Two-layer stratified flow analysis of gravity currents and
turbidity currents in lakes, reservoirs, and the ocean

Akiyama, Juichiro, Ph.D.

University of Minnesota, 1987

CONTENTS

	PAGE NO.
ABSTRACT.....	i
ACKNOWLEDGEMENT.....	iii
CONTENTS.....	iv
LIST OF FIGURES.....	vii
LIST OF TABLES.....	xv
LIST OF SYMBOLS.....	xvi
Chapter 1: INTRODUCTION.....	1
Chapter 2: ONSET OF GRAVITY CURRENTS DUE TO INFLOWS OF DENSER WATER.....	11
2.1. : Outline and Summary of Previous Works.....	11
(i) Experimental Conditions	
(ii) Research Approach	
2.2. : General Flow Model.....	20
2.3. : Analysis.....	26
2.3.1: Study Purpose.....	26
2.3.2: Governing Parameters of a Plunging Flow....	27
2.3.3: Governing Equations of a Plunging Flow....	28
2.4. : Plunging Flow in a Non-Diverging (Constant Width) Sloping Channel.....	38
2.4.1: Comparison of Analytical Results (Constant Width) with Data.....	42
(i) Comparison with Laboratory Data	
(ii) Comparison with Field Data	
2.5. : Plunging Flow in a Horizontal-Diverging Channel.....	49
2.5.1: Experiments and Observations.....	52
2.5.2: Experimental Results.....	57
(i) Location of Plunge Line	
(ii) Rate of Initial Dilution	
2.5.3: Comparison between Theory and Experiments.....	67
(i) Comparison between Oil Slicks and Plunge Flows	
(ii) Mixing Plunge Flows.	
2.6. : Conclusions.....	79

Chapter 3:	ENTRAINMENT FUNCTION OF NON-COHESIVE SEDIMENT.....	82
3.1. :	Outline and Review of Previous Works.....	82
3.2. :	Analysis.....	88
3.2.1:	Formulation.....	88
3.2.2:	Entrainment from a Bed of Uniform Material.....	92
3.2.3:	Entrainment from a Bed consisting of a Mixture.....	99
3.3. :	Observation and Discussion.....	102
Chapter 4:	GRADUALLY VARIED EROSION AND DEPOSITIVE TURBIDITY CURRENTS.....	113
4.1. :	Definition and Outline.....	113
4.2. :	Significance of Turbidity Currents in Nature.....	115
4.3. :	Possible Causes of Turbidity Currents.....	116
4.4. :	Type of Turbidity Currents.....	117
4.5. :	Review of Previous Works.....	118
4.5.1:	Theoretical and Semi-Theoretical Investigations.....	118
(i)	Non-Suspension Gravity Currents (Underflows)	
(ii)	Suspension Gravity Currents (Turbidity Currents)	
4.5.2:	Field and Laboratory Experimental Studies.....	122
(i)	Field Studies	
(ii)	Laboratory Studies	
4.6. :	Analysis.....	126
4.6.1:	Background and Important Parameters of the Model.....	126
4.6.2:	Model Assumption.....	128
4.6.3:	Governing Two-Dimensional Equations.....	130
4.6.4:	Vertical Integration of the Governing Equations.....	133
4.6.5:	Summary of I-D (Vertically Integrated) Governing Equations.....	136
4.6.6:	Consideration of Velocity Profile.....	138
4.6.7:	Consideration of the Shear Stress at the Bed.....	146
4.6.8:	Estimation of the Friction Coefficient (C_{b2}) for an Additive Shear Stress (r_{b2})...	150
4.6.9:	Estimation of the Friction Coefficient (C_{b2}) for an Additive Shear Stress (r_{b2})...	153
4.6.10:	Gradually Varied Flow Equations for a Turbidity Current (Constant Width).....	155
4.6.11:	Additional Relationships for the Model....	157
(i)	Evaluation of Sediment Entrainment
