Chapter 1 Soil Sampling and Statistical Procedures

1.1 Introduction A.W. WARRICK AND H.M. VAN ES	1
1.2 Soil Variability H.M. VAN ES	1
1.2.1 Sources and Structure of Variability	1
1.2.1.1 Introduction	1
1.2.1.2 Properties and Processes	2
1.2.1.3 Sources of Variability	3
1.2.1.4 Structure of Variability	4
1.2.2 Variability and Scale	8
1.2.2.1 Scale of Research Domain	8
1.2.2.2 Scale of Observation	9
1.2.3 References	12
1.3 Errors, Variability, and Precision R.R. ALLMARAS AND OSCAR KEMPTHORNE	15
1.3.1 Introduction	15
1.3.2 Classification of Measurement Errors	16
1.3.3 Scientific Validity of Measurements	17
1.3.4 Characterization of Variability	18
1.3.5 Skewed Frequency Distributions	22
1.3.5.1 Impact of Mathematical Distribution on Imprecision	27
1.3.6 Transformations of a Random Variable or Functions of a Random (Explanatory) Variable	28
1.3.7 The Estimation of Precision	29
1.3.8 Precision of Derived Observations	31
1.3.8.1 Case 1: A Single-Valued Function of an Observation	31
1.3.8.2 Case 2: A Number Derived from Measurements of More Than One Attribute on the Same Sample	33
1.3.8.3 Case 3: A Single Function of Numerous Measurements with Same Attribute	34
1.3.9 Error Propagation in Modeling	35
1.3.10 The Roles of Bias and Precision	36
1.3.11 How to Study Errors of Observation	39
1.3.12 Role of Errors of Observation in the Study of Relationships ..	40
1.3.13 A Note on Terminology	41

1.3.14	Statistical Problems and Techniques in General	43
1.3.15	References	43
1.4	Sampling	
	J.J. DE GRUIJTER	45
1.4.1	Designing a Sampling Scheme	45
1.4.1.1	Towards Better Planning	45
1.4.1.2	A Guiding Principle in Designing Sampling Schemes	46
1.4.1.3	Practical Issues	47
1.4.1.4	Scientific Issues	48
1.4.1.5	Statistical Issues	48
1.4.2	Design-Based and Model-Based Approach	50
1.4.3	Design-Based Strategies	52
1.4.3.1	Scope of Design-Based Strategies	53
1.4.3.2	Simple Random Sampling	54
1.4.3.3	Stratified Sampling	58
1.4.3.4	Two-Stage Sampling	60
1.4.3.5	Cluster Sampling	62
1.4.3.6	Systematic Sampling	63
1.4.3.7	Advanced Design-Based Strategies	65
1.4.4	Model-Based Strategies	67
1.4.5	Composite Sampling	70
1.4.6	Sampling in Dimensions Other Than Two-Dimensional Space	71
1.4.6.1	Sampling in Three-Dimensional Space and at Depth	72
1.4.6.2	Sampling in Time	72
1.4.6.3	Sampling in Space-Time	74
1.4.7	References	77
1.5	Geostatistics	
	S.R. YATES AND A.W. WARRICK	81
1.5.1	Introduction	81
1.5.1.1	Geostatistical Investigations	82
1.5.2	Using Geostatistical Methods	83
1.5.2.1	Sampling	83
1.5.2.2	Spatial Autocorrelation	84
1.5.2.3	Geostatistics and Estimation	94
1.5.2.4	Geostatistics and Uncertainty	107
1.5.3	Appendices	114
1.5.3.1	Selected Windows-Based Geostatistical Software	114
1.5.3.2	Simulating Random Fields	115
1.5.4	References	116
1.6	Time and Space Series	
	O. WENDROTH AND D.R. NIELSEN	119
1.6.1	General Information	119
1.6.2	Auto- and Cross-Correlation	119
1.6.3	Spectral Analysis	123
1.6.4	State-Space Analysis	128
1.6.4.1	Autoregressive State-Space Model for Spatial Processes	131

