Contents

Introduction

- Introductory aspects of water jet technology in the construction industry 3
Andreas W. Momber

Modified water jets

- Pulsed jets: Fundamentals and applications 19
M.M. Vijay
- Enhancing waterjetting by use of water soluble additives 41
W.G. Howells

Fragmentation techniques

- Compressed-water cannons for civil engineering 53
J.J. Kollé
- Impulsive hydrodynamic method of breaking rocks and concrete 73
G.A. Atanov
- Directional hydraulic pulse blasting 91
F. Hammelmann & J. Witzel
- On-site abrasive water jet equipment for demolition: Basics and experience 105
A.W. Momber

Pavement and road maintenance

- Pavement rehabilitation using high-pressure abrasive water jets 121
R.S. Mohan & R. Kovacevic
- Application of a brittle erosion model for abrasive waterjet cutting of asphalt concrete 149
J. Zeng & T. Kim

Concrete hydrodemolition

- Hydrodemolition of concrete structures: Basics and field experience 163
S. Hilmersson
- Concrete surface quality and structural conditions after hydrodemolition 177
A. Rechsteiner & R. Wolfseher
- Operational aspects of water jet application in concrete hydrodemolition 189
J. Dinglinger

Soil decontamination and material recycling

- Extraction and washing contaminated soils using high-pressure jet grouting techniques 207
W. Sondermann
- Application of the water jet technology for the 'High-pressure soil washing Process' 217
H.-J. Heimhard
- Jet grouting technique as a high-pressure water jet application in foundation engineering 231
H.-W. Gross & F. Wisinger
- Recycling of building materials using high-pressure water jets: Preliminary experience 245
R. Schneider & A.W. Momber

Rock cutting and comminution applications

- Comminution by waterjets 259
G. Galecki & M. Mazurkiewicz
- Rock quarrying and related mining applications of liquid jets 277
L. M. Hlaváč & L. Sitek
- Waterjet in dimensional stone quarrying 289
R. Ciccu & A. Bortolussi

Building maintenance and sanitation

- High-speed waterjet: A tool for the removal of jointing mortar 309
V. Kauw
- Renovation of steel constructions by a combined waterjetting-waste recycling method 315
B. Kaufmann & A.H. Zielasch
- On-site ultra-high pressure hydroblasting for surface preparation of industrial Structures 325
C. van de Bogaerde & A.W. Momber

In-situ reactors cleaning by ultra-high pressure water jets <i>E.S. Geskin</i>	339
