VOLUME 1

The International Symposium on Slope Stability Engineering - IS-SHIKOKU'99 was held in Matsuyama, Shikoku, Japan, from November 8 to 11, 1999. The symposium was organized by the International Association of Scientific and Technical Experts on Slope Stability (IASS) and the Japanese Geotechnical Society (JGS).

Using limit equilibrium methods, the stability of slopes is analyzed. The stability of slopes is analyzed using the method of slices. The stability of slopes is analyzed using the method of slices.

The stability of slopes is analyzed using the method of slices. The stability of slopes is analyzed using the method of slices.

The stability of slopes is analyzed using the method of slices. The stability of slopes is analyzed using the method of slices.

Table of contents

Preface	XIII
Organization	XV
<i>Special lecture</i>	
Flow-type failure of slopes based on behavior of anisotropically consolidated sand <i>K. Ishihara, Y. Tsukamoto & S. Nakayama</i>	3
<i>Keynote lectures</i>	
The limit analysis for slopes: Theory, methods and applications <i>Z. Chen</i>	15
Using limit equilibrium concepts in finite element slope stability analysis <i>D.G. Fredlund & R. E.G. Scoular</i>	31
Stability of geosynthetic reinforced steep slopes <i>D. Leshchinsky</i>	49
The mechanisms, causes and remediation of cliff instability on the western coast of the Black Sea <i>M. Popescu</i>	67
Design of slope stabilizing piles <i>H.G. Poulos</i>	83
<i>1 Geological and geotechnical site investigations</i>	
Geoenvironmental factors influencing the deterioration of shale in a rock slope <i>A.M. Elleboudy</i>	103
Weathering mechanism and slope failures of granitic rocks in Southwest Japan – Effect of hydrothermal activities <i>R. Kitagawa</i>	109
Site investigation of weathered expansive mudrock slopes: Implications for slope instability and slope stabilization <i>R.J. Maharaj</i>	115

Investigation of cut slope consisting of serpentinite and schist <i>H. Kitamura, M. Aoki, T. Nishikawa, T. Yamamoto, M. Suzuki & T. Umezaki</i>	121
Using multibeam sonar surveys for submarine landslide investigations <i>J. Locat, J.V. Gardner, H. Lee, L. Mayer, J.E. Hughes Clarke & E. Kammerer</i>	127
Automatic measurement of pore water pressure in the hard-rock slope and the sliding weathered-rock slope – Field survey in mountainous region in Shikoku Island, Japan <i>E. Tamura & S. Matsuka</i>	135
Field measurement of suction in soil and rainfall in Kagoshima Prefecture <i>R. Kitamura, K. Jomoto, K. Yamamoto, T. Terachi, H. Abe & T. Iryo</i>	141
Application of acoustic emission method to Shirasu slope monitoring <i>T. Fujiwara, K. Monma & A. Ishibashi</i>	147
Acoustic emission technique for monitoring soil and rock slope instability <i>A. Kousteni, R. Hill, N. Dixon & J. Kavanagh</i>	151
Hydraulic fracturing as a mechanism of rapid rock mass slides <i>S. Hasegawa & T. Sawada</i>	157
Evolution of ridge-top linear depressions and a disintegration process of mountains <i>K. Mokudai & M. Chigira</i>	163
Geological characteristics of landslides of the soft rock type, Central Japan <i>T. Fujita</i>	169
Study of configuration, scale and distribution of landslides <i>S. Ueno</i>	175
Geodynamics and spatial distribution of properties of sea cliff colluvium <i>E. Dembicki & W. Subotowicz</i>	181
A mineralogical study of the mechanism of landslide in the serpentinite belt <i>K. Yokota, R. Yatabe & N. Yagi</i>	187
Detailed geotechnical study in Modi Khola Hydroelectric Project, Western Nepal <i>V. Dangol & T.R. Paudel</i>	193
Local instability in saturated colluvial slopes in southern Brazil <i>W.A. Lacerda</i>	199
2 Soil slope stability analyses	
A new theory on instability of planar-sliding slope – Stiffness effect instability theory <i>Qin Siqing</i>	207
Ultimate state of a slope at non-linear unsteady creep and damage <i>S.A. Elsoufiev</i>	213
Application of FEM on the basis of elasto-viscoplastic model to landslide problems <i>H. Fujii, S. Nishimura, T. Hori & K. Shimada</i>	219
Coupled excavation analyses of vertical cut and slopes in clay <i>T. Hoshikawa, T. Nakai & Y. Nishi</i>	225

