

PROCEEDINGS OF THE INTERNATIONAL SYMPOSIUM ON WEAK ROCK  
TOKYO / 21-24 SEPTEMBER 1981

# Weak Rock

## *Soft, Fractured and Weathered Rock*

*Edited by*

KOICHI AKAI

*Kyoto University*

MASAO HAYASHI

*Central Research Institute of Electric Power Industry*

YUICHI NISHIMATSU

*University of Tokyo*

### *VOLUME TWO*

- 3 *Specialized theory and analysis on the weak rock*
- 4 *Adequate design and construction practice for the weak rock*
- 5 *Dynamics and tectonics on the weak rock*
- 6 *General reports from Japan*

A.A.BALKEMA / ROTTERDAM / 1981

## Table of contents

### 3 Specialized theory and analysis on the weak rock

The initiation and detection of discontinuities in a continuum <i>Hans van der Kogel</i>	603
Evaluation of shearing strength and deformability of soft rock containing weak layers <i>T.Okabe, K.Kishi &amp; H.Ohtsuki</i>	607
A strength criterion of rocks and rock masses <i>Ryunoshin Yoshinaka &amp; Tadashi Yamabe</i>	613
Mechanical models of fractured rock <i>Liu Baoshen &amp; Yan Rongui</i>	619
Frictional mechanism of ploughing <i>U.Nascimento</i>	625
A new equation about creep deformation on weak rock <i>Toshiro Isobe &amp; Yuusaku Tominaga</i>	631
Integral-operator method for determining rheological deformations of weak rocks <i>I.T.Mintchev</i>	637
A coupled problem of freezing and seepage phenomena in saturated porous media <i>Y.Ichikawa &amp; T.Kawamoto</i>	641
The use of back-calculations to obtain the shear and tensile strength of weathered rocks <i>Rodolfo T.Sancio</i>	647
Some consideration on the mechanical behaviour of anisotropic rock masses during the excavation of slope <i>Hiroshi Ito &amp; Yoshihiro Kitahara</i>	653
Probabilistic consideration of progressive action in weak rock masses <i>Robin N.Chowdhury &amp; Dimitri A-Grivas</i>	659
Stability analysis of a rock slope against toppling failure <i>R.Evans, S.Valliappan, D.McGuckin &amp; H.L.Raja Sekar</i>	665
Bearing capacity and failure mechanism of soft rock under rigid footing <i>Ryunoshin Yoshinaka &amp; Hitoshi Nishimaki</i>	671
Settlement analysis of foundations on a complex geological profile <i>H.B.Poorooshasb, B.B.Taylor, E.L.Matyas &amp; B.LeLievre</i>	677
Stress distribution in fissured foundations <i>R.Hamajima, T.Kawai &amp; H.Izeki</i>	683
Monte Carlo simulation of settlement of foundations on a rock mass <i>Madhira R.Madhav &amp; Kalavacharla S.Rama Krishna</i>	689
Prediction of the stressed-strained state of expansive rock massifs upon wetting <i>Z.G.Ter-Martirosyan &amp; G.Ya.Karapetov</i>	695
On the surface subsidence in natural gas fields <i>T.Nishida, T.Esaki, K.Aoki &amp; N.Kameda</i>	701

