

PROCEEDINGS OF THE INTERNATIONAL CONFERENCE CENTRIFUGE 98
TOKYO/JAPAN/23-25 SEPTEMBER 1998

CENTRIFUGE 98

Edited by

T.Kimura

National Institution for Academic Degrees, Japan

O.Kusakabe & J.Takemura

Department of Civil Engineering, Tokyo Institute of Technology, Japan

VOLUME 1

A.A. BALKEMA/ROTTERDAM/BROOKFIELD/1998

Table of contents

Preface	XV
Organisation	XVII
Acknowledgements	XIX
1 <i>Centrifuge facilities</i>	
Development of the geotechnical centrifuge at Case Western Reserve University <i>J.L.Figueroa, A.S.Saada, H.Dief & C.P.Dietz</i>	3
Geotechnical centrifuge facility at Daewoo Institute of Construction Technology <i>J.Park, C.Park, S.Kim, H.Jeong, Y.Kim, S.Kim & Y.Kim</i>	9
Development of a geotechnical centrifuge in Hong Kong <i>C.K.Shen, X.S.Li, C.W.W.Ng, P.A.Van Laak, B.L.Kutter, K.Cappel & R.C.Tauscher</i>	13
Nishimatsu dynamic geotechnical centrifuge facility <i>S.Imamura, T.Hagiwara & T.Nomoto</i>	19
The dynamic geotechnical centrifuge at PWRI <i>O.Matsuo, T.Tsutsumi, K.Kondoh & S.Tamoto</i>	25
A new geoenvironmental centrifuge at Queen's University in Canada <i>R.J.Mitchell</i>	31
Experience with a new drum centrifuge <i>D.P.Stewart, R.S.Boyle & M.F.Randolph</i>	35
Field control testing for clay barriers using a mobile centrifuge <i>R.J.Mitchell</i>	41
2.1 <i>Equipment and instrumentation – For static problems</i>	
Instrumentation for soft soil desiccation testing <i>W.L.Oliveira-Filho & D.Znidarcic</i>	47
Measuring the direction of the acceleration forces <i>A.Bezuijen</i>	51

The use of miniature earth pressure cells in a multi-gravity environment <i>D.Egan & C.M.Merrifield</i>	55
Stress analysis on photoelastic particles in centrifuge tests <i>H.G.B.Allersma</i>	61
Image acquisition using an on-board film camera <i>M.C.R.Davies & A.M.Jones</i>	67
An image analysis system for determining plane and 3-D displacements in soil models <i>R.N.Taylor, S.Robson, R.J.Grant & J.Kuwano</i>	73
The use of CT scans to evaluate soil models <i>G.A.M.Kruse & A.Bezuijen</i>	79
Development of cheap equipment for small centrifuges <i>H.G.B.Allersma</i>	85
A new pile driver and loading set for pile group in centrifuge flight <i>S.-S.Pan, J.-L.Pu, K.-T.Yin & F.-D.Liu</i>	91
On-board remote-controlled centrifuge robot <i>F.Derkx, E.Merliot, J.Garnier & L.M.Cottineau</i>	97
2.2 Equipment and instrumentation – For dynamic problems	
Design of RPI's large servohydraulic centrifuge shaker <i>P.A.Van Laak, K.Adalier, R.Dobry & A.W.Elgamal</i>	105
A new Stored Angular Momentum (SAM) based earthquake actuator <i>S.P.G.Madabhushi, A.N.Schofield & S.Lesley</i>	111
Design of an Equivalent Shear Beam (ESB) container for use on the US Army Centrifuge <i>S.P.G.Madabhushi, G.Butler & A.N.Schofield</i>	117
Duxseal boundary in retaining wall configuration <i>M.M.Dewoolkar, H.Y.Ko, R.Y.S.Pak & A.H.C.Chan</i>	123
Suitability of total stress gages for soil pressure measurements <i>M.M.Dewoolkar, H.Y.Ko & R.Y.S.Pak</i>	129
Signal processing for and analyses of dynamic soil-pile interaction experiments <i>D.W.Wilson, R.W.Boulanger & B.L.Kutter</i>	135
3 Model preparation and in-flight characterisation	
The traveling pluviation apparatus for sand specimen preparation <i>H.-T.Chen, C.-J.Lee & H.-W.Chen</i>	143
A preparation technique for very homogenous sand models and CPT research <i>J.T.van der Poel & F.M.Schenkeveld</i>	149
Guidelines for cone penetration tests in sand <i>M.W.Gui, M.D.Bolton, J.Garnier, J.F.Corte, G.Bagge, J.Laue & R.Renzi</i>	155

