & G.Chitombo</i>	931
The back analysis of in-situ stresses in a multiple stage excavation problem <i>S.Akutagawa, J.L.Meek & E.T.Brown</i>	937
A road embankment on soft clay: Field behaviour and prediction <i>F.H.Ali & R.Hashim</i>	943
Comparison of static and statistical methods for back-analysis of elastic consolidation problems <i>K.Arai, H.Ohta & M.Miyata</i>	949
Settlement and deformation of embankment dams <i>Ashok K.Chugh</i>	955
Determination of aquifer parameters by the numerical back analysis of single borehole permeability test <i>K.Daito & K.Ueshita</i>	967
Finite element analysis of the Hatfield wall <i>R.A.Day & D.M.Potts</i>	973
Earthquake response of single piles: Soil-pile interaction and dynamic response analysis <i>W.B.Gohl & W.D.Liam Finn</i>	979
Performance evaluation of continuous sheet cut-off wall by pumping test using inverse analysis <i>Yusuke Honjo, Kazuo Yamada, Akira Morishima & Takuhei Fukuhara</i>	987
Field measurement and its numerical interpretation of disturbed zone around drift <i>Katsumi Kamemura, Tomoyuki Aoki, Katsuo Ito, Yasuo Ninomiya & Kozo Sugihara</i>	993
Numerical modelling of mine subsidence at Angus Place Colliery <i>D.R.Kay, K.E.McNabb & J.P.Carter</i>	999
Identification of parameters of nonlinear geotechnical models <i>A.Ledesma, A.Gens & E.E.Alonso</i>	1005
Interpretation of ground performances based on back analysis results <i>Akira Murakami, Takashi Hasegawa, Hide Sakaguchi & Noriyuki Kobayashi</i>	1011

Deformation analysis of anisotropically consolidated clay foundation loaded by 5 embankments <i>H.Ohta, A.Iizuka, Y.Mitsuhashi & M.Nabetani</i>	1017
An elasto-viscoplastic FEM analysis of sensitive clay foundation beneath embankment <i>F.Oka, F.Tavenas & S.Leroueil</i>	1023
The development of a finite element based back-analysis model for raft slabs on expansive soil using NASTRAN <i>C.M.Rigg</i>	1029
Various applications of piled raft analysis <i>T.J.Wiesner</i>	1035
Tank foundations in Townsville <i>T.J.Wiesner & A.B.Walker</i>	1041
Use of back-analysis to confirm soil parameters <i>D.J.Williams & Y.Tanaka</i>	1047
 10. Analytic, semi-analytic and boundary element methods	
A semi-infinite element method for R-wave dispersion in layered half-space <i>Yunmin Chen, Tangdai Xia & Shiming Wu</i>	1055
Determining the maximum permissible depths in which working anchoring with shotcrete lining in combination with anchors is possible <i>Nina N.Fotieva & A.S.Sammal</i>	1061
Elasto-plastic analysis of the shear vane test by semi-analytical finite elements <i>D.V.Griffiths & P.A.Lane</i>	1067
Lateral loading of offshore foundations <i>S.Kay</i>	1073
Optimal iteration schemes suitable for general non-linear boundary element modelling applications <i>J.A.Ryder</i>	1079
Consolidation around a heat source buried at a finite depth below the surface of a deep clay stratum <i>C.Savvidou & J.R.Booker</i>	1085
Numerical evaluation of Green's function of layered viscoelastic halfplane for certain buried forces <i>Hirokazu Takemiya & Kenichi Arioka</i>	1091
Simplified interactive analysis of rafted space frames founded on inhomogeneous soil media <i>Z.E.Yao</i>	1097
Analysis of rafts on foundations of variable stiffness <i>B.Zhang & J.C.Small</i>	1103

