THE APPLICATION OF SYSTEMS ANALYSIS TO WATER
RESOURCES MANAGEMENT / PERUGIA / 1986

Water Resources Management: Modern Decision Techniques

Edited by

MARCELLO BENEDINI

Water Research Institute, Rome

KODWO ANDAH

WARREDOC, Perugia

RICARDO HARBOE

Ruhr University, Bochum

A.A. BALKEMA / ROTTERDAM / BROOKFIELD / 1992

Table of contents

Introduction	VII
Multicriteria methods for decision making in water resources systems <i>Ricardo Harboe</i>	1
Multiobjective methods for decision making in water resources systems <i>Janusz Kindler</i>	11
A system framework for risk and reliability applied to hydrologic design and operation <i>Lucien Duckstein</i>	29
Interactive multiobjective modeling of discrete decisions in water resources planning <i>Janos J. Bogardi & Agus Adhisetiono Sutanto</i>	59
Model integration for water use, quality and supply <i>P.J. Reynolds, D.M. Tate & A.M. Kassem</i>	73
Water quality aspects in risk and reliability analysis <i>Marcello Benedini</i>	87
Use of linear programming for groundwater resources planning <i>Gb. Cicioni & G. Giuliano</i>	97
Solution of the capacitated expansion sequencing problem by iterative linear programming <i>Mario Rosario Mazzola</i>	109
Application of input-output model to system analysis of urban water use in Beijing <i>Xie Mei, Nie Gueisheng & Jin Xianglan</i>	123

117
Mathematical methods for decision making in water resources systems
Lorenz Kindler

11
Multiobjective methods for decision making in water resources systems
Lorenz Kindler

59
A system framework for risk and reliability applied to hydrologic design and operation
Lorenz Kindler

29
Interactive multiobjective modeling of discrete decisions in water resources planning
Janet A. Bogardi & Agus Abdulkarim Soemarto

73
Model integration for water use, quality and supply
P.L. Reynolds, D. M. Little & A.M. Karim

87
Water quality aspects in risk and reliability analysis
M. Garcia-Berdeal

97
Use of linear programming for groundwater resources planning
G.B. Giloni & G. Giloni

101
Solution of the expansion reducing problem by iterative linear programming
Mario Rosario Mariani

123
Application of input-output model to system analysis of urban water use in Beijing
Xie Mei, Nie Guosheng & Jin Xingyan
