# SLOPE STABILITY AND STABILIZATION METHODS

---

Second Edition

**LEE W. ABRAMSON**

Hatch Mott MacDonald  
Millburn, New Jersey

**THOMAS S. LEE**

Parsons, Brinckerhoff, Quade & Douglas  
San Francisco, California

**SUNIL SHARMA**

University of Idaho  
Moscow, Idaho

**GLENN M. BOYCE**

Parsons, Brinckerhoff, Quade & Douglas  
San Francisco, California

A Wiley-Interscience Publication

**JOHN WILEY & SONS, INC.**

## CONTENTS

---

<b>PREFACE</b>	xvii
<b>ACKNOWLEDGMENTS</b>	xix
<b>ABOUT THE AUTHORS</b>	xxi
<b>1 GENERAL SLOPE STABILITY CONCEPTS</b>	<b>1</b>
<i>Lee W. Abramson</i>	
1.1 Introduction / 1	
1.2 Aims of Slope Stability Analysis / 2	
1.3 Natural Slopes / 2	
1.4 Engineered Slopes / 3	
1.4.1 Embankments and Fills / 3	
1.4.2 Cut Slopes / 15	
1.4.3 Landfills / 18	
1.4.4 Retaining Structures / 24	
1.5 Landslides / 25	
1.5.1 Features and Dimensions of Landslides / 25	
1.5.2 Landslide Rates and Types of Movements / 29	
1.6 Factors Contributing to Slope Failures / 33	
1.7 Basic Concepts Applied to Slope Stability / 34	
1.8 Typical Input Data for Slope Stability Analyses / 36	
1.8.1 Geologic Conditions / 36	

- 1.8.2 Site Topography / 36
- 1.8.3 Possible Effects of Proposed Construction / 37
- 1.8.4 Material Properties / 39
- 1.8.5 Shear Strength / 42
- 1.8.6 Groundwater Conditions / 48
- 1.8.7 Seismicity / 49
- 1.9 Subsurface Model and Back-Analysis for Slope Stability Analyses / 51
- 1.10 Conclusions / 53
- References / 53

## 2 ENGINEERING GEOLOGY PRINCIPLES

56

*Thomas S. Lee*

- 2.1 Introduction / 56
- 2.2 Types and Characteristics of Geologic Soil Deposits / 56
  - 2.2.1 Alluvial Deposits / 57
  - 2.2.2 Glacial Deposits / 65
  - 2.2.3 Eolian Deposits / 65
  - 2.2.4 Residual Deposits / 67
  - 2.2.5 Colluvial/Talus Deposits / 69
  - 2.2.6 Marine Deposits / 70
  - 2.2.7 Melanges / 71
  - 2.2.8 Other Types of Deposits / 72
- 2.3 Types and Characteristics of Rocks / 73
  - 2.3.1 Shales / 74
  - 2.3.2 Sandstones / 75
  - 2.3.3 Limestones and Related Carbonate Rocks / 75
  - 2.3.4 Igneous Rocks / 75
  - 2.3.5 Pyrocrastic Volcanic Rocks / 76
  - 2.3.6 Metamorphic Rocks / 76
- 2.4 Geologic Features Associated with Slopes / 76
  - 2.4.1 Soil/Rock Fabric / 77
  - 2.4.2 Geological Structures / 77
  - 2.4.3 Discontinuities / 78
  - 2.4.4 Groundwater / 78
  - 2.4.5 Ground Stresses / 79
  - 2.4.6 Weathering / 79
  - 2.4.7 Preexisting Landslide Activities / 81

- 2.4.8 Clay Mineralogy / 82
- 2.4.9 Seismic Effects / 84
- 2.5 Landslides / 84
  - 2.5.1 Landslide-Prone Occurrences / 85
  - 2.5.2 Fundamentals of Landslides / 93
  - 2.5.3 Useful Clues to Landslide Investigations and Identifications / 95
- References / 99