11. Numerical methods

Nonlinear consolidation: Linear multistep methods and iterative algorithms <i>Ronaldo I. Borja</i>	1111
Non-linear finite element analysis of safety factors <i>R. B. J. Brinkgreve & H. L. Bakker</i>	1117
A semi-discrete procedure for dynamic response analysis of saturated soils <i>Harpal S. Chohan, Ranbir S. Sandhu & William E. Wolfe</i>	1123
On some geomechanical problems by finite elements and boundary elements combination <i>Qinghua Du & Xiaoyan Lei</i>	1129
Equivalent elastic moduli of cable bolted finite elements <i>F. Duan & W. G. Pariseau</i>	1135
Soil-structure interaction in consolidation problems <i>Janusz M. Dłużewski</i>	1141
Analysis of unrestrained thin and moderately thick circular plates on elastic halfspace <i>M. Omar Faruque, A. Mahmood & M. Musharraf Zaman</i>	1147
Piled raft foundation analysis by finite elements <i>D. V. Griffiths, P. Clancy & M. F. Randolph</i>	1153
Numerical modelling for weak rock <i>C. M. Haberfield & I. W. Johnston</i>	1159
Analysis of post peak behaviour of foundations <i>E. Ichimoto, M. Nozu, K. Okuyama, A. Iizuka & H. Ohta</i>	1165
A versatile interaction analysis for nonlinear bodies <i>J. K. Kodikara & I. D. Moore</i>	1171
Numerical implementation of indirect displacement control <i>F. Molenkamp</i>	1177
Objective solutions for bearing capacity of strain-softening soils <i>I. D. Moore & R. K. Rowe</i>	1183
3-D analysis of soil/water coupling problems using elasto-viscoplastic constitutive relationships <i>Hideki Ohta, Atushi Iizuka, Yutaro Omote & Shigehiko Sugie</i>	1191
Computational aspects of endochronic plasticity <i>John F. Peters</i>	1197
An efficient implementation of the implicit elasto-viscoplasticity algorithm <i>M. B. Reed & X.-D. Pan</i>	1203
Time integration scheme for soil-structure systems with frequency dependent complex stiffness <i>Tadanobu Sato, Kenzo Toki, Junji Kiyono, Nozar Kishi Garmroudi, Masahiko Kitazawa & Masanobu Arano</i>	1209

Comparison between different finite element solutions for immiscible two phase flow in deforming porous media <i>B.A.Schrefler & L.Simoni</i>	1215
Well-posedness of BVP for hypoplastic localization <i>Z.Sikora</i>	1221
Finite element analysis of excavation in jointed rock <i>J.C.Small & M.O.Chung</i>	1227
Longitudinal bending in pipelines subjected to embankment loading <i>J.C.Small & J.T.M.Ngu</i>	1233
Numerical analysis of the contact problem of arbitrarily shaped foundations using a two-parameter foundation model <i>Rudolf F.Stark</i>	1241
Hierarchical single surface model for anisotropic hardening cohesive soils <i>G.W.Wathugala & C.S.Desai</i>	1249
A finite difference solution to self-weight consolidation equations <i>T.Yamagami, Y.Ueta & S.Sakai</i>	1255
Two-dimensional numerical simulation of generalized consolidation of problems of unsaturated soils <i>Daiquan Yang & Z.J.Shen</i>	1261
A FEM solution to the multiple crack problem under compression <i>Yuan Yanguang & Song Huizheng</i>	1267
Improved preconditioned conjugate gradient method and its application in engineering <i>Zheng Hong & Ge Xiurun</i>	1273

12. Mining applications

Outbursts – A comparison between model and field data <i>K.Barron & D.Kullmann</i>	1281
3-dimensional analysis of underground excavations – Two new programs applied to a mining problem <i>S.K.Choi, M.B.Wold, J.M.Crotty Sisson & M.F.Lee</i>	1287
The cap model for stress path analysis of mine backfill compaction processes <i>Ian H.Clark</i>	1293
Some applications of three dimensional boundary element analyses to mine design <i>R.Cowling, M.A.Struthers, S.Akutagawa & J.O.Watson</i>	1299
Evaluation of dragline foundation stability – A case study <i>Michael Dunbavan</i>	1305
A finite element model of yield zones in weak rock <i>Mary E.Duncan Fama</i>	1311

