

PROCEEDINGS OF THE INTERNATIONAL SYMPOSIUM ON WEAK ROCK
TOKYO / 21-24 SEPTEMBER 1981

Weak Rock

Soft, Fractured and Weathered Rock

Edited by

KOICHI AKAI

Kyoto University

MASAO HAYASHI

Central Research Institute of Electric Power Industry

YUICHI NISHIMATSU

University of Tokyo

VOLUME ONE

1 Engineering property on the weak rock

2 In situ investigation of the weak rock

A.A.BALKEMA/ROTTERDAM/1981

Table of contents

1 Engineering property on the weak rock

| | |
|---|-----|
| Deformation of crushed rock under plane strain conditions <i>Mosaid Al-Hussaini</i> | 3 |
| Relation between uniaxial compressive strength and elastic wave velocity of soft rock <i>Masayasu Inoue & Michito Ohomi</i> | 9 |
| On shear behaviours of rock containing weak planes <i>Ryoji Kobayashi & Fumio Sugimoto</i> | 15 |
| Shear failure mechanism and strength criteria of a dislocated mudded intercalation <i>Lin Weping</i> | 21 |
| A contribution to the shear test techniques for weak rock masses <i>F. Peres-Rodrigues & M. Reis E Sousa</i> | 27 |
| Geomechanical properties of New Zealand soft sedimentary rocks <i>S.A.L. Read, P.J. Millar, T. White & B.W. Riddolls</i> | 33 |
| Mechanical behavior of clay siltstone in compression by plate-bearing test <i>Tao Zhen-yu</i> | 39 |
| Elements of rock weakening of coal-bearing strata of the Canadian Plains Region <i>M.L. Jeremic</i> | 43 |
| The mechanical effect of the thickness of the weak intercalary layers <i>Sun Wanhe, Zheng Tiemin & Li Mingying</i> | 49 |
| Analysis of slope failures in weathered phyllite <i>Fernando H. Tinoco & Daniel A. Salcedo</i> | 55 |
| Characteristics of deformation and permeability of fractured rock <i>T. Kawamoto, Y. Obara & N. Tokashiki</i> | 63 |
| Mechanical behavior of fault materials subjected to static and cyclic loading <i>K. Nishi & Y. Esashi</i> | 69 |
| Improved multiple-stage triaxial test method for soft rock <i>Koichi Akai, Yuzo Ohnishi & Der-Ho Lee</i> | 75 |
| Strain-softening behavior of soft sedimentary rock in triaxial test condition <i>Koichi Akai, Yuzo Ohnishi & Atsushi Yashima</i> | 81 |
| Deformation behaviour of soft rocks <i>R. Yoshinaka & T. Yamabe</i> | 87 |
| Structural weaknesses in rocks and rock masses — Tentative classification and behaviour <i>P. Duffaut</i> | 93 |
| Prediction of long term strength of soft sedimentary rock <i>Toshihisa Adachi & Akio Takase</i> | 99 |
| Stress - strain - time relationship for a jointed coal <i>Sergio A.B. da Fontoura & Norbert R. Morgenstern</i> | 105 |
| Investigating rheological properties of fissured semirocks <i>V.L. Kubetsky & V.A. Kozionov</i> | 111 |