Effects of a deep excavation on a potentially unstable urban hillside in San Marino <i>G. Gottardi, G. Marchi, L. Tonni & F. Bianchi</i>	233
Displacements of a slope in the Euganean Hills induced by quarrying <i>S. Cola & P. Simonini</i>	239
Stability evaluation of sliding failure along thin mudstone deposit due to excavation <i>Y. Nakamura, J. Kojima, S. Hanagata, K. Narita & Y. Ohne</i>	245
Appraisal of Bishop's method of slope stability analysis <i>G.L. Sivakumar Babu & A.C. Bijoy</i>	249
A convenient alternative representation of Taylor's stability chart <i>R. Baker & Y. Tanaka</i>	253
Influence of stress-strain curves on safety factors and inter-slice forces in FEM <i>A. Mochizuki, J. Xiong & M. Mikasa</i>	259
Slope stability analysis considering the deformation of slices <i>Y. Terado, H. Hazarika, T. Yamazaki & H. Hayamizu</i>	265
Slope stability analysis using a spring attached to inter-slice planes <i>K. Kondo & S. Hayashi</i>	271
Three-dimensional stability analysis of locally loaded slopes <i>X.Q. Yang, S.X. He & Z.D. Liu</i>	277
A lower-bound solution of earth pressure of cohesive backfill with inclined slope surface <i>M. Luan, T. Nian, C.F. Lee, K.T. Law, K. Ugai & Q. Yang</i>	281
Shear band formation and propagation in clay slopes <i>L.E. Vallejo</i>	287
Progressive failure analysis of slopes based on a LEM <i>T. Yamagami, M. Taki, J.-C. Jiang & S. Yamabe</i>	293
Progressive failure analysis based on a method of non-vertical slices <i>T. Yamagami, Y.A. Khan & J.-C. Jiang</i>	299
Back analysis of unsaturated shear strength from a circular slope failure <i>J.-C. Jiang, T. Yamagami & Y. Ueta</i>	305
A back analysis of MC-DP model parameters based on FEM and NLSSQP method <i>T.Q. Feng, T. Yamagami & J.-C. Jiang</i>	311
An FE analysis of anisotropic soil slopes and back analysis for its parameters <i>T.Q. Feng, T. Yamagami & J.-C. Jiang</i>	317
3 Rock slope stability analyses	
An upper bound wedge failure analysis method <i>Z.Y. Chen, Y.J. Wang, X.G. Wang & J. Wang</i>	325
Stability analysis of rockfill dam and retaining wall constructed on dip bedrock <i>S.S. Chen & X.S. Fang</i>	329

Soil-water coupling analysis of progressive failure of cut slope using a strain softening model <i>T.Adachi, F.Oka, H.Osaki, H.Fukui & F.Zhang</i>	333
A back analysis in assessing the stability of slopes by means of surface measurements <i>S.Sakurai & T.Nakayama</i>	339
Numerical simulation of excavation of the permanent ship lock in the Three Gorges Project <i>Y.Zhang & K.Yin</i>	345
Numerical simulation of the buckling failure in rock slopes <i>Y.Hu & H.-G.Kempfert</i>	349
Fuzzy-based stability investigation of sliding rock masses <i>N.O.Nawari & R.Liang</i>	355
Stability evaluation of discontinuous rock slope <i>K.Kawamura & M.Nishioka</i>	361
Earthquake and seepage effects on the mobilised shear strength of closely jointed rock <i>M.J.Pender</i>	367
 4 Effects of rainfall and groundwater	
Design chart for cut slope in unsaturated residual soils <i>R.Subramaniam & F.H.Ali</i>	375
Factors affecting on water retention characteristic of soils <i>K.Kawai, D.Karube & H.Seguchi</i>	381
Suction profiles and stability of residual soil slopes <i>E.C.Leong, B.K.Low & H.Rahardjo</i>	387
Effects of perched water table on slope stability in unsaturated soils <i>L.T.Huat, F.H.Ali, S.Mariappan & P.K.Soon</i>	393
Field suction variation with rainfall on cut slope in weathered sedimentary residual soil <i>L.T.Huat, F.H.Ali & S.Mariappan</i>	399
Study of slope stability for Pleistocene cemented sandy sediments in Singapore (Old Alluvium) <i>K.K.Poh, P.B.Ng & K.Orihara</i>	405
Influence of pore water pressures in partly submerged slopes on the critical pool level <i>E.N.Bromhead, A.J.Harris & P.D.J.Watson</i>	411
Role of pore water and air pressures on slope stability in reservoir for pumped storage power plant <i>T.Sato, N.Nishizawa, M.Wakamatsu, Y.Hiraiwa & I.Kumazaki</i>	417
Seepage characteristics of decomposed granite soil slope during rainfall <i>S.Sasaki, S.Araki & K.Nishida</i>	423
Relation between slope stability and groundwater flow caused by rainfalls <i>M.Enoki & A.A.Kokubu</i>	429

