## LIST OF CONTENTS

LIST OF FIGURES . . . . .	x
LIST OF TABLES . . . . .	xii
ACKNOWLEDGEMENT . . . . .	xiii
Curriculum Vitae . . . . .	xiv
ABSTRACT . . . . .	xv
GENERAL INTRODUCTION . . . . .	1
Outline of the Present Study . . . . .	1
Organization of the Dissertation . . . . .	3

### PART (I)

#### DYNAMIC ANALYSIS OF DAM-RESERVOIR SYSTEMS

CHAPTER I. HYDRODYNAMIC PRESSURES ON DAMS . . . . .	7
I-1. Introduction . . . . .	7
I-2. Dam-Reservoir System . . . . .	9
I-3. Assumptions . . . . .	9
I-4. Formulation of the Problem . . . . .	9
I-4-1. Differential Formulation . . . . .	11
I-4-2. Variational Formulation . . . . .	13
I-5. Numerical Analysis . . . . .	14
I-5-1. Boundary Solution Technique. . . . .	16
I-5-2. Finite Element Formulation . . . . .	19
I-5-2-1. Finite Element Idealization. . . . .	20

I-5-2-2.	Evaluation of Stiffness Matrix . . . . .	21
I-5-3.	Force Vector . . . . .	21
I-6.	Hydrodynamic Pressure . . . . .	24
I-7.	Results and Discussion . . . . .	24
CHAPTER II. FLUID-STRUCTURE INTERACTION FOR DAM-RESERVOIR		
	SYSTEM . . . . .	28
II-1.	Introduction . . . . .	29
II-2.	Free Vibration Analysis. . . . .	30
II-2-1.	Analytical Solution . . . . .	30
II-2-1-1.	Structural Model of the Dam . . . . .	31
II-2-1-2.	Two-Dimensional Shear Beam Theory . . . . .	31
II-2-1-3.	One-Dimensional Shear Beam Theory . . . . .	34
II-2-1-4.	Solution of the Equation of Motion. . . . .	34
II-2-1-5.	Natural Frequencies and Mode Shapes . . . . .	35
II-2-2.	Numerical Solution. . . . .	36
II-2-2-1.	Two-Dimensional Shear Beam Theory . . . . .	37
II-2-2-2.	One-Dimensional Shear Beam Theory . . . . .	40
II-2-3.	The Eigenvalue Problem . . . . .	43
II-2-4.	Illustrative Numerical Example . . . . .	44
II-3.	Dam-Reservoir Interaction for Concrete Gravity Dams . . . . .	50
II-3-1.	System Under Consideration . . . . .	51
II-3-2.	Hydrodynamic Pressures . . . . .	51
II-3-3.	Formulation of the Added Mass Matrix . . . . .	53
II-3-4.	Illustrative Numerical Example . . . . .	57
II-4.	Dam-Reservoir Interaction for Earth Dams . . . . .	60

II-5. Illustrative Numerical Example . . . . .	64
CHAPTER III. EARTHQUAKE RESPONSE ANALYSIS OF DAMS UNDER	
DIFFERENTIAL GROUND MOTION . . . . .	68
III-1. Introduction . . . . .	68
III-2. Matrix Equation of Motion . . . . .	72
III-3. Effective Force Vector . . . . .	75
III-3-1. Uniform Ground Motion . . . . .	75
III-3-2. Non-Uniform Ground Motion . . . . .	76
III-3-2-1. Variable-amplitude In-phase	
Ground Motion . . . . .	76
III-3-2-1. Phased Ground Motion . . . . .	77
III-4. The Method of Mode Superposition . . . . .	79
III-5. Calculation of Shear Stresses . . . . .	80
III-6. Computer Implementation . . . . .	82
III-7. Illustrative Numerical Example . . . . .	84
REFERENCES . . . . .	99
APPENDIX (1.1). LIST OF SYMBOLS . . . . .	103

PART (II)

FLUID-TANK-FOUNDATION INTERACTION UNDER VERTICAL GROUND EXCITATION

CHAPTER IV. A SIMPLIFIED ANALYSIS OF A SHELL-LIQUID-SOIL	
SYSTEM UNDERGOING VERTICAL VIBRATIONS . . . . .	109
IV-1. Introduction . . . . .	110
IV-2. Tank Geometry and Coordinate System . . . . .	112