1.6.4.2	State-Space Analysis for Time Series	133
1.6.5	References	136
1.7	Parameter Optimization and Nonlinear Fitting	
	JIRÍ ŠIMŮNEK AND JAN W. HOPMANS	139
1.7.1	Introduction	139
1.7.2	Maximum-Likelihood and Weighted Least-Squares Estimator	140
1.7.3	Methods of Solution	143
1.7.4	Correlation and Confidence Intervals	146
1.7.5	Goodness of Fit	148
1.7.6	Examples and Optimization Programs	149
1.7.7	Discussion	155
1.7.8	References	156
1.8	Newer Application Techniques	
	ALEX. B. McBRATNEY, ALISON N. ANDERSON, R. MURRAY LARK, AND INAKWU O. ODEH	159
1.8.1	Fractal Dimensions	
	A.N. ANDERSON AND A.B. McBRATNEY	159
1.8.1.1	Theory	160
1.8.1.2	Quantifying Soil Structure Using Fractal Geometry	163
1.8.1.3	Applications of Fractal Geometry to Soil Physics	168
1.8.1.4	Characterizing Soil Spatial Variability Using Fractal Geometry	170
1.8.1.5	Future Prospects	171
1.8.2	Fuzzy Sets	
	I.O. ODEH AND A.B. McBRATNEY	171
1.8.2.1	The Concept of Fuzzy Sets	172
1.8.2.2	Some Definitions and Examples Related to Fuzzy Sets	172
1.8.2.3	Fuzzy Models of Soil Physical Processes: Example	178
1.8.2.4	Application to Soil Classification, Mapping, and Land Evaluation	181
1.8.3	Wavelet Analysis	
	R.M. LARK AND A.B. McBRATNEY	184
1.8.3.1	The Continuous Wavelet Transform	187
1.8.3.2	The Discrete Wavelet Transform	189
1.8.3.3	Prospects for Wavelet Analysis	192
1.8.4	References	195
Chapter 2 The Solid Phase		
2.1	Bulk Density and Linear Extensibility	
	R.B. GROSSMAN AND T.G. REINSCH	201
2.1.1	Introduction	201
2.1.1.1	Principles	201
2.1.1.2	Variability	202
2.1.1.3	Application	203
2.1.1.4	Dealing with Rock Fragments	205

2.1.2	Core Method	207
2.1.2.1	Introduction	207
2.1.2.2	Method	207
2.1.2.3	Comments	210
2.1.3	Excavation Method	211
2.1.3.1	Introduction	211
2.1.3.2	Method	211
2.1.3.3	Comments	216
2.1.4	Clod Method	218
2.1.4.1	Introduction	218
2.1.4.2	Equipment and Supplies	218
2.1.4.3	Procedure	219
2.1.4.4	Comments	222
2.1.5	Radiation Methods	222
2.1.5.1	Introduction	222
2.1.5.2	Equipment and Procedures	223
2.1.5.3	Comments	223
2.1.6	Linear Extensibility	223
2.1.6.1	Introduction	223
2.1.6.2	Calculations	224
2.1.6.3	Comments	225
2.1.7	References	225
2.2	Particle Density	
	ALAN L. FLINT AND LORRAINE E. FLINT	229
2.2.1	Introduction	229
2.2.2	Principles	229
2.2.3	Methods	230
2.2.3.1	Calculation from Porosity and Bulk Density	230
2.2.3.2	Liquid Displacement	230
2.2.3.3	Gas Displacement	235
2.2.3.4	Estimation from Constituent Properties	237
2.2.4	Comments	239
2.2.5	References	240
2.3	Porosity	
	LORRAINE E. FLINT AND ALAN L. FLINT	241
2.3.1	Introduction	241
2.3.2	Total Porosity	242
2.3.2.1	Calculation from Particle and Bulk Densities	242
2.3.2.2	Gravimetric Method with Water Saturation	243
2.3.2.3	Volumetric Method with Gas Pycnometry	245
2.3.3	Pore-Size Distribution	246
2.3.3.1	Water-Desorption Method	246
2.3.3.2	Visualization Method Using Impregnation	249
2.3.3.3	Mercury-Porosimetry Method	251
2.3.4	References	253
2.4	Particle-Size Analysis	
	GLENDON W. GEE AND DANI OR	255
2.4.1	Introduction	255

