Proceedings of an international symposium held during the XIXth General Assembly of the International Union of Geodesy and Geophysics at Vancouver, British Columbia, Canada, 9-22 August 1987. The symposium was organized by the IAHS International Commissions on Water Resources Systems, and Groundwater; and cosponsored by the International Commission on Irrigation and Drainage, and the Conservation and Protection Service, Environment Canada

IAHS Publication No. 169

Contents

Preface	<i>R.H.Clark</i>	
Préface		

1. THE INTERACTION OF IRRIGATION AND HYDROLOGICAL PROCESSES

Overview	<i>T.H.Anstey</i>	3
Irrigation systems management related to meteorological factors and water resources	<i>Miloš Holý & Zdeněk Kos</i>	5
Impact of uncontrolled urban storm-water inflow on the operation of irrigation main canal systems	<i>David H.Manz & Niranjanie Ratnayake</i>	15
Determination of fundamental design parameters of irrigation and drainage systems by means of mathematical modelling of soil-water regime	<i>Jan Benetin & Andrej Šoltesz</i>	27
The hydrology of irrigation and the impact of irrigation on the hydrologic cycle	<i>Hubert J.Morel-Seytoux, Abdulaziz S.Turbak & Mohamed J.Abdulrazzak</i>	39
Studies on subsurface water potential and quality for irrigation	<i>G.Ranganna, M.R.Gajendragad, C.Naganna, K.M.Gurappa, I.V.Nayak, G.Chandranantha & P.R.M.Rao</i>	49
The numerical analysis of water and solute movement in realistically complex soil profiles	<i>A.A.Curtis</i>	59
Comparison between the groundwater quality in an intermountainous and a coastal plain in Yemen Arab Republic	<i>Hamed A.El-Nakhal</i>	73
Numerical analysis of the effect of periodicity on solute movement during intermittent leaching	<i>K.K.Watson, V.Sardana & M.J.Jones</i>	81
Effect of irrigation methods on groundwater levels in glaciated terrain	<i>G.J.Beke & T.Entz</i>	91
Over-irrigation of paddy fields for the purpose of artificially recharging groundwater in the conjunctive use scheme of the Cho-Shui River basin	<i>Yii-Soong Tsao</i>	99
Effects of irrigation on the chemical balance in the ecological environment of water and soil	<i>Chen Xiang Gui</i>	111

2 IRRIGATION WATER ALLOCATION WITHIN A SYSTEM

Overview	<i>U. Shamir</i>	127
A simulation model to determine benefits from improved crop and water management with rehabilitation of small irrigation schemes	<i>C. David Sellars & Daniel E. Schroeter</i>	129
Tactical operation of rice irrigation systems during water shortages	<i>D. H. Rees</i>	141
Scheduling irrigation based on some climatic indices for crops in Maharashtra of western peninsular India	<i>A. R. Subramaniam & A. Sambasiva Rao</i>	153
Predicting water demands for irrigation	<i>A. G. Kudinov & V. B. Mestechkin</i>	163
Factors affecting crop coefficient when calculating crop evapotranspiration	<i>Moheb Semaika & Abdel Hady Rady</i>	175
The simulation of water requirements for major cereal crops and forecasting long-range irrigation demands in China	<i>Ji Hanyang</i>	185
Optimal utilization of irrigation water in Garufella Catchment in Assam, India	<i>Ranvir Singh, B. Soni & A. K. Changkakoti</i>	195
A hierarchical method for the design of water allocation and water distribution networks based on graph-theory	<i>Yoram Rubin</i>	207
Determination of the necessary volume of the groundwater reservoirs for optimal conjunctive water use for irrigation in an arid region	<i>Nestor R. Correa</i>	221
Experiences with integrated irrigation system optimization analysis	<i>K. Ponnambalam & Barry J. Adams</i>	229