Cone penetration modeling in sand for evaluation of earthquake-induced lateral spreading <i>M.K.Sharp, R.Dobry & R.Phillips</i>	161
Torsional vane and plate load tests <i>P.G.Watson & M.F.Randolph</i>	167
Wave velocity analysis in liquefaction model ground <i>K.Hayashi, R.Yoshikawa, K.Ueno & N.Fujii</i>	175
Self-weight consolidation behavior of fluid clay <i>H.Itoh, M.Katagiri, K.Saitoh & M.Terashi</i>	181
4 Similitude and limitations	
Piles subjected to torsion <i>J.Laue & T.Sonntag</i>	187
Some general results from centrifuge and hydraulic gradient simulations of piles <i>A.Zelikson</i>	193
Scale effects of small diameter cylindrical inclusion in sand <i>J.-Ch.Sartoris, P.Chambon & D.König</i>	199
Scale effects in piles and nails loading tests in sand <i>J.Garnier & D.König</i>	205
Scale effect in shaft friction due to the localisation of deformations <i>P.Foray, L.Balachowski & G.Rault</i>	211
Effect of pore fluid viscosity on the cyclic behaviour of sands <i>E.A.Ellis, K.Soga, M.F.Bransby & M.Sato</i>	217
5.1 Earthquake effects – General topics	
Bearing capacity of gravity caisson on cohesive foundation during earthquakes <i>O.Matsuo, T.Sasaki, K.Kondo & K.Nishi</i>	225
Earthquake-induced settlement of soft clay <i>G.L.Fiegel, B.L.Kutter & I.M.Idriss</i>	231
Seismic response of a stacked-drift-type tunnel in dry sand <i>A.Onoue, H.Kazama & H.Hotta</i>	237
Seismic behavior of road embankments <i>H.Hayashi, J.Nishikawa & K.Taniguchi</i>	243
Dynamic behavior of embankments on clayey foundations against strong earthquake <i>T.Sakemi</i>	249
Response of coal-waste tailings dams under simulated earthquake loading <i>X.Zeng, J.Wu & R.A.Rohlf</i>	255

5.2 Earthquake effects – Liquefaction	
Dynamic behaviour of gravel embankments on loose saturated sand foundations <i>L.M.N.Peiris, S.P.G.Madabhushi & A.N.Schofield</i>	263
Earthquake-induced settlement of an isolated footing for power transmission tower <i>K.Kawasaki, T.Sakai, S.Yasuda & M.Satoh</i>	271
Effects of compaction of liquefiable sandy soil surrounding pile foundation <i>J.Koseki, O.Matsuo, K.Kondo & T.Yoshizawa</i>	277
Modeling of a prototype soil-pile-structure system during seismic ground liquefaction <i>Y.Taji, M.Sato & E.Yanagisawa</i>	283
Shaking table test and lateral loading test for pile foundation in saturated sand <i>N.Adachi, Y.Miyamoto & K.Koyamada</i>	289
Behavior of a cylindrical earth retaining wall in liquefiable sand layer <i>T.Matsuda, K.Sato & Y.Goto</i>	295
Reduction of excess pore-water pressure by the gravel drainage method during earthquakes <i>T.F.Yang & H.Y.Ko</i>	301
Metallic-grid and geofabric reinforcement of level ground as a liquefaction countermeasure <i>K.Adalier & A.-W.Elgamal</i>	307
5.3 Earthquake effects – Liquefaction induced soil movement	
Effect of input frequency on the dilative behavior of an infinite slope of loose sand <i>V.M.Taboada, M.Okamura & H.Martinez-Carvajal</i>	315
Seismically induced lateral spreading of two-layer sand deposit and its effect on pile foundations <i>T.Abdoun & R.Dobry</i>	321
Dynamic test on behavior of pile during lateral ground flow <i>H.Satoh, N.Ohbo & K.Yoshizako</i>	325
Experimental studies on the seismic response of a gravity caisson quay wall <i>M.Kamon, M.Mimura, S.Matsuda, S.Nagayama & S.Misaki</i>	333
Deformation of caisson type quay wall during earthquake <i>T.Satoh, K.Tsurugasaki, T.Nagata & M.Miyake</i>	339
Dynamic soil and water pressures on waterfront rigid walls <i>J.-M.Zhang, Y.Shamoto & M.Sato</i>	345
Seismic performance of a caisson type seawall with an armored embankment <i>T.Kawai, M.Kanatani, Y.Tanaka, D.P.Stewart, B.L.Kutter, R.R.Settgast, H.Ishikawa, T.Takeda, S.Higuchi & Y.Goto</i>	351
Dynamic behavior of gravity type quay wall and surrounding soil during earthquake <i>T.Fujiwara, K.Horikoshi & T.Sueoka</i>	359
Stability of piled pier subjected to lateral flow of soils during earthquake <i>A.Takahashi, J.Takemura, Y.Kawaguchi, O.Kusakabe & N.Kawabata</i>	365