Cave-in due to mining at shallow depths <i>T.Nishida, T.Esaki, N.Kameda &amp; K.Aoki</i>	707
Strain-softening finite element analysis of rock applied to tunnel excavation <i>Mutsuto Kawahara, Yoneji Kanoh, Noriyoshi Kaneko &amp; Kei Yada</i>	713
Strain softening behaviour of rocks in engineering practice <i>D.Nguyen Minh, P.Berest, J.Bergues &amp; P.Habib</i>	719
New discrete models and their application to rock mechanics <i>T.Kawai, N.Takeuchi &amp; T.Kumeta</i>	725
A mathematical model for cracked weak rock with nonlinear deformative and collector properties <i>S.V.Kuznetsov &amp; M.E.Slonim</i>	731
A numerical modeling technique for analyzing the behavior of discontinuous rock masses <i>Tatsuo Asai, Masao Nishimura &amp; Toshiaki Saito</i>	737
Stability of cross-section tunnel structures of multiple joint system <i>B.R.Popovic</i>	743
Interpretation of displacement measurements in tunnels <i>S.Sakurai</i>	751
Effects of rock bolts and thin linings as tunnel supports in soft rock <i>Yujiro Tazawa, Yasushi Nakahara &amp; Nobuyuki Okabayashi</i>	757
Interaction between rockbolts and weak rock in tunneling <i>Chikaosa Tanimoto, Shojiro Hata &amp; Keizo Kariya</i>	763
The behaviour of anchor plates embedded in creep susceptible geological media <i>A.P.S.Selvadurai</i>	769
On the deformations in the plastic region around an unlined circular tunnel in soft ground <i>Eiichi Oda &amp; Masakuni Horita</i>	777
Stress analysis in the weak surrounding rock and lining treated as multiconcentric rheological media <i>Zhu Weishen &amp; Bai Shiwei</i>	783
Rock salt mass creep around the circular opening <i>Enver H.Mandžić</i>	789
A numerical analysis of tunnelling in soft rocks <i>K.Kamemura &amp; H.Kimura</i>	795
Effects of existing tunnel on the stress distribution of new tunnel lining <i>T.Ito &amp; M.Hisatake</i>	801
Three dimensional model tests on soft ground tunnels <i>T.Konda, A.Inokuma &amp; K.Kanto</i>	807
Stresses and deformations around tunnel face in soft rock <i>S.Kobayashi, T.Tamura, N.Nishimura &amp; Y.Mochida</i>	813
The effect of lateral stress changes around a borehole in shale during plugging on plug adequacy <i>Joseph M.Olsen</i>	819
A study of the ground behavior around the longwall faces in underground mining of colliery <i>T.Yamada &amp; H.Sasaguri</i>	825
A study on the underground openings of Kuroko mines <i>Jiro Yamatomi, Takakoto Shimotani &amp; Umetaro Yamaguchi</i>	831
Geological and rockmechanics aspects of coal mining in weak rock environments <i>K.H.R.Moelle</i>	837
<b>4 Adequate design and construction practice for the weak rock</b>	
Stable excavation for water intake shaft in weathered rocks with fractured zone <i>Yuzo Yamazaki, Tetsuo Matsuzawa, Takeshi Hosoi &amp; Yukio Tomatsu</i>	849
Outline on rock pressure and support for roadways built in weak swelling strata <i>Li Wenguang</i>	855
Research on rock pressure and support of roadways in weak rock <i>Niu Xizhou</i>	861
Design of cut slopes preventing tensile failure in a pyroclastic flow deposit 'Shirasu' <i>T.Yamanouchi, K.Gotoh &amp; H.Murata</i>	867
The mechanisms, measurement and control of blast-induced fracturing in pitwalls in weak rock <i>T.N.Hagan &amp; P.Morriss</i>	873

