

Municipal Storm Water Management

Thomas N. Debo
Andrew J. Reese

LEWIS PUBLISHERS
Boca Raton Ann Arbor London Tokyo

Table Of Contents

Preface	i
Chapter 1 Introduction To Municipal Storm Water Management	1
1.1 An Historical Perspective	1
1.2 Understanding Storm Water Management Problems And Solutions	2
1.3 Institutional And Technical Aspects	5
1.4 The Organization Of The Rest Of The Book	5
Chapter 2 Storm Water Management Programs	7
2.1 The Storm Water Management Program	7
2.2 Functional Perspective Of Storm Water Management	7
2.3 Functions In Storm Water Management	12
2.4 Typical Storm Water Management Problem Areas	13
2.5 Costs And Description Of A Storm Water Program	17
Chapter 3 Public Awareness And Involvement	19
3.1 Introduction	19
3.2 Defining The "Public"	19
3.3 Plan To Include The Public	20
3.4 Public Program Techniques	23
3.5 Volunteer Programs	26
3.6 Dealing With The Media	28
3.7 Risk Communications	30
3.8 Technical Communications	33
References	34
Chapter 4 Storm Water Ordinances And Regulations	35
4.1 Introduction	35
4.2 Legal Basis And Considerations	36
4.3 Municipal Ordinances	40
4.4 Drafting Local Ordinances And Regulations	42
4.5 Flexibility In A Storm Water Management Program	50
4.6 When To Adopt An Ordinance	52
4.7 The Complete Storm Water Management Program	54
4.8 Conclusion	57
References	58
Appendix A - Example Storm Water Management Ordinance	59
Chapter 5 Financing Storm Water Management Programs	79
5.1 Financing Needs Of Storm Water Management Programs	79
5.2 Definition Of A Storm Water Utility	80
5.3 Utility Funding Methods	82
5.4 Storm Water Utility Policy Issues	85

5.5	Typical Costs And Rates	87
5.6	Steps In A Typical Financing Study	87
5.7	Coordinating Financing And Program Needs	91
	References	92
	Appendix A - Financing Storm Water Management Program - Questionnaire	94
Chapter 6	Data Availability And Collection	99
6.1	Overview	99
6.2	Sources And Types Of Data	100
6.3	Major Data Types	103
6.4	Data Acquisition, Survey Information And Field Reviews	107
6.5	Data Evaluation	110
6.6	Precipitation Data Collection	114
6.7	Flow Data Collection - Overview	120
6.8	Flow Data Collection - Devices And Structures	124
6.9	Flow Data Collection - Natural Controls	153
6.10	Flow Data Collection - Tracer Methods	157
6.11	Environmental Data Considerations And Collection	158
	References	172
	Appendix A - Sources Of Data	177
	Appendix B - Field Investigation Form And Check List	180
Chapter 7	Urban Hydrology	183
7.1	Introduction	183
7.2	Concept Definitions	184
7.3	Hydrologic Design Policies	185
7.4	Design Frequency And Risk	187
7.5	Hydrologic Procedure Selection	191
7.6	Calibration	196
7.7	Precipitation And Losses	197
7.8	Rational Method	209
7.9	SCS Hydrologic Methods	219
	References	254
Chapter 8	Storm Drainage Systems	257
8.1	Introduction	257
8.2	Concept Definitions	257
8.3	Pavement Drainage	258
8.4	Storm Water Inlet Overview	263
8.5	Design Frequency And Spread	264
8.6	Gutter Flow Calculations	265
8.7	Grate Inlet Design	271
8.8	Curb Inlet Design	277
8.9	Combination Inlets	283
8.10	Energy Losses In A Pipe System	283
8.11	Storm Drains	286
8.12	Environmental Design Considerations	298
8.13	Computer Programs	302
	References	303

