

DESIGN MANUAL FOR PITCHED SLOPE PROTECTION

A.A. BALKEMA / ROTTERDAM / BROOKFIELD / 1995

CONTENTS

	NOTATION	9
	SUMMARY	16
	GLOSSARY	17
Chapter	1 INTRODUCTION	23
	1.1 General	23
	1.2 The layout of the manual	25
Chapter	2 REVETMENT SYSTEMS	28
Chapter	3 AREAS OF APPLICATION	35
Chapter	4 SPECIFICATIONS FOR REVETMENTS AND SUBLAYERS	37
	4.1 Functional specifications	37
	4.2 Concrete quality	39
	4.3 Construction and maintenance specifications	40
Chapter	5 MATERIALS AND THEIR SPECIFICATIONS	42
	5.1 Introduction	42
	5.2 Cover layers	42
	5.3 Granular filters	49
	5.3.1 General aspects	49
	5.3.2 Description of materials	54
	5.4 Bonded filters	57
	5.5 Washed-in material	59
	5.6 Grouting mortars	61
	5.7 Geotextiles	62
	5.8 Clay	63
	5.9 Sand	67
Chapter	6 EXTERNAL LOADS	68
	6.1 Introduction	68
	6.2 Wind waves	69
	6.2.1 Characterisation of wave fields	69
	6.2.2 Design wave height and period	72
	6.3 Ship waves	84
	6.4 Currents with no waves	88
	6.5 Wave action	90
	6.6 Exceptional loads	91

Chapter	7	DESIGN AND CONSTRUCTION ASPECTS FOR THE STRUCTURE AS A WHOLE	94
	7.1	Introduction	94
	7.2	Wave run-up	94
	7.3	Slope angle	101
	7.4	Berms	101
	7.5	Toe structures	103
	7.6	Upper edge of the revetment	104
	7.7	The shape of the slope below a berm	105
	7.8	Construction aspects	106
	7.8.1	General	106
	7.8.2	Block mattresses	111
Chapter	8	REVETMENT STABILITY	113
	8.1	Introduction	113
	8.2	Description of the physical processes	113
	8.2.1	Failure mechanisms	113
	8.2.2	Loading and strength	117
	8.2.3	Leakage length	120
	8.3	Design criteria	124
	8.4	Revetment design involving wind wave loads	128
	8.4.1	Review of various methods	128
	8.4.2	Preliminary Design Method	130
	8.4.3	The Analytical Design Method	139
	8.5	Design method for ship waves	157
	8.6	Design method for crest revetments	158
	8.6.1	Design for loads due to overtopping flow	158
	8.6.2	Design for wave loads	158
	8.7	Other design aspects	159
	8.7.1	Loads on toe and anchor structures	159
	8.7.2	Blocks laid on clay	162
	8.7.3	Penetration of sand and silt from the foreshore	163
Chapter	9	GEOTECHNICAL ASPECTS OF REVETMENT DESIGN	164
	9.1	Introduction	164
	9.2	Local sliding caused by maximum wave run-down	165
	9.3	Local sliding due to wave impact	172
Chapter	10	TRANSITION STRUCTURES	175
	10.1	Introduction	175
	10.2	Specifications for transition structures	176
	10.2.1	Functional specifications	177

10.2.2	Construction specifications	179	
10.2.3	Management and maintenance specifications	180	
10.3	Examples of transition structures between two types of revetments	181	
10.4	Examples of toe structures	187	
10.5	Structures which limit the extent of damage	192	
10.6	Berms	192	
10.7	Vertical transitions	194	
Chapter	11	DESIGN CONSIDERATIONS	196
Chapter	12	EXAMPLES OF DAMAGE TO PITCHED BLOCK REVETMENTS	204
12.1	Introduction	204	
12.2	A review of damage inventory data	204	
12.3	Damage at transition structures	205	
12.4	Damage case studies	206	
12.5	Repairing damage	213	
Chapter	13	SAFETY CONSIDERATIONS	214
13.1	Introduction	214	
13.2	Stochastic variables	216	
13.3	Allowable failure probability for a revetment	217	
13.4	Residual strength and design procedures	220	
13.4.1	Introduction	220	
13.4.2	Design procedure for structures with a negligible residual strength	222	
13.4.3	Guarantee of sufficient residual strength	224	
13.4.4	Combination of large and small residual strength in one cross-section	225	
13.5	Sensitivity analysis	226	
Chapter	14	CHECKING THE SAFETY OF EXISTING STRUCTURES	228
14.1	Introduction	228	
14.2	Data based on experience	230	
14.3	General checking	231	
14.4	Detailed checking	234	
14.5	Advanced checking	235	
Chapter	15	CALCULATION EXAMPLES	236
15.1	Introduction	236	
15.2	Basic assumptions	236	
15.3	Calculations for the wave loads on the toe of the dike	238	

15.4	Preliminary design and choice of cover layer	240
15.5	Detailed design using the Analytical Design Method	242
15.6	Toe and transition structures	255
Chapter 16	GAPS IN PRESENT KNOWLEDGE	258
	REFERENCES	261
	APPENDICES	265
Appendix A	DEPTH RESTRICTED WAVE HEIGHT	265
Appendix B	CALCULATION OF CREST LEVEL FOR DIFFERENT FORMS OF SLOPE . . .	267
Appendix C	LEAKAGE LENGTH	268
Appendix D	THE RELATIONSHIP BETWEEN IRREGULAR AND REGULAR FAILURE WAVE HEIGHTS	270
Appendix E	MAXIMUM ALLOWABLE CURRENT VELOCITY OVER THE CREST	271
Appendix F	CREST STABILITY WITH OVERTOPPING WAVES	273
Appendix G	THE EFFECT OF TRANSITION STRUCTURES	274
Appendix H	PERMEABILITY OF A COVER LAYER WITH HOLES AND/OR A GEOTEXTILE	280
H1	Introduction	280
H2	Permeability of pitching with holes and/or a geotextile	283
H3	Calculation example	285
Appendix I	BACKGROUND TO THE “RULES OF THUMB” FOR ESTIMATING THE MAXIMUM WAVE HEIGHT IN SHALLOW WATER	292
I1	Significant wave height	293
I2	Wave height with a small percentage exceedance	296