Liquefaction-induced damage to caisson-type quay wall and its neighboring pile foundation <i>M.Sato & J.-M.Zhang</i>	371
Pile behavior during seismically-induced lateral spreading of liquefied sand <i>P.Horikoshi, T.Fujiiwara & A.Tateishi</i>	377
Preventing pile-supported structure from lateral ground flow behind sheet pile wall <i>M.Ogasawara, K.Tani, M.Sato & K.Miyata</i>	383
6 Dynamic problems	
Wave-induced liquefaction, densification and re-liquefaction of sand beds <i>S.Sassa & H.Sekiguchi</i>	391
Load-displacement response of jack-up foundation under combined cyclic loading <i>T.G.Ng, F.H.Lee & C.Y.Liau</i>	397
Cyclic load tests on a caisson breakwater placed on sand <i>J.T.van der Poel & M.B.de Groot</i>	403
Settlement of foundation ground subjected to cyclic loading <i>H.Hotta, Y.Shamoto & M.Sato</i>	409
Cyclic behaviour of spread-base integral bridge abutments <i>C.W.W.Ng, S.M.Springman & H.Y.P.Cheng</i>	415
Blast tests on underground structures in saturated sand <i>F.H.Lee, S.H.Goh, T.S.Tan & S.Anand</i>	421
Numerical modelling of wave propagation in centrifuged medium <i>J.F.Semblat, J.J.Brioist & M.P.Luong</i>	427
7 Shallow foundations	
Load-settlement behavior of shallow footings on compressible sand deposits <i>M.Okamura, F.Sahara, J.Takemura & O.Kusakabe</i>	435
Bearing capacity of ring foundations under vertical load <i>F.Zhu, J.I.Clark & R.Phillips</i>	441
Physical modelling of foundations for Confederation Bridge, Canada <i>R.Phillips, K.M.Kosar & D.J.Walter</i>	447
Characteristics of bearing capacity of shallow foundations on soft cohesive ground <i>S.Ohmaki, T.Nishizaki, M.Nagashima & S.Sakurai</i>	453
Bearing capacity of shallow foundations near slopes under complex loads <i>O.Marechal, J.Garnier, Y.Canepa & A.Morbois</i>	459
Lateral response of square embedded foundation in dry sand <i>A.Gadre & R.Dobry</i>	465
Uplift behaviour of pyramid foundations in granular backfill <i>E.A.Dickin & A.J.Birch</i>	471

8.1 Deep foundations – Vertical loading

Axial pile load tests with reaction piles <i>J.Latotzke, D.König & H.L.Jessberger</i>	485
Behaviour of pile subjected to lapses during installation <i>C.F.Leung, N.S.Yet & F.H.Lee</i>	491
Load transfer mechanism of piled raft foundation <i>V.Fioravante</i>	495
Effect of shaft friction developed by centrifuge acceleration on pile loading tests results <i>M.E.B.Rezende, J.Garnier, G.Rault & J.C.A.Cintra</i>	501
Pile down-drag due to surface loading <i>J.Thomas, M.Fahey & R.J.Jewell</i>	507
Negative skin friction on a pile due to excessive groundwater withdrawal <i>C.J.Lee, H.T.Chen & W.H.Wang</i>	513
Dynamic testing of driven piles in dense sand <i>D.Bruno & M.F.Randolph</i>	519