Geotechnical aspects of longwall coal mining at Cook Colliery, Queensland <i>Ian L.Follington, Anthony Dutton & Phil Garritty</i>	1319
Numerical modelling of horizontal and vertical drain holes in open pit mining using the finite element method <i>R.G.Friday & P.S.K.Giam</i>	1327
The relations between rockburst and the stresses around the stope in the Tian-Shen-Qiao tunnels <i>Hou Faliang & Song Yile</i>	1333
Numerical methods for stability analysis of underground excavations in mining of the tabular deposit <i>Hu Qinghuai & Zhang Huaixiao</i>	1339
A numerical model for salt rock behaviour at room and pillar mining <i>W.Hüls, H.Böhnel & B.Komarek</i>	1345
Stress state investigation in the rock bursts hazardous zone between an underground working and a joint by numerical methods <i>V.I.Ivanov & N.I.Belov</i>	1351
The PC MINSIM-D program, with applications to the design of deep tabular mine layouts <i>R.A.Johnson & J.A.Ryder</i>	1355
3-D finite element modelling of the Hope Brook Gold mine <i>N.C.Koutsabeloulis, M.Rylance & R.E.Eggington</i>	1359
The influence of relief slot on the stress state of a mine tunnel preface area <i>A.A.Kozyrev, V.A.Maltsev, V.V.Pavlov & S.N.Savchenko</i>	1365
A multivariate discriminant model for classification of rock masses <i>Lin Yun-mei & Liu Xi-cai</i>	1369
The numerical simulation of time effect of coal burst <i>Y.Pan, C.Liu & M.Zhang</i>	1375
Evaluation of the influence of excavation of a coal seam on the stability of tunnels <i>H.F.Schweiger, E.Handel & G.Mauerhofer</i>	1381
Displacement based approach for prediction of subsidence caused by longwall mining using numerical methods <i>Hema J.Siriwardane & J.Amanat</i>	1387
Initial roof movement during development of room and pillar sections <i>A.Vervoort</i>	1393
Numerical analysis of self-weight consolidation of coal mine tailings slurry in a large settling column <i>D.J.Williams & H.-Y.Li</i>	1399
Two-dimensional finite element analysis of a trial embankment on coal mine tailings <i>D.J.Williams, P.H.Morris & J.P.Carter</i>	1405
Stochastic finite element analysis of coal mine spoil pile stability <i>D.J.Williams & J.-Z.Zou</i>	1411

The numerical simulation of lessening the surface subsidence by grout injection <i>Z.Xu, Y.Pan & D.Qi</i>	1417
Three-dimensional stress analyses of mine structures using micro-computers <i>Y.S.Yu, L.Closset & N.A.Toews</i>	1423
Numerical analyses for latent energy of outbursts in coal seams <i>Yu Chushing & Xian Xuefu</i>	1429
 13. <i>Tunnels and underground openings</i>	
Simulation of the successive ground subsidence due to shield tunneling <i>T.Adachi, F.Oka, T.Hirata, T.Hashimoto & J.Nagaya</i>	1437
A comparative numerical study on the reinforcement effects of rockbolts and shotcrete support systems <i>Ö.Aydan & T.Kawamoto</i>	1443
A finite element analysis of the time dependent behaviour of underground openings <i>Annamaria Cividini, Giancarlo Gioda & Angelo Carini</i>	1449
Time dependent behaviour of a tunnel heading in clay <i>E.K.De Moor & R.N.Taylor</i>	1455
Elasto-plastic coupled BE-FE stress analysis of a tube of Vienna's underground line U3, considering sequences of driving and securing by shotcrete <i>J.Eberhardsteiner, H.A.Mang & P.Torzicky</i>	1461
Stability analysis of a deep tunnel with the elasto-plastic strain softening behavior <i>T.Esaki, Y.J.Jiang & T.Kimura</i>	1467
Computer modelling and monitoring of a deep tunnel intake in hard rock, at Vargön in Sweden <i>A.Fredriksson & T.Groth</i>	1473
Back-analysis of tunnel lining stresses <i>M.Hisatake</i>	1479
Interbedded rock effect in powerhouse cavern stress analysis <i>E.C.Kalkani</i>	1485
Application of updated Hoek-Brown criterion to predict the loosened zone around a tunnel <i>X.D.Pan, P.G.Grasso, M.A.Mahtab & M.B.Reed</i>	1491
Use of finite element techniques for the design of tunnel junction linings <i>T.A.Rock & R.K.Pöttler</i>	1497
Effect of seepage forces on the shotcrete lining of a large undersea cavern <i>H.F.Schweiger, R.K.Pöttler & H.Steiner</i>	1503
An approach to support optimization in underground structures <i>S.M.Seid Karbasi & F.Rafia</i>	1509
FEM modelling of rock bolts <i>G.Swoboda & M.Marenče</i>	1515