Chapter 9	Design Of Culverts	315
9.1	Introduction	315
9.2	Concept Definitions	316
9.3	Culvert Design Steps And Criteria	317
9.4	Culvert Flow Controls And Equations	329
9.5	Design Procedures	332
9.6	Culvert Design Example	336
9.7	Long Span Culvert	339
9.8	Design Of Improved Inlets	339
9.9	Design Procedures For Beveled-Edged Inlets	343
9.10	Flood Routing And Culvert Design	345
9.11	HYDRAIN Culvert Computer Program	346
	References	347
	Appendix A - Microcomputer Solution - HY8 Culvert Analysis	347
	Appendix B - Critical Depth Figures	358
	Appendix C - Conventional Nomographs	360
	Appendix D - Improved Inlet Figures	367
Chapter 10	Open Channel Design	371
10.1	Introduction	371
10.2	Design Criteria	371
10.3	Hydraulic Terms And Equations	374
10.4	Manning's n Values	378
10.5	Best Hydraulic Section	382
10.6	Uniform Flow Calculations	384
10.7	Critical Flow Calculations	390
10.8	Vegetative Design	392
10.9	Approximate Flood Limits	396
10.10	Uniform Flow - Example Problems	398
10.11	Gradually Varied Flow	400
10.12	Gradually Varied Flow - Example Problems	405
10.13	Hydraulic Jump	407
10.14	Construction And Maintenance Considerations	409
10.15	Stability Of Channels	409
10.16	Channel Bank Protection	429
10.17	Floodplain Management	445
10.18	Environmental Features Of Channel Projects	449
	References	454
Chapter 11	Storage And Detention Facilities	459
11.1	Introduction	459
11.2	Uses And Types Of Storage Facilities	459
11.3	Design Criteria	462
11.4	Safe Dams Act	466
11.5	General Design Procedure For Storage Routing	466
11.6	Outlet Hydraulics	469
11.7	Preliminary Detention Calculations	485

11.8	Routing Calculations	486
11.9	Example Problem	488
11.10	Chainsaw Routing Technique For Spreadsheet Application	491
11.11	Modified Rational Method Detention Design	495
11.12	Hand Routing Method For Small Ponds	500
11.13	Land-Locked Retention	507
11.14	Retention Storage Facilities	509
11.15	Retention Facility Example Problem	509
11.16	Construction And Maintenance Considerations	510
11.17	Protective Treatment	510
	References	513
Chapter 12	Energy Dissipation	515
12.1	Introduction	515
12.2	Recommended Energy Dissipators	515
12.3	Design Criteria	516
12.4	Design Procedure	518
12.5	Local Scourhole Estimation	519
12.6	Riprap Aprons	523
12.7	Riprap Basin Design	527
12.8	Baffled Outlets	534
12.9	Downstream Channel Transitions	537
	References	540
	Appendix A - HY8 Culvert Analysis - Energy Dissipators	541
Chapter 13	Structural Best Management Practices	547
13.1	Introduction	547
13.2	Surface Waters And Mitigation Measures	547
13.3	Estimation Of Pollutant Concentration And Loads	551
13.4	General Effectiveness Of Structural Management Measures	560
13.5	Selection Of Structural Management Measures	561
	References	633
Chapter 14	Storm Water Master Planning	639
14.1	The Role Of Storm Water Master Planning	639
14.2	The Master Planning Process	639
14.3	Holistic Watershed Planning	642
14.4	Computer Model Choice For Master Planning	644
14.5	Typical Master Plan Types	646
14.6	Limitations Of Master Plans	661
	References	662
	Appendix A - Example Multi-objective Master Plan	664
	Appendix B - Non-structural Flood Control Overview	670
Chapter 15	Storm Water Quality Management Plans	673
15.1	Urban Runoff Quality	673
15.2	Water Quality Act Overview	673
15.3	Basic Approach Philosophy	677
15.4	The SWQMP Development Process	680

15.5	Evaluation Of Best Management Practices	685
15.6	BMP Lists For The Four Program Areas	687
15.7	Non-Structural Best Management Practices	699
	References	706
Chapter 16	Documentation	707
16.1	Overview	707
16.2	Purpose Of Documentation	707
16.3	Types Of Documentation	708
16.4	Documenting The Plan Development Process	709
16.5	Documentation Procedures	710
16.6	Storage Requirements	710
16.7	Specific Content Of Documentation Files	711
	References	714
	Appendix A - Documentation Project Check List	714
Chapter 17	Construction	717
17.1	Introduction	717
17.2	Construction Costs	717
17.3	Construction Plans	718
17.4	Preconstruction Conference	720
17.5	Construction Considerations	721
17.6	Hydrologic Considerations	722
17.7	Erosion And Sediment Control Considerations	722
17.8	Culvert Considerations	723
17.9	Bridge Considerations	724
17.10	Open Channel Considerations	726
17.11	Storm Drain Considerations	727
17.12	Temporary Storm Water Management Facilities	727
17.13	As Built Plans	729
	References	730
Chapter 18	Maintenance	731
18.1	Introduction	731
18.2	Developing Municipal Maintenance Programs	733
18.3	Detention Facilities	740
18.4	Storm Drains	743
18.5	Culverts	744
18.6	Bridges	745
18.7	Ditches	746
18.8	Storm Water Inlets	747
18.9	Slope Drains	748
18.10	Wash Checks And Energy Dissipators	748
18.11	Bank Protection	748
18.12	Underdrains	749
18.13	Pavement Edge Drains	749
	References	750