8.2 Deep foundations – Horizontal loading

Lateral resistance behaviour of pile in sandy ground subjected to excavation <i>N.Katakami, K.Saitoh, M.Katagiri, Y.Satoh & S.Furuyama</i>	527
Laterally loaded piles in dense sand: Group effects <i>D.Remaud, J.Garnier & R.Frank</i>	533
Failure mechanism of axially-loaded concrete piles under cyclic lateral loading <i>M.Kimura, T.Adachi, T.Yamanaka & Y.Fukubayashi</i>	539
Installation effects on lateral load-transfer curves in calcareous sands <i>G.J.Dyson & M.F.Randolph</i>	545
Direct measurement of $p-y$ relationships of piles in sand <i>M.Kouda, M.Okamoto, J.Takemura, O.Kusakabe & T.Kimura</i>	551
Centrifuge and numerical modelling of piled bridge abutments on soft clay <i>E.A.Ellis & S.M.Springman</i>	557
Monotonic lateral load transfer from a jack-up platform lattice leg to a soft clay deposit <i>S.M.Springman & A.N.Schofield</i>	563
Investigations of vertical piles under horizontal impact <i>T.Grundhoff, J.Latotzke & J.Laue</i>	569

9 Geo-environment

A study of air flow in air sparging applications <i>C.Marulanda, P.J.Culligan & J.T.Germaine</i>	577
Development and testing of an experimental apparatus for modelling solute transport in partially saturated media <i>J.W.Griffioen & D.A.Barry</i>	583
Migration of zinc through sedimentary soil models <i>S.B.Gurung, M.S.S.Almeida & K.V.Bicalho</i>	589
Infiltration of high viscosity low density DNAPLs in saturated porous media <i>Z.S.Abu-Hassanein, M.F.Riemer & M.Pantazidou</i>	595
A contaminant released in freezing ground <i>S.J.Han, D.J.Goodings, A.Torrents, M.Zeinali & J.Robinson</i>	601
Investigation into DNAPL transport in fractures using capillary tubes <i>L.C.Levy, P.J.Culligan & J.T.Germaine</i>	607

10 Embankments, dams and slopes

Progressive failures of slopes in layered rock masses <i>D.P.Adhikary & A.V.Dyskin</i>	615
Stability of a toppling slope <i>Zhang Jianhong, Chen Zuyu, Wang Xiaogang, Zhao Yuzhi & Han Lianbin</i>	621
CANLEX: Modelling slides due to flow liquefaction <i>R.Phillips & P.M.Byrne</i>	627
Failures of earth dam due to flooding <i>T.Okumura, K.Narita & Y.Ohne</i>	633
Some considerations for simulation of the Pubugou dam and cut off wall <i>W.M.Zhang, J.H.Tang & Z.Y.Cai</i>	637

11 Excavation and retaining structures

Earth pressure acting on a deep circular shaft and associated ground deformation <i>T.Hagiwara, S.Imamura, T.Fujii, T.Nomoto & O.Kusakabe</i>	643
Three-dimensional excavation tests <i>C.K.Loh, T.S.Tan & F.H.Lee</i>	649
Measurement of confining pressure around slurry trenches in sandy ground <i>M.Katagiri, K.Saitoh, T.Masuda, F.Aizawa & K.Ugai</i>	655
Bending moments and subgrade reactions acting on sheet pile walls <i>K.Ueno, Y.Yokoyama & M.Murata</i>	661
Failure mechanism of anchored retaining wall <i>Y.Toyosawa, N.Horii, S.Tamate, N.Suemasa & T.Katada</i>	667