2.4.2	Pretreatment and Dispersion Techniques	257
2.4.2.1	General Principles	257
2.4.2.2	Organic Matter Removal	259
2.4.2.3	Iron Oxide Removal	261
2.4.2.4	Carbonate Removal	262
2.4.2.5	Soluble Salts Removal	262
2.4.2.6	Sample Dispersion	262
2.4.3	Specific Methods of Particle-Size Analysis	264
2.4.3.1	Introduction	264
2.4.3.2	Analysis by Sieving	265
2.4.3.3	Analysis by Gravitational Sedimentation	269
2.4.3.4	Pipette Method	272
2.4.3.5	Hydrometer Method	278
2.4.3.6	Modern Methods for Particle-Size Measurement	283
2.4.4	References	289
2.5	Specific Surface Area	
	K.D. PENNELL	295
2.5.1	Introduction	295
2.5.2	Liquid-Phase Adsorption Methods	298
2.5.2.1	Principles	298
2.5.2.2	Equipment and Supplies	299
2.5.2.3	Experimental Procedure	300
2.5.2.4	Comments	302
2.5.3	Gas-Phase Adsorption Methods	303
2.5.3.1	Principles	303
2.5.3.2	Equipment and Supplies	305
2.5.3.3	Experimental Procedure	306
2.5.3.4	Comments	307
2.5.4	Retention of Polar Liquids	308
2.5.4.1	Principles	308
2.5.4.2	Equipment and Supplies	309
2.5.4.3	Experimental Procedure	309
2.5.4.4	Comments	311
2.5.5	Comparison of Surface Area Methods	312
2.5.6	References	313
2.6	Aggregate Stability and Size Distribution	
	JOHN R. NIMMO AND KIM S. PERKINS	317
2.6.1	Principles	317
2.6.2	Apparatus and Procedures	320
2.6.2.1	General Sample Preparation	320
2.6.2.2	Modifications of Informally Standardized Methods and Apparatus	323
2.6.2.3	Representation of Data	324
2.6.3	Comments	326
2.6.4	References	327
2.7	Shear Strength of Unsaturated Soils	
	D.G. FREDLUND AND S.K. VANAPALLI	329
2.7.1	Introduction	329

2.7.2	Shear Strength Equation for Unsaturated Soils	331
2.7.3	Triaxial Shear Tests for Unsaturated Soils	332
2.7.3.1	Test Procedures for Triaxial Tests	333
2.7.4	Direct Shear Tests for Unsaturated Soils	343
2.7.5	Failure Criteria for Unsaturated Soils	347
2.7.5.1	Strain Rates for Triaxial and Direct Shear Tests	347
2.7.6	Interpretation of Drained Test Results Using Multistage Testing Procedures	349
2.7.7	Nonlinearity of Failure Envelope	351
2.7.8	Interpretation of Undrained Test Results	351
2.7.8.1	Confined Compression Tests	353
2.7.8.2	Unconfined Compression Tests	354
2.7.9	Relationship Between the Soil Water Characteristic Curve and the Shear Strength of Unsaturated Soils	354
2.7.10	Procedure for Predicting the Shear Strength of Unsaturated Soils	357
2.7.11	Summary	360
2.7.12	References	360
2.8	Soil Penetrometers and Penetrability	
	BIRL LOWERY AND JOHN E. MORRISON, JR.	363
2.8.1	Introduction	363
2.8.2	Principles	366
2.8.2.1	Soil Mechanics Associated with Penetrometers	367
2.8.3	Equipment, Software, and Supplies	375
2.8.3.1	Penetrometer Rod or Shaft and Active Element	375
2.8.3.2	Force-Sensing Apparatus	375
2.8.3.3	Depth-Sensing Apparatus	376
2.8.3.4	Structure of Penetrometer	377
2.8.3.5	Data Logging	378
2.8.4	Data Logging Operational Details for Specific Penetrometers	378
2.8.4.1	Pocket Penetrometer	378
2.8.4.2	Cone Penetrometer	379
2.8.4.3	Friction-Sleeve Cone Penetrometer	383
2.8.5	Summary	385
2.8.6	References	385
2.9	Atterberg Limits	
	R.A. McBRIDE	389
2.9.1	Introduction	389
2.9.2	Liquid Limit	390
2.9.2.1	Casagrande Method	391
2.9.2.2	One-Point Casagrande Method	393
2.9.2.3	Drop-Cone Penetrometer Method	394
2.9.3	Plastic Limit	395
2.9.3.1	Casagrande Method	396
2.9.4	References	398
2.10	Soil Compressibility	
	S.C. GUPTA, J.M. BRADFORD, AND A. DRESCHER	399
2.10.1	Introduction	399