## 3 GROUNDWATER CONDITIONS

102

*Thomas S. Lee*

- 3.1 Introduction / 102
- 3.2 Review of Groundwater Fundamentals / 103
  - 3.2.1 Movement of Groundwater / 104
  - 3.2.2 Principles of Groundwater Mechanics / 106
- 3.3 Site Conditions / 108
  - 3.3.1 Groundwater Levels / 108
  - 3.3.2 Zones / 108
  - 3.3.3 Aquifers / 111
  - 3.3.4 Aquicludes / 112
  - 3.3.5 Perched Water / 112
  - 3.3.6 Artesian Water / 114
  - 3.3.7 Springs / 114
- 3.4 Types of Groundwater Flow / 115
  - 3.4.1 Runoff / 115
  - 3.4.2 Infiltration / 117
  - 3.4.3 Regional Flow / 118
- 3.5 Fluctuation of Groundwater Levels / 121
  - 3.5.1 Rainfall / 121
  - 3.5.2 Floods / 123
  - 3.5.3 Snowmelt / 124
  - 3.5.4 Sudden Drawdown / 125
- 3.6 Influence of Geological Structures on Groundwater Flows / 125
- 3.7 Pore Pressures / 127
  - 3.7.1 Positive Pore Pressures / 128
  - 3.7.2 Negative Pore Pressures / 131
  - 3.7.3 Measurement of Pore Pressures / 133

- 3.8 Water Levels for Design / 138
  - 3.8.1 General / 138
  - 3.8.2 Wetting Band Approach / 139
- 3.9 Field Identification and Interpretation of Groundwater Conditions / 142
  - 3.9.1 Field Identification of Groundwater Conditions / 142
  - 3.9.2 Interpretation of Groundwater Conditions / 142
- 3.10 Groundwater in Slope Stability Analysis / 144
  - 3.10.1 Developing a Groundwater Model from the Field Data / 144
  - 3.10.2 Groundwater Effects on Slope Stability / 146
  - 3.10.3 Groundwater in Rock / 150
- 3.11 Monitoring of Groundwater Pressures / 151
  - 3.11.1 Piezometers and Observation Wells / 151
  - 3.11.2 Installation of Piezometers / 157
  - 3.11.3 Fluctuating Groundwater Levels / 159
- 3.12 Other Instruments—Rainfall Gages / 159
  - References / 159

#### 4 GEOLOGIC SITE EXPLORATION

162

*Thomas S. Lee*

- 4.1 Introduction / 162
- 4.2 Desk Study / 166
  - 4.2.1 Available Existing Data / 166
  - 4.2.2 Previous Geologic Explorations / 172
  - 4.2.3 Identification of Landslide-Prone Terrains through Topographic Expressions / 173
  - 4.2.4 Air Photos / 175
- 4.3 Field Study / 183
  - 4.3.1 Site Reconnaissance / 183
- 4.4 Exploration Methods / 197
  - 4.4.1 Introduction / 197
  - 4.4.2 Auger Drilling / 198
  - 4.4.3 Rotary Wash Drilling / 200
  - 4.4.4 Limitations of Auger and Rotary Wash Drilling / 203
  - 4.4.5 Sampling in the Ground / 203
  - 4.4.6 Large Boreholes / 204
  - 4.4.7 Test Pits / 205

- 4.5 Testing Methods / 209
  - 4.5.1 In Situ Testing / 209
  - 4.5.2 Geophysical Testing / 223
  - 4.5.3 Downhole Geophysics Logging / 229
  - 4.5.4 Mineralogy Tests / 232
  - 4.5.5 Radiocarbon Dating / 235
- 4.6 Exploration Program Design / 235
  - 4.6.1 Locations and Number of Boreholes / 235
  - 4.6.2 Depth of Boreholes / 237
  - References / 238