Search for critical failure lines of models reinforced with rockbolts and anchors <i>Tatsuya Tsubouchi, Keiji Hiroi, Tetsu Nishioka & Seiichi Onodera</i>	1521
Three dimensional supporting effects of tunnel face <i>Jiro Yamatomi, Gento Mogi & Umetaro Yamaguchi</i>	1527
 14. <i>Environmental, resource and groundwater geomechanics</i>	
Fully coupled finite element flow modelling of layered aquifer systems with compressible aquitards <i>J.R.Booker, R.J.Best & B.C.Burman</i>	1535
An attempt to simulate the migration of pollutants in rock mass by means of the Random Walk <i>Dieter D.Genske, Hans Herda & Yuzo Ohnishi</i>	1541
Three-dimensional finite-element solution for heat and fluid transport in deformable rock masses with discrete fractures <i>Varut Guvanasen & Tin Chan</i>	1547
Geomechanical field measurements in a multiple-borehole heater test in rock salt and model validation <i>St.Heusermann, J.Kopietz & D.Meister</i>	1553
Storage of heated water in openings excavated in rock mass in mountain <i>Yoshinori Inada, Naoki Kinoshita, Hidehiko Nakasaki & Takao Ueda</i>	1559
Effect of water curtain system on storage of low temperature materials in underground opening <i>Yoshinori Inada & Yuichi Kohmura</i>	1565
Numerical analysis of underground cool storages in rock caverns <i>M.Lu & D.C.Goodall</i>	1571
A new method for the field measurement of three dimensional anisotropic hydraulic conductivities in jointed rock mass using a single-hole <i>Shinji Nakaya, Makoto Nishigaki & Ichiro Kohno</i>	1577
Parameter estimation methods to determine hydraulic properties of multilayered aquifers from pumping test data <i>Makoto Nishigaki, Yuji Takeshita & Ichiro Kono</i>	1583
Estimation of permeability in well-jointed rock masses <i>W.G.Pariseau</i>	1589
Stress, deformation and flow analysis of oil sand masses under applied load and temperature changes <i>T.Srithar & Peter M.Byrne</i>	1595
Geomechanical investigations on the underground disposal of hazardous waste in rock salt caverns <i>K.Staudtmeister & U.Schmidt</i>	1603

15. Flow problems

A numerical simulation of rock mass with high pressured gas <i>Toshihisa Adachi, Takeshi Tamura & Norio Doi</i>	1611
The consolidation of unsaturated soil <i>Chen Zhenghan, Xie Dingyi & Liu Zoudian</i>	1617
The adaptation of a 3-D FEM code to the oil environment – The rock rheology <i>P.Humbert, P.Mestat & F.J.Santarelli</i>	1623
The adaptation of a 3-D FEM code to the oil environment – Pore pressure diffusion <i>P.Humbert, J.M.Piau & F.J.Santarelli</i>	1629
Unsaturated seepage model based on microstructure of soil <i>Ryosuke Kitamura & Youichi Uto</i>	1635
Study on application method of 3-D fracture seepage model <i>A.Kobayashi, R.Yamashita & Y.Moro</i>	1641
Study and statistical analysis of the computer modelling of hydraulic fracturing phenomena in hydrocarbon reservoirs <i>Raffaele Romagnoli & Riccardo Varvelli</i>	1647
A numerical energy-based approach for three-dimensional fracture propagation <i>José Luiz Antunes O.Sousa & Anthony R.Ingraffea</i>	1653
Stress distribution in an Athabasca oil sand in response to the injection of steam <i>W.S.Tortike & S.M.Farouq Ali</i>	1659
Flow through fractured media <i>S.Valliappan & N.Khalili-Naghadeh</i>	1667
Author index	1673