2.10.2 Principles.....	400
2.10.3 Methods.....	409
2.10.3.1 Apparatus.....	409
2.10.3.2 Procedure.....	410
2.10.4 Comments.....	413
2.10.5 References.....	414

Chapter 3 The Soil Solution Phase

3.1 Water Content.....	417
3.1.1 General Information	
G. CLARKE TOPP AND P.A. (TY) FERRÉ.....	417
3.1.2 Scope of Methods and Brief Description	
G. CLARKE TOPP AND P.A. (TY) FERRÉ.....	419
3.1.2.1 Thermogravimetric Method Using	
Convective Oven-Drying.....	419
3.1.2.2 Gravimetric Method Using Microwave	
Oven-Drying.....	419
3.1.2.3 Time Domain Reflectometry.....	419
3.1.2.4 Ground Penetrating Radar.....	420
3.1.2.5 Capacitance Devices.....	420
3.1.2.6 Radar Scatterometry or Active Microwave.....	420
3.1.2.7 Passive Microwave.....	420
3.1.2.8 Electromagnetic Induction.....	421
3.1.2.9 Neutron Thermalization.....	421
3.1.2.10 Nuclear Magnetic Resonance.....	421
3.1.2.11 Gamma Ray Attenuation.....	421
3.1.3 Methods for Measurement of Soil Water Content.....	422
3.1.3.1 Thermogravimetric Method Using Convective	
Oven-Drying	
G. CLARKE TOPP AND P.A. (TY) FERRÉ.....	422
3.1.3.2 Gravimetric Method Using Microwave Oven-Drying	
G. CLARKE TOPP AND P.A. (TY) FERRÉ.....	425
3.1.3.3 The Basis of Electromagnetic Methods:	
A Wave Equation Framework.....	428
3.1.3.4 Time Domain Reflectometry	
P.A. (TY) FERRÉ AND G. CLARKE TOPP.....	434
3.1.3.5 Ground Penetrating Radar to Measure	
Soil Water Content	
J.L. DAVIS AND A.P. ANNAN.....	446
3.1.3.6 Capacitance Devices	
JAMES L. STARR AND IOAN C. PALTINEANU.....	463
3.1.3.7 Active Microwave Remote Sensing Methods	
H. MCNAIRN, T.J. PULTZ, AND J.B. BOISVERT.....	475
3.1.3.8 Passive Microwave Remote Sensing Methods	
THOMAS J. JACKSON.....	488

