# CONTENTS

Foreword	ix
R. V. THOMANN: Systems analysis in water quality management — a 25 year retrospect	1
V. JOSHI and P. MODAK: A reliability based discrete differential dynamic programming model for river water quality management under financial constraint	15
J. J. BRINKMAN, P. S. GRIFFIOEN, S. GROOT and F. J. LOS: A water quantity and quality model for the evaluation of water management strategies in the Netherlands — application to the province of Friesland	23
T. D. FONTAINE, III and B. M. LESHT: Improving the effectiveness of environmental management decisions with optimization and uncertainty analysis techniques	31
J. W. EHEART: The reduced residence time effect: is the lowest flow the worst flow?	43
E. A. McBEAN: Developing management positions for acidic emission reduction negotiations	51
K. H. RECKHOW: Robust Bayes models of fish response to lake acidifications	61
J. KÄMÄRI and M. POSCH: Regional application of a simple lake acidification model to northern Europe	73
D. C. L. LAM, A. S. FRASER and A. G. BOBBA: Simulation and analysis of watershed acidification	85
B. J. ADAMS and G. ZUKOVŠ: Probabilistic models for combined sewer system rehabilitation analysis	97
B. B. HSIEH: A system approach to analysis of water quality due to transport mechanisms in the water environment	109
C. C. K. LIU: Water quality modeling by a linear system approach	119
G. M. HORNBERGER, B. J. COSBY and R. F. WRIGHT: Analysis of historical surface water acidification in southern Norway using a regionalized conceptual model (MAGIC)	127
M. B. BECK, D. DRUMMOND, F. KLEISSEN, S. LANGAN, H. S. WHEATER and P. G. WHITEHEAD: Surface water acidification: the Birkenes data revisited	133
B. J. COSBY, G. M. HORNBERGER, D. M. WOLOCK and P. F. RYAN: Calibration and coupling of conceptual rainfall-runoff/chemical flux models for long-term simulation of catchment response to acidic deposition	151

M. J. SMALL, P. A. LABIENIEC and M. C. SUTTON: Modelling distributions of aquatic chemistry in regions impacted by acid deposition	161
WU-SENG LUNG: Development of a lake acidification model	173
P. G. WHITEHEAD, R. NEALE and P. PARICOS: Modelling stream acidification in upland Wales	183
J. R. YEARSLEY: The interaction between water quality, environmental legislation, and economics in a hypothetical river basin	195
L. SOMLYÓDY and J. PINTÉR: Optimization models in water quality control	201
A. E. WARN: SIMCAT — a catchment simulation model for planning investment for river quality	211
D. C. GROBLER, J. N. ROSSOUW, P. VAN EEDEN and M. OLIVEIRA: Decision support system for selecting eutrophication control strategies	219
P. E. V. VAN WALSUM and J. DRENT: Decision support system for water management in regions with intense agriculture	231
R. WILLIS, B. A. FINNEY and P. L.-F. LIU: Optimal control of saltwater intrusion: the Yun Lin basin, Taiwan	241
A. J. VALOCCHI and J. W. EHEART: Incorporating parameter uncertainty into groundwater quality management models	251
W. SCHILLING and S. O. PETERSEN: Real time operation of urban drainage systems — validity and sensitivity of optimization techniques	259
Z. VITASOVIC, R. SANDAAS and B. NITZ: Application of systems engineering concepts to combined sewer overflow control at Seattle Metro	271
A. R. BOUCHER and C. S. COX: Problems in modelling and controlling a water clarification process	283
K. A. BOOMAN, L. PALLESEN and P. M. BERTHOUEX: Intervention analysis to estimate phosphorus loading shifts	289
K. J. KEESMAN and G. VAN STRATEN: Modified set theoretic identification of an ill-defined water quality system from poor data	297
L. C. BROWN: Uncertainty analysis in water quality modeling using QUAL2E	309
T. B. HARDY, D. S. BOWLES and K. W. BOSWORTH: Recursive river water quality estimation using abstract evolution equations in functional Sobolev spaces	321
P. J. WITKOWSKI and P. R. JAFFÉ: Kinetic and equilibrium formulations in modelling of hydrophobic organic chemicals in surface and ground waters	333

O. VARIS: Sensitivity of N <sub>2</sub> -fixing blue-green algae in competition for growth prerequisites	339
H. RANGIE and H. H. HAHN: On-line prediction of influent phosphorus load of wastewater treatment plants	343
G. OLSSON: Dynamic modelling, estimation and control of activated sludge systems	349
M. B. BECK, B. A. FINNEY and P. LESSARD: Operational water quality management: a sense of perspective	357
I. M. GRIFFITHS: Automatic water quality monitoring in the River Thames catchment — practical aspects of systems design and utilisation	369
T. O. BARNWELL, JR, L. C. BROWN and R. C. WHITTEMORE: QUAL2E — a case study in water quality modeling software	377
J. R. DA COSTA and D. P. LOUCKS: Water quality management in the Ave River: from research to practice	389
M. P. ANTUNES, M. J. SEIXAS, A. S. CAMARA and M. PINHEIRO: Logic dynamic simulation for water quality management	401
L. FUCHS, D. MULLER and A. NEUMANN: Learning production system for the control of urban sewer systems	411
Z. VITASOVIC and J. F. ANDREWS: A rule-based control system for the activated sludge process	423
Subject index	433