#### 5 LABORATORY TESTING AND INTERPRETATION

242

*Sunil Sharma*

- 5.1 Introduction / 242
- 5.2 Effective Stress Concepts / 243
- 5.3 Mohr Circle / 244
- 5.4 Mohr-Coulomb Failure Criterion / 245
  - 5.4.1 Mohr-Coulomb Failure Envelope—Unsaturated Soils / 247
  - 5.4.2 Mohr-Coulomb Envelope in  $p$ - $q$  Space / 249
- 5.5 Effective/Total Stress Analysis / 250
  - 5.5.1 Factors of Safety / 252
- 5.6 Stress Paths / 254
  - 5.6.1 Typical Field Stress Paths / 257
- 5.7 Shear Strength of Soils / 259
  - 5.7.1 Shear Strength of Granular Soils / 260
  - 5.7.2 Shear Strength of Fine-Grained Soils / 260
  - 5.7.3 Stress-Strain Characteristics of Soils / 261
  - 5.7.4 Discrepancies between Field and Laboratory Strengths / 263
  - 5.7.5 Strength Testing / 269
  - 5.7.6 Selection and Preparation of Test Samples / 271
  - 5.7.7 Laboratory Test Conditions / 272
  - 5.7.8 The SHANSEP Method / 274
  - 5.7.9 Triaxial Tests / 276
  - 5.7.10 Direct Shear Test / 283
  - 5.7.11 Direct Simple Shear (DSS) Test / 287
  - 5.7.12 Unsaturated Tests / 288

- 5.8 Pore Pressure Parameters / 291
  - 5.8.1 Skempton's Parameters / 291
  - 5.8.2 Henkel's Parameters / 291
- 5.9 Interpretations of Strength Tests / 293
  - 5.9.1 Triaxial Tests / 293
  - 5.9.2 Direct Shear Tests / 298
  - 5.9.3 Unsaturated Tests / 302
  - 5.9.4 Selection of Design Shear Strengths / 302
- 5.10 Other Properties / 305
  - 5.10.1 Consolidation Tests / 306
  - 5.10.2 Permeability Tests / 306
  - 5.10.3 Compaction Tests / 307
  - 5.10.4 Classification Tests / 308
  - 5.10.5 Interpretations of Classification Tests / 310
  - 5.10.6 Shrink/Swell Potential / 312
  - 5.10.7 Slake Durability / 313
  - 5.10.8 Collapsibility / 314
  - 5.10.9 Dispersivity / 315
  - 5.10.10 Chemical Tests / 316
  - 5.10.11 X-Ray Diffraction Analysis / 318
- 5.11 Quality Control/Quality Assurance / 319
  - References / 321

## 6 SLOPE STABILITY CONCEPTS

329

*Sunil Sharma*

- 6.1 Introduction / 329
- 6.2 Modes of Failure / 330
- 6.3 Factor of Safety Concepts / 332
- 6.4 Pore Water Pressures / 334
  - 6.4.1 Phreatic Surface / 335
  - 6.4.2 Piezometric Surface / 336
  - 6.4.3 Example / 337
  - 6.4.4 Negative Pore Pressures / 339
- 6.5 Block Analysis / 339
  - 6.5.1 Example / 341
- 6.6 Infinite Slope Analysis / 343
  - 6.6.1 Infinite Slopes in Dry Sand / 343
  - 6.6.2 Infinite Slope in  $c-\phi$  Soil with Seepage / 344

- 6.7 Planar Surface Analysis / 345
  - 6.7.1 Planar Surface Example / 348
- 6.8 Circular Surface Analysis / 349
  - 6.8.1 Circular Arc ( $\phi_u = 0$ ) Method / 349
  - 6.8.2  $\phi_u = 0$  Example / 350
  - 6.8.3 Friction Circle Method / 350
  - 6.8.4 Friction Circle Example / 352
- 6.9 Method of Slices / 353
  - 6.9.1 Ordinary Method of Slices (OMS) / 358
  - 6.9.2 Simplified Janbu Method / 360
  - 6.9.3 Simplified Bishop Method / 363
  - 6.9.4 Generalized Limit Equilibrium (GLE) Method / 364
  - 6.9.5 Janbu's Generalized Procedure of Slices (GPS) / 367
  - 6.9.6 Method of Slices—An Example / 370
  - 6.9.7 Control of Negative Effective Stresses / 375
  - 6.9.8 Comparison of Limit Equilibrium Methods / 376
- 6.10 Selection and Use of Limit Equilibrium Methods / 378
  - 6.10.1 Essential First Four Steps / 378
  - 6.10.2 Selection of Analysis Method / 379
  - 6.10.3 Considerations for All Types of Analyses / 380
- 6.11 Design Charts / 380
  - 6.11.1 Historical Background / 381
  - 6.11.2 Stability Charts / 381
- 6.12 Seismic Analysis / 393
  - 6.12.1 Pseudostatic Method / 394
  - 6.12.2 Newmark's Displacement Method / 396
  - 6.12.3 Accelerogram Selection for Newmark's Method / 398
  - 6.12.4 Computed Permanent Displacements / 399
  - 6.12.5 Tolerable Permanent Displacements / 408
- 6.13 Other Factors Affecting Slope Stability Analysis / 409
  - 6.13.1 Effect of Tension Cracks on Stability Analysis / 409
  - 6.13.2 Effects of Vegetation / 410
  - 6.13.3 Foundation Loads on Slopes / 411
- 6.14 Three-Dimensional Analysis / 412
- 6.15 Rock Slope Stability / 413
- 6.16 The Finite Element Method (FEM) / 415
  - 6.16.1 Example of FEM Analysis of Slopes / 416