3.1.3.9	Electromagnetic Induction	
	R.G. KACHANOSKI, J.M.H. HENDRICKX, AND E. DE JONG.	497
3.1.3.10	Neutron Thermalization	
	CLIFF HIGNETT AND STEVEN R. EVETT	501
3.1.3.11	Nuclear Magnetic Resonance	
	CAROLINE M. PRESTON	521
3.1.4	References.	534
3.2	Water Potential	547
3.2.1	Piezometry	
	MICHAEL H. YOUNG	547
3.2.1.1	Introduction	547
3.2.1.2	Principles	548
3.2.1.3	Drilling Methods	552
3.2.1.4	Installation	555
3.2.1.5	Monitoring	562
3.2.1.6	Technical Considerations	567
3.2.1.7	References	571
3.2.2	Tensiometry	
	MICHAEL H. YOUNG AND JAMES B. SISSON.	575
3.2.2.1	Introduction	575
3.2.2.2	Soil Water Matric Potential	575
3.2.2.3	Principles	577
3.2.2.4	Essential Components of Tensiometers	579
3.2.2.5	Alternative Types of Tensiometers	586
3.2.2.6	Field and Laboratory Applications	587
3.2.2.7	Field Measurements.	589
3.2.2.8	Laboratory Measurements.	599
3.2.2.9	Interpretation of Tensiometric Readings.	602
3.2.2.10	Gauge Calibration	605
3.2.2.11	References	606
3.2.3	Thermocouple Psychrometry	
	BRIAN J. ANDRASKI AND BRIDGET R. SCANLON.	609
3.2.3.1	Principles	609
3.2.3.2	Equipment	612
3.2.3.3	Procedures	620
3.2.3.4	Comments	637
3.2.3.5	Commercial Sources	638
3.2.3.6	References	639
3.2.4	Miscellaneous Methods for Measuring Matric or Water Potential	
	BRIDGET R. SCANLON, BRIAN J. ANDRASKI, AND JIM BILSKIE	643
3.2.4.1	Introduction	643
3.2.4.2	Heat Dissipation Sensors.	644
3.2.4.3	Electrical Resistance Sensors	654
3.2.4.4	Frequency Domain and Time Domain Matric Potential Sensors	660
3.2.4.5	Electro-Optical Switches.	661

	3.2.4.6	Dew Point Potentiometer	662
	3.2.4.7	Filter Paper Technique	665
	3.2.4.8	Vapor Equilibration	668
	3.2.4.9	References	669
3.3		Water Retention and Storage	671
	3.3.1	Introduction	
		J.H. DANE AND JAN W. HOPMANS	671
	3.3.1.1	References	673
	3.3.2	Laboratory	675
	3.3.2.1	Introduction	
		J.H. DANE AND JAN W. HOPMANS	675
	3.3.2.2	Hanging Water Column	
		J.H. DANE AND JAN W. HOPMANS	680
	3.3.2.3	Pressure Cell	
		J.H. DANE AND JAN W. HOPMANS	684
	3.3.2.4	Pressure Plate Extractor

Chapter 8 Soil Erosion by Water and Tillage

M.J.M. RÖMKENS, SETH M. DABNEY, GERARD GOVERS,
AND J.M. BRADFORD

8.1	Introduction	1621
8.2	Soil Erosion by Water	1621
8.2.1	Soil Erosion Measurements	1622
8.2.1.1	Monitoring Erosion during Natural Storm Events	1622
8.2.1.2	Erosion Measurements during Simulated Rain Storms	1624
8.2.1.3	Experimental Area	1625
8.2.2	Soil Erosion Prediction	1626
8.2.2.1	USLE–RUSLE Relationships	1626
8.2.2.2	Water Erosion Protection Project Soil Erosion Prediction Relationship	1639
8.3	Tillage Erosion	1643
8.3.1	Experimental Measurement of Tillage Erosion Using Tracers	1646
8.3.1.1	Principle	1646
8.3.1.2	Equipment, Software, and Supplies	1648
8.3.1.3	Procedural Steps	1649
8.3.2	Measurement of Tillage Erosion by Volumetric Assessment of Soil Translocation	1654
8.3.2.1	Principle	1654
8.3.2.2	Equipment, Software, and Supplies	1654
8.3.2.3	Procedural Steps	1654
8.3.3	Estimation of Tillage Erosion from Cesium-137 Inventories	1655
8.3.3.1	Principle	1655
8.3.3.2	Equipment, Software, and Supplies	1656
8.3.3.3	Procedural Steps	1657
8.4	References	1660