Design procedure for self-supporting earth retaining wall using Deep Mixing Method <i>R.Babasaki, K.Suzuki & T.Nakama</i>	673
Mechanical behavior of crib retaining wall <i>J.Tohda, Y.Mitsutake, T.Nara & S.Ito</i>	679
12 Buried pipes and underground structures	
Physical and finite element analysis of buried flexible pipes <i>M.Javanmard & A.J.Valsangkar</i>	687
Observations of upheaval buckling of buried pipelines <i>M.Moradi & W.H.Craig</i>	693
An experimental investigation into lateral pipeline/soil interaction – Phase II <i>M.J.Paulin, R.Phillips, J.I.Clark & R.Boivin</i>	699
13 Tunnels	
An inflight excavator to model a tunnelling process <i>D.König</i>	707
Settlement trough above a model shield observed in a centrifuge <i>S.Imamura, T.Hagiwara, K.Mito, T.Nomoto & O.Kusakabe</i>	713
Stability conditions of tunnel face in sandy ground <i>H.Mashimo & M.Suzuki</i>	721
A study of stability and failure mechanism of sand around a tunnel <i>XiaoWen Zhou, JiaLiu Pu, KunTing Yin, Chenggang Bao & S.Sakajo</i>	727
Ground deformation around shield tunnel <i>Y.Katoh, M.Miyake & M.Wada</i>	733
Soil movements around parallel tunnels in soft ground <i>B.R.Wu, S.Y.Chiou, C.J.Lee & H.T.Chen</i>	739
Modelling of deformations around tunnels in clay reinforced by soil nails <i>J.Kuwano, R.N.Taylor & R.J.Grant</i>	745
14 Earth reinforcement and anchors	
Modelling vertical geosynthetic reinforcement of soil slopes <i>A.M.R.Jackson & W.H.Craig</i>	753
Aseismic evaluation of steep geogrid-reinforced embankments <i>M.Sato, J.-M.Zhang & Y.Shamoto</i>	761
Interaction between earth pressures against a reinforced retaining wall and tensile forces of reinforcements <i>M.Kawamura & K.Okabayashi</i>	767

Stability of a steep excavation retained by soil nails <i>M.C.R.Davies & A.M.Jones</i>	773
Behavior of a reinforced embankment using Anchor Slope Protection method <i>Y.Sekine, K.Sakamoto, S.Nakahashi, T.Ikeya, L.Li, Y.Otuki & H.Tanaka</i>	779
Marine drag anchor behaviour in clay <i>R.D.Colwill & W.H.Craig</i>	787
The behaviour of drag anchors in layered calcareous soils <i>M.P.O'Neill & M.F.Randolph</i>	793
Plate anchor testing in clay <i>H.K.Law, E.J.Stauffer & H.-Y.Ko</i>	799
Modeling of mooring line in soft clay <i>H.K.Law & H.-Y.Ko</i>	805
15 Ground improvement	
Evaluation of compacted area of heavy tamping by cone point resistance <i>A.Oshima & N.Takada</i>	813
Modelling of low energy dynamic compaction <i>C.M.Merrifield, M.Cruickshank & M.Parvizi</i>	819
Consolidation behavior of composite ground improved by sand compaction piles <i>J.B.Jung, T.Moriwaki, N.Sumioka & O.Kusakabe</i>	825
Behavior of sand compaction piles constructed from copper slag sand <i>M.Kitazume, Y.Shimoda & S.Miyajima</i>	831
Development of an in-flight Sand Compaction Piles (SCPs) installer <i>Y.W.Ng, F.H.Lee & K.Y.Yong</i>	837
Simplification for preparing model in site-specific improvement design studies <i>G.Xu, W.Yuan & J.Ni</i>	845
Study on the behavior of soft ground improved using Deep Mixing Method by low improvement ratio <i>H.Hashizume, Y.Okochi, J.Dong, N.Horii, Y.Toyosawa & S.Tamate</i>	851
Excitation test on the Diagonal Solidification method <i>T.Yoshida, H.Hayashi & T.Yamada</i>	857
Reduction of clay settlement by large closely spaced sand drains <i>Z.A.Al-Khafaji, W.H.Craig & M.Cruickshank</i>	861
16 Cold region problems	
Boulder jacking through seasonal freezing and thawing <i>D.J.Goodings & N.Straub</i>	869
Investigation of sand production mechanisms resulting in enhanced cold production <i>H.H.Vaziri, S.Thallak & R.Phillips</i>	875

17 Miscellaneous topics

Consolidation characteristics of lumpy fill <i>R. Manivannan, J.C. Wong, C.F. Leung & S.A. Tan</i>	889
Case study on the transport behavior of wet iron ore concentrate <i>J. Laue</i>	895
Simulating the overturning of mobile cranes due to penetration of outriggers <i>S.Tamate, N. Horii, Y. Toyosawa, N. Suemasa & Y. Takano</i>	901
Influence range in overburden soils due to bedrock fracture <i>Shouhua Liu, Jincheng Dong & Zhenyin Cai</i>	907
Major scale effects influencing model simulation of neotectonics <i>F.S. Jeng, C.Y. Lu & C.J. Lee</i>	911
Author index	917