- 6.17 Computer Analysis / 419
  - 6.17.1 Available Computer Programs / 419
- 6.18 Probabilistic Analysis of Slopes / 420
  - 6.18.1 Sources of Uncertainty / 420
  - 6.18.2 Basic Probability Concepts / 421
  - 6.18.3 Reliability Index / 424
  - 6.18.4 Probabilistic Formulation for Slopes / 427
  - 6.18.5 Probabilistic Analysis of Performance Function / 427
  - 6.18.6 Quantifying Uncertainty / 436
  - 6.18.7 Examples / 438
  - 6.18.8 Summary / 452
  - References / 454

## 7 SLOPE STABILIZATION METHODS 462

*Lee W. Abramson*

- 7.1 Introduction / 462
- 7.2 Unloading / 463
  - 7.2.1 Excavation / 463
  - 7.2.2 Lightweight Fill / 468
- 7.3 Buttressing / 470
  - 7.3.1 Soil and Rock Fill / 474
  - 7.3.2 Counterberms / 474
  - 7.3.3 Shear Keys / 475
  - 7.3.4 Mechanically Stabilized Embankments / 477
  - 7.3.5 Pneurol (Tiresoil) / 480
- 7.4 Drainage / 482
  - 7.4.1 Surface Drainage / 482
  - 7.4.2 Subsurface Drainage / 483
- 7.5 Reinforcement / 497
  - 7.5.1 Soil Nailing / 497
  - 7.5.2 Stone Columns / 507
  - 7.5.3 Reticulated Micropiles / 511
  - 7.5.4 Geosynthetically Reinforced Slopes / 512
- 7.6 Retaining Walls / 520
  - 7.6.1 Gravity and Cantilever Retaining Walls / 523
  - 7.6.2 Driven Piles / 523
  - 7.6.3 Drilled Shaft Walls / 524
  - 7.6.4 Tieback Walls / 524

- 7.7 Vegetation / 530
  - 7.7.1 General Design Considerations / 531
  - 7.7.2 Vegetation Species / 537
  - 7.7.3 Erosion Control Mats and Blankets / 538
  - 7.7.4 Biotechnical Stabilization / 540
- 7.8 Surface Slope Protection / 541
  - 7.8.1 General Design Considerations / 542
  - 7.8.2 Shotcrete / 543
  - 7.8.3 Chunam Plaster / 544
  - 7.8.4 Masonry / 546
  - 7.8.5 Rip-Rap / 546
- 7.9 Soil Hardening / 547
  - 7.9.1 Compacted Soil-Cement Fill / 547
  - 7.9.2 Electro-osmosis / 548
  - 7.9.3 Thermal Treatment / 549
  - 7.9.4 Grouting / 549
  - 7.9.5 Lime Injection / 550
  - 7.9.6 Preconsolidation / 553
- 7.10 Rock Slope Stabilization Methods / 559
  - 7.10.1 Removal of Unstable Rock / 559
  - 7.10.2 Catchment / 562
  - 7.10.3 Flattening of Slope / 565
  - 7.10.4 Buttresses / 565
  - 7.10.5 Surface Protection / 566
  - 7.10.6 Reinforcement / 568
  - 7.10.7 Drainage / 568
  - 7.10.8 Use of Explosives / 571
  - 7.10.9 Rock Slope Stabilization Case Histories / 573
- 7.11 Alternatives to Slope Stabilization / 584
  - 7.11.1 Complete Removal of Slide Zone / 585
  - 7.11.2 Facility Relocation / 585
  - 7.11.3 Bridging / 587
- 7.12 Selection of Stabilization Methods / 587
  - 7.12.1 Goals / 588
  - 7.12.2 Technical Constraints / 588
  - 7.12.3 Site Constraints / 589
  - 7.12.4 Environmental Constraints / 590
  - 7.12.5 Aesthetic Constraints / 590

