The comparative sediment processes in channel and overbank

Jung, Kwansue, M.S.

The University of Arizona, 1989

The chapters included in this thesis include a review of previous research regarding the major river systems in the USA. Higher resolution by the 9° block and while the major rivers are discussed, detailed analysis of the Colorado River is presented. This study focuses on the sedimentary characteristics and stratigraphic sequences.

ABSTRACT	11
1. INTRODUCTION AND PROBLEM STATEMENT	12
1.1. Background	12
1.2. Purpose of Study	14
1.3. Scope of Study	14
1.4. Terminology	16
2. THEORETICAL BASIS AND CONCEPTUAL APPROACH	19
2.1. Laursen's Theory of Vertical Suspended Sediment Concentration Distribution	19
2.2. Modification of Laursen's Equation	24
2.3. Comparison of the Two Concentration Distribution Equations	28
3. DERIVATION OF EQUATIONS TO COMPUTE CHANGES OF MEAN SEDIMENT CONCENTRATION IN CHANNEL AND OVERBANK	34
3.1. Modification of the Power Velocity Distribution	34
3.2. Derivation of Equation for Average Sediment Concentration Using Laursen's Concentration Distribution Equation	36
3.3. Derivation of Equation for Mean Sediment Concentration Using the Modified Concentration Distribution Equation	38
3.4. Comparison of Plots of the Two Equations	39
