Microfilms
International 300 N. Zeeb Road, Ann Arbor, MI 48106

TABLE OF CONTENTS

<u>Section</u>	<u>Page</u>
ACKNOWLEDGEMENTS	vi
LIST OF TABLES	ix
LIST OF FIGURES	xi
NOTATION	xiii
I. INTRODUCTION	1
1.1 Objectives	5
1.2 Approach	6
II. FUNDAMENTALS OF SOIL EROSION	7
2.1 Rainfall	7
2.2 Runoff	9
2.3 Sediment Transport	11
III. LONG-TERM MODELING OF SOIL EROSION	20
3.1 Introduction	20
3.2 Conditional Probability of Soil Loss Volume for Given Rainfall Volume	22
3.3 Moments of the Distribution	26
3.3.1 The First Central Moment, M_1	28
3.3.2 The Second Central Moment, M_2	29

3.4	Determination of the Expected Soil Loss Volume Solving Eq.46.....	29
3.4.1	Analytical Solution	29
3.4.2	Numerical Solution	33
3.4.3	Determination of second central moment (Solution of Eq.47)	33
3.5	Coefficient of Variation	40
3.6	Expected Values of Soil Loss Volumes When the Rainfall Volume is Unknown	40
3.7	Confidence Interval For Expected Sediment Volume of a Given Return Period	45
IV.	FIELD DATA ANALYSIS	49
4.1	Rainfall Analysis	49
4.2	Runoff Analysis	52
4.3	Soil Loss Analysis	62
4.4	Regression Analysis	63
V.	VALIDATION AND APPLICATIONS	74
5.1	Validation	74
5.2	Application of the Soil loss model to Dohuk Watershed	78
VI.	SUMMARY AND CONCLUSIONS	86
	BIBLIOGRAPHY	90
	APPENDICES A	95
	APPENDICES B	103
	APPENDICES C	110
	APPENDICES D	126