Salient aspects of numerical analyses of rainfall induced slope instability <i>C.-H.Wang</i>	435
Centrifuge model tests and stability analysis on mobilizing process of shear strength of decomposed granite soil slope <i>S.Yoshitake & K.Onitsuka</i>	441
Centrifuge tests on slope failure during water infiltration <i>H.G.B.Allersma</i>	447
Reinforcement's effects in the tank-model prediction of slope failures due to rainfalls <i>M.Shimizu</i>	453
Investigation of danger rainfall prediction system for natural and cut slopes <i>H.Miki, A.Fujii & M.Furuta</i>	459
Predicting rainfall-induced slope failures from moisture content measurement <i>M.Nishigaki, A.Tohari & M.Komatsu</i>	465
Analytical study on the slope stability during rainfall and the rainfall indexes <i>A.Togari-Ohta, T.Sugiyama, T.Nara & S.Yamazaki</i>	471
Evaluation of critical rainfall with logit model <i>T.Sugii, K.Yamada & T.Uno</i>	477
Strategy for prevention of natural disaster due to slope failure <i>R.Kitamura, T.Iryo, H.Abe, H.Yakabe & K.Yamamoto</i>	483
Relationships between rainfalls and landslides after forest damages by typhoons <i>S.Murata, H.Shibuya & K.Hayashi</i>	489
Threshold rainfall for Beragala landslide in Sri Lanka <i>A.K.Dissanayake, Y.Sasaki & N.H.Seneviratne</i>	495
The importance of the groundwater regime studies of unstable slopes – An example of investigations on the landslide 'Plavinac', Yugoslavia <i>G.Rasula & M.Rasula</i>	501
Landslides induced by rainstorm in the Poun area of Chungchongbukdo Province <i>D.Han & K.Kim</i>	509
Characteristics of Cretaceous granite slopes that failed during heavy rainfall <i>T.Yamamoto, M.Suzuki, N.Matsumoto & Y.Sebara</i>	515
Seepage analyses of embankments on Tokaido-Shinkansen in long term rainfalls <i>K.Kato & S.Sakajo</i>	521
Instability analyses of embankments on Tokaido-Shinkansen in heavy rainfalls <i>S.Sakajo & K.Kato</i>	527
Chemical effect of groundwater from acid rain on slope evolution <i>Z.Xu & R.Huang</i>	533
Slope failures triggered by an earthquake and a heavy rain in Chiba <i>S.Yasuda, Y.Yoshida, T.Kobayashi & T.Mizunaga</i>	539

Numerical evaluation of the effects of drainage pipes <i>T.Yamagami, K.Nishida & J.-C.Jiang</i>	545
Effects of horizontal drains on ground water level and slope stability <i>F.Cai & K.Ugai</i>	551
5 Effects of seismicity	
Collapse of high embankment in the 1994 far-off Sanriku Earthquake <i>Y.Shioi & S.Sutoh</i>	559
Slope instability of large embankments in residential areas caused by the Hyogoken-Nanbu Earthquake, 1995 <i>T.Kamai, Y.Kobayashi & H.Shuzui</i>	565
Analysis of toppling failure of mountain slope caused by the Hyogoken-Nanbu Earthquake <i>T.Okimura, N.Yoshida & N.Torii</i>	571
Stress condition and consequence of liquefaction on weathered granitic sands <i>Y.Okada, K.Sassa & H.Fukuoka</i>	577
Effects of density, stress state and shear history on sliding-surface liquefaction behavior of sands in ring-shear apparatus <i>G.Wang & K.Sassa</i>	583
Real seismic-wave loading ring-shear test on the Nikawa landslide <i>F.W.Wang, K.Sassa & H.Fukuoka</i>	589
Dynamic properties of fine-grained soils in pre-sheared sliding surfaces <i>M.Yoshimine, R.Kuwano, J.Kuwano & K.Ishihara</i>	595
Dependence of pore pressure generation on frequency of loading at sliding surface <i>D.A.Vankov & K.Sassa</i>	601
On-line earthquake response tests on embankments founded on saturated sandy deposits <i>T.Fujii, M.Hyodo, Y.Nakata, K.Yabuki & S.Kusakabe</i>	607
Dynamic centrifuge tests of embankments on sloped ground and their stability analyses <i>J.Koseki, O.Matsuo, K.Kondo & S.Nishihara</i>	613
Evaluation of liquefaction potential for loose minefill slopes <i>P.Kudella</i>	619
Runout distances of earthquake-induced landslides <i>Y.Kobayashi</i>	625
Evaluation of measured vertical and horizontal residual deformation at crest of rockfill dam under earthquake <i>T.Okamoto</i>	631
Displacements of slopes subjected to seismic loads <i>R.L.Michalowski & L.You</i>	637
Permanent displacement analysis of circular sliding block during shaking <i>H.R.Razaghi, E.Yanagisawa & M.Kazama</i>	641

Dynamic analyses of slopes based on a simple strain-softening model of soil <i>A.Wakai & K.Ugai</i>	647
Slope instability due to rainfall and earthquake <i>K.Shimada, H.Fujii, S.Nishimura, T.Nishiyama & T.Morii</i>	653
Shaking table tests of concrete block retaining walls <i>S.Mori, T.Matsuyama & T.Ushiro</i>	657
Shakedown analysis of soil foundations under varied loads <i>M.Luan, Y.Cao & K.Ugai</i>	663
Author index	669
