Wastewater Treatment Plant Design

Student Workbook

Contents

1 Fundamentals	1
Instructional Objectives.	1
Examples	1
Problems	8
2 The Design Process	21
Instructional Objectives.	21
Examples	21
Problems	26
3 Plant Hydraulics	33
Instructional Objectives.	33
Examples	33
Problems	36
4 Preliminary Treatment	57
Instructional Objectives.	57
Examples	57
Problems	62
5 Primary Treatment	67
Instructional Objectives.	67
Examples	67
Problems	72
6 Suspended-Growth Biological Treatment	81
Instructional Objectives.	81
Examples	81
Problems	91
7 Attached-Growth Biological Treatment	95
Instructional Objectives.	95
Examples	95
Problems	99
8 Biological Nutrient Removal	103
Instructional Objectives.	103
Examples	103
Problems	108
9 Alternative Biological Treatment	113
Instructional Objectives.	113
Examples	113
Problems	137

10 Physical–Chemical Processes	143
Instructional Objectives	143
Examples	143
Problems	150
11 Disinfection, Reoxygenation, and Odor Control	157
Instructional Objectives	157
Examples	157
Problems	159
12 Production and Transport of Wastewater Sludge	165
Instructional Objectives	165
Examples	165
Problems	167
13 Sludge Conditioning	173
Instructional Objectives	173
Examples	173
Problems	176
14 Sludge Thickening, Dewatering, and Drying	181
Instructional Objectives	181
Examples	181
Problems	185
15 Sludge Stabilization	191
Instructional Objectives	191
Examples	191
Problems	197
16 Beneficial Use and Ultimate Disposal	207
Instructional Objectives	207
Examples	207
Problems	210
Conversion Factors	213
Glossary	215