IV-3.	Assumptions . . . . .	114
IV-4.	Equations of Motion . . . . .	114
	IV-4-1. Equation of Motion of the Shell . . . . .	114
	IV-4-2. Equation of Motion of Tank Base . . . . .	115
IV-5.	Representation of the Soil . . . . .	115
IV-6.	Hydrodynamic Pressure . . . . .	118
IV-7.	Generalized Equations of Motion . . . . .	120
IV-8.	Solution of the Equations of Motion . . . . .	124
IV-9.	Models Under Consideration . . . . .	126
	IV-9-1. Response of Tank on a Rigid Soil to a Step Function . . . . .	127
	IV-9-2. Earthquake Response of Tanks on a Flexible Foundation Soil . . . . .	128
	IV-9-3. Effect of Soil Parameters on Tank Response .	130
	IV-9-4. Effect of Base Thickness on Tank Response . .	132
	IV-9-5. Effect of Height-to-Radius Ratio on Tank Response . . . . .	132
IV-10.	Frequency-Dependent Solution . . . . .	136
	IV-10-1. Formulation of the Problem . . . . .	136
	IV-10-2. Solution for Tanks on Rigid Foundation Soil	138
	Illustrative Numerical Example . . . . .	139
CHAPTER V. DYNAMIC PROPERTIES OF A SHELL-LIQUID-SOIL SYSTEM		
	UNDERGOING VERTICAL VIBRATIONS . . . . .	149
V-1.	Tank Geometry and Coordinate System . . . . .	149
V-2.	Procedure for Evaluation of the Solution . . . . .	151

V-3.	Stiffness Matrix of Axisymmetric Shell . . . . .	151
V-3-1.	Idealization of the Shell . . . . .	151
V-3-2.	Displacement Functions . . . . .	153
V-3-3.	Relationships between Strains and Nodal Displacements . . . . .	155
V-3-4.	Relationships between Stresses and Nodal Displacements . . . . .	156
V-3-5.	Element Stiffness Matrix . . . . .	158
V-4.	Stiffness Matrix of Base Plate . . . . .	160
V-4-1.	Idealization of the Base Plate . . . . .	160
V-4-2.	Displacement Functions . . . . .	160
V-4-3.	Relationships between Strains and Nodal Displacements . . . . .	163
V-4-4.	Relationships between Stresses and Nodal Displacements . . . . .	163
V-4-5.	Element Stiffness Matrix . . . . .	165
V-5.	Stiffness Matrix of an Axisymmetric Solid Element . . .	166
V-5-1.	Idealization of the Axisymmetric Solid Element	166
V-5-2.	Displacement Functions . . . . .	168
V-5-3.	Relationships between Strains and Nodal Displacements . . . . .	169
V-5-4.	Relationships between Stresses and Nodal Displacements . . . . .	171
V-5-5.	Element Stiffness Matrix . . . . .	172
V-6.	Evaluation of the Shell Mass Matrix . . . . .	172

V-7.	Evaluation of the Base Plate Mass Matrix . . . . .	175
V-8.	Evaluation of the Mass Matrix of Axisymmetric Solid Element . . . . .	176
V-9.	Illustrative Numerical Examples . . . . .	180
V-9-1.	Natural Frequencies of Liquid Storage Tanks .	180
V-9-2.	Natural Frequencies of Rigid Circular Plates .	181
V-9-3.	Natural Frequencies of Circular Plates on Elastic Foundation . . . . .	183
V-9-3-1.	Rigid Circular Plates on Elastic Foundation . . . . .	183
V-9-3-2.	Flexible Circular Plates on Elastic Foundation . . . . .	183
CHAPTER VI. LIQUID EFFECTS IN STORAGE TANKS UNDERGOING VERTICAL EXCITATIONS WITH SOIL-STRUCTURE INTERACTION . . .		188
VI-1.	Tank Geometry and Coordinate System . . . . .	188
VI-2.	Hydrodynamic Pressures . . . . .	189
VI-3.	Formulation of the Added Mass . . . . .	192
VI-4.	Derivation of the Added Mass Matrix . . . . .	193
VI-5.	Formulation of the Added Mass Matrix . . . . .	195
VI-5-1.	The Mass Matrix $[AM_{11}]$ . . . . .	195
VI-5-2.	The Mass Matrix $[AM_{22}]$ . . . . .	197
VI-5-3.	The Coupling Mass Matrix $[AM_{12}]$ . . . . .	200
VI-5-4.	The Coupling Mass Matrix $[AM_{21}]$ . . . . .	202

CHAPTER VII. AXISYMMETRIC FREE VIBRATION ANALYSIS OF

SHELL-LIQUID-SOIL SYSTEM . . . . . 205

VII-1. Types of Vibrational Modes . . . . . 207

VII-2. The Eigenvalue Problem . . . . . 207

VII-3. Computer Implementation . . . . . 208

VII-4. Illustrative Numerical Examples . . . . . 209

VII-5. Tank-Liquid-Foundation Interaction . . . . . 209

VII-6. Effect of Side Length . . . . . 209

VII-7. Effect of Soil Stiffness . . . . . 212

VII-8. Response of Tank-Soil System to Vertical  
Base Excitation . . . . . 212

VII-8-1. Matrix Equation of Motion . . . . . 214

VII-8-2. Effective Force Vector . . . . . 217

VII-8-3. The Method of Mode Superposition . . 217

VII-8-4. Illustrative Numerical Example . . . 218

REFERENCES . . . . . 224
