

PROCEEDINGS OF EUROMECH 156 / MECHANICS OF SEDIMENT TRANSPORT
ISTANBUL / 12-14 JULY 1982

Mechanics of Sediment Transport

Edited by

B.MUTLU SUMER

Technical University of Istanbul

A.MÜLLER

ETH-Hönggerberg, Zürich

A.A.BALKEMA/ROTTERDAM/1983

Table of contents

Preface	IX
1 Flow structure as related to sediment transport	
The influence of boundary layer turbulence on the mechanics of sediment transport <i>A.J. Grass</i>	3
Turbulent structure in an open-channel flow <i>H.O. Anwar & R. Atkins</i>	19
Sediment entrainment by a turbulent spot: A progress report <i>F.K. Browand, D. Oster, D. Plocher & D. McLaughlin</i>	27
Boundary shear stress distributions in open channel and closed conduit flows <i>D.W. Knight, H.S. Patel, J.D. Demetriou & M.E. Hamed</i>	33
Visualization of the mixing layer behind dunes <i>A. Müller & A. Gyr</i>	41
2 Single – particle dynamics	
Resolution of equations governing the saltation motion in the air ($Re_{\text{particles}} < 1$) <i>G. Salaün-Penquer, R. Guillaume & C. Nassar</i>	49
On the relation between size and distance travelled for wind-driven sand grains – Results and discussion of a pilot experiment using coloured sand <i>O. Barndorff-Nielsen, J.L. Jensen & M. Sørensen</i>	55
On the mathematical modeling of aeolian saltation <i>J.L. Jensen & M. Sørensen</i>	65
Forces on a single sediment grain and their dependence on the surrounding flow field <i>P. Hille, E. Magens & W. Tessmer</i>	73
Migration of spherical particles suspended in shear flows <i>F. Feuillebois, A. Lasek & S. Spitz</i>	79
Particle dynamics equations for turbulent suspensions <i>Peter J. Murphy</i>	85
3 Initiation, formation and behaviour of ripples and dunes	
Shape and dimensions of ripples and dunes <i>J. Fredsøe</i>	93
Ripple formation on a bed of fine, cohesionless, granular sediment <i>B.M. Sumer, M. Bakioglu & A. Buhutoğlu</i>	99

Sand wave formation due to irregular bed load motion <i>T.Tsujimoto & H.Nakagawa</i>	109
The formation of dunes in open channel flow on an initially flattened erodible bed <i>B.de Jong</i>	119
Turbulent flow over ripples and their effective roughness <i>K.J.Richards</i>	127
The prediction of bedforms and alluvial roughness <i>L.C.van Rijn</i>	133
The mechanism of sediment transport on bed forms <i>J.C.C.de Ruiter</i>	137
An experimental study of bed-load transport with non-uniform sediment <i>J.S.Ribberink</i>	143
Bedforms in relation to hydraulic roughness and unsteady flow in the Rhine branches (the Netherlands) <i>A.van Urk</i>	151

4 *Transport of sediment in suspension*

Turbulent diffusion of solid particles in open channel flow <i>S.Petković & M.Bouvard</i>	161
Stochastic model for particle movement in turbulent open channel flow <i>W.Bechteler & K.Färber</i>	165
Numerical modelling of sediment transport in open channel flows <i>I.Çelik</i>	173
Improved numerical calculation of sedimentation for different bed-roughness and various turbulence models <i>W.Bechteler & W.Schrimpf</i>	183
Some phenomena associated with hyperconcentrated flow <i>Z.Wan</i>	189

5 *Sediment transport in steep channels*

Flow structure and sediment transport mechanics in steep channels <i>M.Bayazit</i>	197
Initiation of sediment transport in steep channels with coarse bed material <i>J.C.Bathurst, W.H.Graf & H.H.Cao</i>	207
Bedforms and flow resistance in steep gravel-bed channels <i>J.C.Bathurst, W.H.Graf & H.H.Cao</i>	215
First experiences measuring coarse material bedload transport with a magnetic device <i>P.Ergenzinger & S.Custer</i>	223

6 *Other sediment-transport problems*

Longitudinal sorting of grain sizes in alluvial rivers <i>R.Deigaard</i>	231
Degradation of river beds and associated changes in the composition of the sediments <i>R.Bettess</i>	237
Laboratory and insitu bed shear stress measurements <i>H.U.Oebius</i>	243
Transition in oscillatory boundary layers <i>M.Sert</i>	255

Laboratory study of breaker type effect on longshore sand transport <i>E.Özhan</i>	265
Sand ripple motion under combined surface wave and current action <i>M.C.Quick</i>	275
Sediment transport due to waves and currents <i>D.M.McDowell</i>	281
