Preface xiii

Notes on Notation xv

<b>1. Introduction</b>	<i>Jack J. Fritz, Jean François Henry</i>	<b>1.1</b>
1.1	The Promise of Small Hydropower	1.2
1.2	Definition of Small, Mini, and Micro Hydro Projects	1.5
1.3	Historical Perspective	1.7
1.4	World Hydropower Resources	1.10
1.5	Domestic Programs in the United States	1.14
1.6	Selected Developing Country Hydropower Profiles	1.15
1.7	Small Hydropower and Other Sources of Electricity	1.20
1.8	Planning a Small/Mini Hydropower Project	1.24
1.9	References	1.26
<b>2. Hydrologic Analysis</b>	<i>John S. Gladwell, Leroy F. Heitz, Calvin C. Warnick</i>	<b>2.1</b>
2.1	Overview of Analysis Techniques	2.2
2.2	Obtaining and Evaluating Data	2.4

2.3	Indirect Estimation of Flows at a Site	2.13
2.4	Other Hydrologic and Hydraulic Considerations	2.26
2.5	Processing Site Flow Data	2.28
2.6	Presentation of Hydrologic and Hydraulic Data	2.32
2.7	References	2.33
<b>3.</b>	<b>Hydrologic Computations at a Small Hydro Site</b>	
	<i>Norman H. Crawford</i>	<b>3.1</b>
3.1	Introduction	3.1
3.2	Hydrologic Processes	3.2
3.3	Estimating Peak Flow at a Site	3.9
3.4	Estimating the Flow-Duration Curve at a Site	3.17
3.5	Reference	3.27
<b>4.</b>	<b>Site Development and Hydraulic Analysis</b>	<b>4.1</b>
	<i>John J. Cassidy</i>	
4.1	Site Configuration	4.2
4.2	Topographic Surveys	4.7
4.3	Required Geologic Investigations	4.8
4.4	Hydraulic Design and Analysis	4.9
4.5	Turbine Setting	4.28
4.6	Powerhouses	4.29
4.7	Capital Costs of Site Development	4.31
4.8	References	4.32
<b>5.</b>	<b>Dams and Reservoirs</b>	<b>5.1</b>
	<i>John J. Cassidy</i>	
5.1	Types of Dams	5.1
5.2	Earth Dam Design	5.5
5.3	Rockfill Dams	5.19
5.4.	Concrete Dams	5.23
5.5	Masonry Dams	5.27
5.6	Spillway Design	5.28
5.7	Diversion During Construction	5.31
5.8	References	5.32
<b>6.</b>	<b>Hydraulic Turbines</b>	
	<i>Roger E. A. Arndt, Cesar Farell, Joseph M. Wetzel</i>	<b>6.1</b>
6.1	Introduction	6.1
6.2	Historical Perspective	6.2

6.3	Background Material	6.5
6.4	Turbine Technology	6.31
6.5	Hydraulic Structures and Operational Considerations	6.54
6.6	Examples	6.59
6.7	Summary	6.62
6.8	References	6.63
<b>7.</b>	<b>Generation and Electrical Equipment</b> <i>William L. Hughes, R. G. Ramakumar, Dan Lingelbach</i>	<b>7.1</b>
7.1	General Considerations	7.1
7.2	Review of Basic Electricity and the Nature of Alternators and Generators	7.4
7.3	Selection of Electrical Generation Equipment	7.19
7.4	Load Characteristics	7.24
7.5	Determination of Demand	7.27
7.6	Operating Requirements	7.30
7.7	Safety Considerations	7.31
7.8	Bibliography	7.33
<b>8.</b>	<b>Environmental Impact</b> <i>Willis E. Jacobsen</i>	<b>8.1</b>
8.1	Stream Impoundments	8.3
8.2	Spillways and Reservoir Outlets	8.11
8.3	Powerhouses and Electrical Systems	8.13
8.4	Construction or Maintenance	8.13
8.5	Required Permits	8.17
8.6	Cost Implications of Environmental Control Technology	8.18
8.7	Checklist of Environmental Information	8.19
8.8	Environmental Assessment Techniques	8.21
8.9	References	8.23
<b>9.</b>	<b>The Systems of Regulation of Hydroelectric Power in the United States</b> <i>Peter W. Brown</i>	<b>9.1</b>
9.1	Hydropower—A Diverse and Dispersed Resource	9.1
9.2	The Legal, Regulatory, and Institutional Context for Hydropower Development	9.2
9.3	Policies and Trends in American Water Policy and Energy Development	9.23
9.4	References	9.25

<b>10. Institutional and Policy Environment in Developing Countries</b>	<i>Robert F. Ichord Jr., Jack J. Fritz</i>	<b>10.1</b>
10.1	Energy for Rural Development: A New Policy Arena	10.1
10.2	Growing Interest in Mini Hydropower	10.2
10.3	Elite Competition and Government Decision Making	10.4
10.4	Demand for Electricity and the Role of Mini Hydropower	10.4
10.5	Organization and Management	10.6
10.6	Type and Origin of Equipment	10.7
10.7	Pricing and Credit Policies	10.8
10.8	Determining Rural Demand Structure	10.8
10.9	Comparative Case Experiences	10.11
10.10	Conclusions	10.14
10.11	References	10.15
<b>11. Economic and Financial Feasibility</b>	<i>Jack J. Fritz, Jerry W. Knapp, Herschel Jones</i>	<b>11.1</b>
11.1	Background	11.1
11.2	Project Analysis	11.4
11.3	Basic Tools of Economic Analysis	11.7
11.4	Economic Analysis Techniques	11.9
11.5	Financial or Cash Flow Analysis	11.14
11.6	Determining Benefits	11.15
11.7	Determining Costs	11.16
11.8	U.S. Financing	11.19
11.9	Some Case Study Examples	11.19
11.10	Summary	11.29
11.11	References	11.30
<b>12. System Design and Case Studies</b>	<i>Jack J. Fritz</i>	<b>12.1</b>
12.1	Planning a Small Hydropower Project	12.1
12.2	Reconnaissance Studies	12.2
12.3	Feasibility Studies	12.6
12.4	Streamlining the Studies Process in a Developing Country	12.13
12.5	Case Studies	12.16
12.6	Closure	12.74
12.7	References	12.75

<b>Appendix</b>	<b>A.1</b>
Conversion Factors	A.1
Present Worth Factors	A.2
<b>Index follows Appendix</b>	<b>I.1</b>