Stress-strain behavior and systems of mining of highly weak ores <i>G.M. Babayantz &amp; J.M. Kasikaev</i>	881
Some technical developments and geomechanical difficulties on weak rocks in the field of mining in Japan <i>Yuichi Nishimatsu</i>	885
Geotechnical evaluation of low strength strata beneath coal seam <i>R.W. Stephenson &amp; J.D. Rockaway</i>	891
Drifting in weak rocks in Finnish mines <i>P.S. Särkkä</i>	897
Coal mine roadway stability in massive shale <i>Yoji Ishijima, Shigenori Kinoshita, Masaru Sato &amp; Atsushi Fukushima</i>	903
A study of the stability of roof rocks in coal mines in India <i>R.D. Singh</i>	909
Geotechnical characterization of weak Carboniferous formations of South Portugal <i>F. Mello Mendes, M.G. Barroso &amp; L.M. Ojima</i>	915
Design and stability of tunnels in carboniferous rocks <i>B.N. Whittaker, M.J. White &amp; C.J. Bonsall</i>	921
Tentative design principles for tunnel supports <i>Keiichi Fukushima</i>	927
Tunnel design and construction with NATM in weak rock <i>J. Golser</i>	933
The tunnelling by NATM in heavy squeezing pressure zone, and the study on the ground arch around tunnel – As to construction records of Nabetachiyama tunnel <i>Akira Takano, Shoichi Kitahara, Hisao Kurosawa &amp; Masataka Ueno</i>	939
On the displacement forecasting methods and their application to tunnelling by NATM <i>M. Otsuka &amp; T. Kondoh</i>	945
Study on peripheral behavior of tunnel during tunnelling in soft rock by NATM <i>H. Takasaki &amp; F. Kusumoto</i>	951
On the tunneling control method by creep rate measurement of the face <i>Mamoru Minemoto, Mitsuharu Takada, Hidemi Tokunaga, Shigeru Takenouchi, Kaneo Tobe &amp; Katsumi Horii</i>	957
Results of a tunnel excavation by means of NATM method <i>Kiyoshi Yoshimoto &amp; Yoichi Doi</i>	963
On a shaft excavation method for mudstone at 65 meters under the sea <i>R. Aizawa &amp; S. Naito</i>	969
The stability of surrounding rock and its control of railway tunnel in weak rock <i>Chen Chengzong, Wang Shichun &amp; Chen Guangzong</i>	975
Construction and measurements at the faults of the Seikan undersea tunnel <i>Akira Kitamura, Koji Itabashi &amp; Tomoyasu Sakiyama</i>	981
Tunneling in a weak sandstone <i>E. Gartung</i>	987
The relation between geological properties and squeezing deformation in the excavation of plastic bedrock – In case of Nabetachi-Yama <i>Kensuke Hama &amp; Masayuki Ohtsuka</i>	993
Strengthening of rock with zones containing swelling clay <i>Jan Eurenus &amp; Anders Heiner</i>	999
On the mechanism of swelling rock pressure on tunnels driven through mudstone <i>R. Nakano</i>	1007
Planning of the Washuzan Tunnel <i>K. Kubomura</i>	1013
Tunnelling with yielding support in swelling rocks <i>K. Kovari, F. T. Madsen &amp; Ch. Amstad</i>	1019
The engineering geological investigation and treatment of the failure of Ku-Yin Tunnel of the Northlink railway, Taiwan <i>Shih-chiao Chang</i>	1027
Aseismic design of multiple-layer tunnel linings and shaft walls in weak rock <i>N. S. Bulychev &amp; N. N. Fotiyeva</i>	1033

Tunneling through weathered granite roofed by freezing <i>S. Murayama, K. Ohno, Y. Iwasaki &amp; T. Tamura</i>	1039
Rapid excavation with vacuumed drain method in unconsolidated and saturated ground <i>Yasuhisa Bito &amp; Shuzo Kitagawa</i>	1045
Influence of underground water seepage on the tunnel excavation in a pumice flow plateau <i>T. Yamanouchi, S. Hayashi &amp; M. Toshida</i>	1051
Effects of rock bolting in jointy rocks <i>Satoshi Hibino &amp; Mutsumi Motojima</i>	1057
Research for design of system rock-bolt tunnelling method <i>T. Tsuchiya</i>	1063
The effect of jointed and fissured rock on the performance of tunnel boring machines <i>D. F. Howarth</i>	1069
Machine tunnelling in weak and fractured rock conditions <i>I. M. McFeat-Smith</i>	1075
Relationship between some characteristics of soft rocks and non-blast cutting method <i>S. Sakai, Yuji Nagasaka &amp; Hisaya Fujita</i>	1081
Hydrofracturing techniques applicable to rock excavation <i>Joji Nakamura, Minoru Nakajima &amp; Shigetake Akanuma</i>	1087
The stability of gravity dam on the foundation rock with partially fractured zone <i>Yoshihiro Kitahara &amp; Tadashi Kanagawa</i>	1093
Strengthening foundations of Kadana dam <i>V. N. Kulkarni &amp; C. S. Shah</i>	1099
Constructing a concrete gravity dam on soft rock <i>M. Mizuno, Y. Itobayashi &amp; Y. Ando</i>	1107
Geotechnical aspects of planning, design and construction of the Kamthikheri Dam on Pench river in the Sausar metasedimentary terrain in central India <i>A. R. Patil</i>	1113
Adequate design and construction practice for weak rock, Sondur Dam, India <i>S. Seshadri &amp; A. Nagaraja Rao</i>	1119
An engineering geologic study of argillaceous soft rocks at the Gezhouba Project on the Yangtze River <i>Zeng Zhaomin</i>	1127
Treatment of the fractured zone at Nanakura Dam <i>Yoshimitsu Ichimasu &amp; Chikara Futaesaku</i>	1135
Grouting at the soft rock foundation of Shirakawa Dam <i>Haruyuki Ogoshi &amp; Naoto Oashi</i>	1141
A study of grouting tests at Hitokura Dam <i>K. Takahi &amp; M. Ohtsuki</i>	1147
Investigations of permeability and grouting for soft rock foundation of Izarigawa Dam <i>Hiroshi Tosabayashi, Koji Hojo &amp; Norihisa Matsumoto</i>	1153
Hydraulic engineering of China on weak rock <i>Yu Yunliang</i>	1159
Additional curtain grouting of Kassa Dam after partial filling of reservoir <i>Tadashi Yoshida</i>	1165
Problems associated with tunnelling through high water pressure zone <i>K. Yoshimura &amp; M. Fuchino</i>	1171
<b>5 Dynamics and tectonics on the weak rock</b>	
Engineering aspects of active faults – Relations among geomorphological Active Faults in Land, Tectonic Strain, Epicenters, Dating Methods and Engineering Assessment <i>M. Hayashi</i>	1179
A multi-discipline approach to geotechnical studies in weak rock <i>Aubrey D. Henley &amp; Raymond C. Mason</i>	1187
The method to evaluate the danger of rock-collapse at the slope by vibration measurement <i>Seishi Okuzono, Kikuma Iwatake, Kazuhiko Ikeda &amp; Kishio Sakai</i>	1191
In situ stress measurements in weak rocks <i>Mysore S. Nataraja</i>	1197

