

TECHNICAL ENGINEERING AND DESIGN GUIDES
AS ADAPTED FROM THE
US ARMY CORPS OF ENGINEERS, No. 7

BEARING CAPACITY OF SOILS

USCI
M-GTEC-308

Published by
ASCE Press
American Society of Civil Engineers
345 East 47th Street
New York, New York 10017-2398

TABLE OF CONTENTS

Chapter 1. Introduction

1-1 Purpose and Scope	1
1-2 Definitions	1
1-3 Failure Modes	6
1-4 Factors Influencing Bearing Capacity	8

Chapter 2. Non-Load Related Design Considerations

2-1 General	11
2-2 Earthquake and Dynamic Motion	11
2-3 Frost Action	11
2-4 Subsurface Voids	12
2-5 Expansive and Collapsible Soils	12
2-6 Soil Reinforcement	13
2-7 Heaving Failure in Cuts	15
2-8 Soil Erosion and Seepage	15

Chapter 3. Soil Parameters

3-1 Methodology	17
3-2 Site Investigation	17
3-3 Soil Exploration	22

Chapter 4. Shallow Foundations

4-1 Basic Considerations	26
4-2 Solution of Bearing Capacity	26
4-3 Retaining Walls	36
4-4 In Situ Modeling of Bearing Pressures	36
4-5 Examples	39

Chapter 5. Deep Foundations

5-1 Basic Considerations	47
--------------------------------	----

SECTION I DRILLED SHAFTS

5-2 Vertical Capacity of Single Shafts	49
5-3 Capacity to Resist Uplift and Downdrag	63
5-4 Lateral Load Capacity of Single Shafts	70
5-5 Capacity of Shaft Groups	77

SECTION II DRIVEN PILES

5-6 Effects of Pile Driving	79
-----------------------------------	----

5-7	Vertical Capacity of Single Driven Piles	79
5-8	Lateral Load Capacity of Single Piles	93
5-9	Capacity of Pile Groups	94
Appendix A References		96
Appendix B Bibliography		98
Appendix C Computer Program AXILTR		103
C-1	Organization	103
C-2	Applications	103
C-3	Listing	107
Appendix D Notation		132
Index		139