| | |
|--|-----|
| Time-dependent characteristics of strength and deformation of a mudstone <i>H.Ohtsuki, K.Nishi, T.Okamoto & S.Tanaka</i> | 119 |
| Creep deformation of oil shale at elevated temperatures <i>John F.Schatz & Krishna P.Sinha</i> | 125 |
| Creep compaction of porous rock <i>John F.Schatz & Michael M.Carroll</i> | 131 |
| A time dependent model for lining pressure based on strength concepts <i>M.J.Gilbert & I.W.Farmer</i> | 137 |
| Long-term and cyclic plate loading tests in weak rocks <i>M.Borsetto, P.P.Rossi & R.Ribacchi</i> | 143 |
| A study on water-sensitivity of argillaceous rock <i>Toshiro Sasaki, Shigenori Kinoshita & Yoji Ishijima</i> | 149 |
| Consolidation and strength of the soft sedimentary rocks <i>Kazuo Hoshino</i> | 155 |
| Investigation of weak leached dolomite with a view of its using in construction of earth dams <i>N.F.Aripov, S.V.Bortkevich & A.N.Skibin</i> | 161 |
| Piping failure of undisturbed specimen of weathered granitic rocks <i>Kazuhiko Nishida & Chiaki Aoyama</i> | 167 |
| Behaviour of clastic rocks in polluted atmosphere <i>G.Baronio & A.Cancelli</i> | 173 |
| Weathering of greywacke sandstone, Wellington, New Zealand <i>W.A.Watters, C.W.R.Soong & B.W.Riddolls</i> | 179 |
| The weathering characteristics of Ankara andesites from the rock mechanics point of view <i>A.G.Paşamehmetoğlu, C.Karpuz & T.Y.Irfan</i> | 185 |
| Variation of physical properties of igneous rocks in weathering <i>T.Saito</i> | 191 |
| Engineering properties of some weak Icelandic volcanic rocks <i>Björn Oddsson</i> | 197 |
| The behaviour of some South African mudrocks due to temperature and humidity changes with particular reference to moisture content and volume changes <i>J.P.Venter</i> | 205 |
| Slaking and swelling properties of mudstone <i>R.Okamoto, H.Sugahara & I.Hirano</i> | 213 |
| Quantitative estimation of swelling and slaking characteristics for soft rockmass <i>K.Kojima, Y.Saito & M.Yokokura</i> | 219 |
| Additives to limit slaking in compacted shales <i>M.Surendra & C.W.Lovell</i> | 225 |
| Swelling characteristics of some mudrocks from Asturias (Spain) <i>J.Ordaz & V.Gómez Ruiz de Argandoña</i> | 231 |
| The engineering geological problems of swelling rocks in the underground construction <i>Qu Yongxin, Xu Bing, Shi Mengxiong & Xu Xiaolan</i> | 237 |
| Free-swell properties of some South African mudrocks <i>J.P.Venter</i> | 243 |
| Some aspects of the behaviour of fissured claystones <i>J.-P.Tisot & R.Houpert</i> | 253 |
| Evaluation of tensile strength of fractured rock according to the estimation of the degree of their stability <i>N.N.Maslov, T.V.Pavlisheva & P.A.Phonarev</i> | 259 |
| Model study of fracture around underground excavations in weak rocks <i>B.B.Dhar, S.Ratan, D.K.Sharma & P.M.Rao</i> | 267 |
| The model scale investigations of subsidence process near quarry <i>A.B.Fadeev & A.N.Chemodanov</i> | 273 |
| The crack propagation and fracture around the excavation <i>Zonzhe Jin, Takeo Yokobori, Ichiro Maekawa & Toshimitsu A.Yokobori, Jr.</i> | 279 |
| Acoustic emission behaviour of sound to weak granites: Petrographic interpretation <i>M.Montoto, L.M.Suárez del Río, A.Wahab Khair & Reginald Hardy, Jr.</i> | 285 |

| | |
|---|-----|
| Rate-dependent behaviour of rock joints – Black quartz syenite <i>A.M.Crawford & J.H.Curran</i> | 291 |
| Engineering properties of the main host rocks and pre-mining considerations of Obi coal deposit, near Lafia, Nigeria <i>Abdul Y.Ojulari, B.A.Adegbesan & I.E.Ezenwanne</i> | 297 |
| Geotechnical properties of the Bauru sandstone, Sao Paulo, Brazil <i>Akira Koshima, Hideo Imaizumi, Othilio Moura Filho & Carlos Pimenta</i> | 303 |
| Study of physico-mechanical properties of weak rock underlying structure foundations <i>D.D.Sagepin, N.M.Karpov & G.M.Petrosyan</i> | 309 |
| Determination of some engineering properties of weak rocks <i>D.P.Singh</i> | 315 |
| Factors affecting degradation and density of compacted shales <i>B.C.Hale, C.W.Lovell & L.E.Wood</i> | 321 |
| Dependence of mechanical properties to the texture and water content of weak rock – A case of the Late Tertiary mudstone from the Mae Mo lignite mine, northern Thailand <i>F.T.Onodera & Prateep Duangdeun</i> | 327 |
| The microstructure and the engineering properties of the mudded shear zone in weak intercalation <i>Y.L.Wang & Z.S.Xiao</i> | 333 |
| The nature of strength and deformability of weak carbonaceous rocks <i>Valentin A.Moshanski & Igor A.Parabouchev</i> | 339 |
| Bearing capacity of power transmission line tower foundation installed on weathered rock <i>K.Imano</i> | 347 |