Acoustic Emission and Over Coring Methods for measuring tectonic stresses <i>Tadashi Kanagawa, Masao Hayashi &amp; Yoshihiro Kitahara</i>	1205
Creep feature of soft mudstone and growth process of fold <i>T. Uemura</i>	1211
Strength of weathered tuff under irregular dynamic loading conditions <i>Kenji Ishihara &amp; Akira Nagao</i>	1217
Dynamical ground compliance of square foundation on a stiff soil ground <i>Takuji Kobori, Kaoru Kusakabe &amp; Shigeru Setogawa</i>	1223
Evaluation of dynamic properties of rock foundation by cyclic loading test <i>Yoshikazu Fujiwara &amp; Satoshi Hibino</i>	1229
Valley stress relief in flat-lying sedimentary rocks <i>Harry F. Ferguson &amp; James V. Hamel</i>	1235
Evaluation of seismic stability of non-homogeneous soft bed rock <i>T. Okabe, K. Kishi &amp; H. Ohtsuki</i>	1241
Statistical evaluation of stability of faults on the basis of Griffith inclusion model <i>Hitoshi Koide</i>	1245
Case histories of some artificially induced earthquakes/rockbursts in fractured rock terrain <i>S. K. Guha, J. G. Padale &amp; U. A. Kulkarni</i>	1249
Earthquake characteristics at dam foundations <i>Tatsuo Ohmachi</i>	1255
Earthquake ground motion at rocky ground interspersed with thin clay layers <i>Shunzo Okamoto, Choshiro Tamura, Katsuyuki Kato &amp; Tatsuo Mizukoshi</i>	1261
 <b>6 General reports from Japan</b>	
Distribution and engineering properties of weak rocks in Japan <i>Ryuichi Okamoto, Keiji Kojima &amp; Ryunoshin Yoshinaka</i>	1269
Experiences and problems of construction of dams on soft rock foundations in Japan <i>Ryuichi Iida, Ryoki Nakano &amp; Norihisa Matsumoto</i>	1285
The current state of soft rock tunnelling in Japan <i>Working Group on Tunnelling, Committee on Soft Rock Mechanics, JSCE</i>	1293
Recent experience in bridge construction on weak foundation rock in Japan <i>Working Group on Bridge Foundations, Committee on Soft Rock Mechanics, JSCE</i>	1303
Recent development of slope engineering of soft rock in Japan <i>K. Kikuchi, Y. Kitahara, H. Nakamura, S. Tanaka, O. Tsuruta &amp; R. Yoshinaka</i>	1315
