# Sprayed concrete linings (NATM) for tunnels in soft ground

 Thomas Telford

---

# Contents

<b>1. Introduction</b>	<b>1</b>
<b>2. What is NATM?</b>	<b>3</b>
NATM—philosophy or construction technique?	3
The NATM philosophy	3
NATM construction techniques	4
NATM in rock	4
NATM in soft ground	4
The use of SCL in soft ground	5
Summary	5
<b>3. General experiences of SCL systems</b>	<b>6</b>
Experience in Europe	6
Experience in the Americas	12
Experience in the Far East	13
<b>4. Procurement of SCL tunnels</b>	<b>15</b>
Introduction	15
Risks	15
Risk control specification	16
Risk management	17
<b>5. Design</b>	<b>21</b>
Introduction	21
Applicability	22
Objectives	22
Design management	24
Design concepts	26
Construction considerations	27
Final lining considerations	31
Design criteria	32
Design parameters	34
Design loading—primary support	36
Design loading—final lining	38
Factors of safety	39
Groundwater chemistry	40
Design methodology	40
Methods of analysis for primary support	42

Empirical methods	48
Stagger	49
Settlement prediction	49
Design of final linings	51
In-situ lining enhancement	51
Summary	52
<b>6. Guidelines on construction</b>	<b>53</b>
General (planning and management)	53
Principal geotechnical hazards to tunnelling in soft ground	53
Tunnelling hazards in urban areas	54
Temporary works in tunnels	54
SCL general description	55
Methods of subdividing faces	55
Junctions and multiple tunnel complexes	61
Materials	64
Plant and equipment	68
Preventive maintenance	69
Control of ground movement and monitoring	69
Safety and training	72
Quality management	75
<b>7. A comparison with segmentally lined tunnels</b>	<b>77</b>
<b>8. Conclusions</b>	<b>81</b>
<b>References</b>	<b>84</b>