2 *In situ* investigation of the weak rock

| | |
|---|-----|
| Properties of weak rocks, with special reference to the shear strength of their discontinuities, as encountered in British surface coal mining <i>F.P.Hassani & M.J.Scoble</i> | 355 |
| Engineering properties of fissured rock <i>T.Noto, M.Matsuyuki & K.Miyajima</i> | 365 |
| Relaxation and creep properties of thin interbedded clayey seams and their fundamental role in the stability of dams <i>Tan Tjong Kie & Li Ke Ri</i> | 369 |
| Analysis of various factors influencing deformation and strength characteristics of soft rock <i>Toshiaki Takeuchi, Soichi Tanaka, Tatsukichi Tanaka & Kazunori Nishida</i> | 375 |
| On the shear strength of dam foundations with interbedded weak seams <i>Mei Jian-Yun</i> | 381 |
| Geological investigation utilizing bore hole measurement system and judgement of engineering properties for weathered granite <i>K.Ishikawa, K.Takahashi, K.Miyajima, H.Ochi & T.Seko</i> | 387 |
| The effect of weathering upon stability and strain of the stratified rocks (aleurolites and sandstones) in tropical climate <i>L.N.Dzhioev & N.K.Berishvili</i> | 393 |
| Correlation between the degree of the fracture and the results from borehole jack test <i>Kozo Miki & Junichi Miyagawa</i> | 397 |
| Weak rocks of Southern Florida <i>Surendra K.Saxena</i> | 403 |
| In-situ measurements of the large-scale properties of chalk <i>A.Marsland & J.J.M.Powell</i> | 411 |
| On evaluation of in situ deformation coefficient and c, ϕ of soft rock by borehole load test <i>Toshiaki Takeuchi & Tateo Suzuki</i> | 417 |
| In situ mechanical property investigation of poor flysh rock <i>S.B.Ukhov, V.H.Burlakov & A.S.Panenkov</i> | 423 |
| Engineering-geological characteristics of weak zones on tectonic contacts in some metamorphic rocks in Czechoslovakia <i>Milena Samalková & Vladimír Hašek</i> | 429 |
| Weakening caused by fluids used for drilling mudstones <i>William E.Bamford & Jeffery A.Washusen</i> | 435 |

| | |
|---|-----|
| A study on a technique of prediction for ground stabilities <i>Yoshimaru Murakami, Takao Nakazawa & Mitsuhiro Sezaki</i> | 441 |
| Determination of the deformability modulus of weak rock masses by means of large flat jacks (LFJ) <i>J. Loureiro-Pinto</i> | 447 |
| Strain analysis of loading tests on multi-layered soft rocks <i>Y. Nishigaki, T. Noto & K. Takahashi</i> | 453 |
| Determination of ground pressure existing in a viscoelastic rock mass by use of hydraulic borehole pressure cells <i>Paul H. Lu</i> | 459 |
| Measurement of viscoelastic property of rock by borehole jack test <i>M. Irobe, K. Terao, M. Sato & H. Kawamura</i> | 467 |
| Stability of cavities in rocksalt <i>P. Berest & D. Nguyen Minh</i> | 473 |
| Time deformations of the large openings in the rock salt mine <i>Enver H. Mandžić & Ivan Baturić</i> | 479 |
| A share vane technique to measure the in situ strength of weak rock <i>B. L. Wiid</i> | 485 |
| Proposal for the groundwater pressure measurement to investigate the groundwater movement in the bedrock <i>I. Motojima, J. Shimada, S. Fujiwara & K. Ohta</i> | 491 |
| Express method of testing jointed weak rock masses <i>E. A. Freiberg</i> | 497 |
| Procedures for the investigations of permeability and seepage control in soft rock foundations for dams <i>Isao Shibata, Ryuichi Iida & Norihisa Matsumoto</i> | 503 |
| Study of shear strength of weak rock foundations of retaining structures <i>R. A. Shiryayev, M. L. Neminsky, V. P. Bezzubov & Z. A. Shpindler</i> | 509 |
| In situ ground investigation in development countries as a combined operation of technologists and local workmen <i>H. K. O. Dietz</i> | 515 |
| Methods of investigation of weathered rocks in Hong Kong <i>R. A. Forth & P. M. Platt-Higgins</i> | 519 |
| The property and the seismic wave velocity of fractured zone <i>Kazuhiko Ikeda, Hiroshi Ohshima & Takashi Sakurai</i> | 527 |
| Experience with weak rock <i>Eric E. Jordan & Adel M. Hanna</i> | 533 |
| Failure of weak rock slopes <i>Qiushun Huang</i> | 539 |
| Influences of 'underground erosion' on instability of a crystalline schist slope <i>K. Sassa, A. Takei & H. Marui</i> | 543 |
| Claystone slides, Interstate Route 79, Pittsburgh, Pennsylvania, USA <i>James V. Hamel & William R. Adams, Jr</i> | 549 |
| Conditions of changing of extra-hard rock into weak rock under the influence of tectonic stresses of massifs <i>I. A. Turchaninov, G. A. Markov & A. V. Lovchikov</i> | 555 |
| Mechanical behavior of coal seam sandwiched by rigid strata <i>K. Sugawara, H. Okamura, K. Kaneko & O. Kimura</i> | 561 |
| Physical and mechanical characterization of a weak rock involved in the excavation of an underground power-house <i>A. Frassoni, P. P. Rossi, T. Moro & N. Nocilla</i> | 567 |
| Special investigations – Integral sampling and weatherability and initial stress testing – for the design of a canal <i>Nobutugu Kaji, Mauro H. Lozano, Djalma L. Sanches & Iramir Barba Pacheco</i> | 573 |
| Studies on the foundation of non cemented deposit for a rockfill dam <i>A. Hiratsuka, K. Watanabe & K. Kanazawa</i> | 579 |
| A review of rock abrasiveness testing for tunnelling <i>G. West</i> | 585 |
| Significance of water pumping test in detecting subsurface weak features with reference to projects of Eastern India <i>S. Gangopadhyay</i> | 595 |