- 7.12.6 Schedule Constraints / 590
- 7.12.7 Other Constraints / 591
- 7.12.8 Cost / 591
- 7.13 Probable Cost Analysis of Stabilization Alternatives / 591
  - 7.13.1 Introduction / 591
  - 7.13.2 Developing Alternative Schemes / 592
  - 7.13.3 Estimating Outcomes and Probabilities / 592
  - 7.13.4 Determining Probable Costs / 593
- References / 598

## 8 DESIGN, CONSTRUCTION, AND MAINTENANCE 604

*Glenn M. Boyce*

- 8.1 Introduction / 604
- 8.2 Contract Documents / 604
  - 8.2.1 Contract Drawings / 605
  - 8.2.2 Specifications / 606
  - 8.2.3 Geotechnical Design Reports / 606
- 8.3 Inspection during Construction / 607
  - 8.3.1 Inspection Guidelines / 607
  - 8.3.2 Quality Control/Quality Assurance / 608
  - 8.3.3 Instrumentation / 608
  - 8.3.4 Instrumentation Monitoring / 627
- 8.4 Inspection following Construction / 630
  - 8.4.1 Introduction / 630
  - 8.4.2 Frequency of Inspections / 631
  - 8.4.3 Technical Inspections / 632
  - 8.4.4 Engineering Inspections / 632
  - 8.4.5 Inspection Reports / 632
- 8.5 Maintenance / 633
  - 8.5.1 Access / 633
  - 8.5.2 Slope Performance Observations / 633
  - 8.5.3 Instruments / 637
  - 8.5.4 Drainage / 637
  - 8.5.5 Adjacent Utilities / 638
- 8.6 Time Domain Reflectometry (TDR) / 639
  - 8.6.1 Introduction / 639
  - 8.6.2 Mechanics of TDR / 639

- 8.6.3 Advantages and Disadvantages of TDR over Inclinometers / 640
- References / 641

## 9 SHALLOW FAILURES 643

*Thomas S. Lee*

- 9.1 Introduction / 643
- 9.2 Seepage Flow Mechanism due to Infiltration / 644
- 9.3 Mechanism of Rainfall-Induced Landslides / 645
- 9.4 Field Loading Conditions / 647
- 9.5 Correlations between Land Slides and Rainfall / 648
  - 9.5.1 Antecedent Rainfall / 650
- 9.6 Rainfall Thresholds for Prediction of Shallow Failures / 651
- 9.7 Types of Soils, Hydrogeologic, and Geomorphologic Features / 652
  - 9.7.1 Colluvium / 652
  - 9.7.2 Loess / 653
  - 9.7.3 Debris Flows / 655
  - 9.7.4 Residual Soils / 656
  - 9.7.5 Rapid Snowmelt / 657
- 9.8 Effect of Permeability of Surficial Stability / 657
- 9.9 Standard Codes for Shallow Slope Stability / 658
- 9.10 Design Practice for Shallow Slope Stability / 661
  - 9.10.1 Debris Flow Hazard Mitigation / 662
  - 9.10.2 Design of Loess Slopes / 663
- 9.11 Attending Landslide Incidents / 664
- 9.12 Summary / 665
- References / 665

## 10 STABILITY OF LANDFILL SLOPES 669

*Lee W. Abramson*

- 10.1 Unique Nature of Landfills / 669
- 10.2 Typical Landfill Configurations / 669
- 10.3 Landfill Waste Engineering Properties / 675
- 10.4 Geosynthetics in Landfills and Engineering Properties / 679
  - 10.4.1 Geomembranes / 680
  - 10.4.2 Geotextiles / 680

- 10.4.3 Geonets / 680
- 10.4.4 Geogrids / 682
- 10.4.5 Geosynthetic Clay Liners (GCLs) / 684
- 10.4.6 Engineering Properties of Geosynthetics / 685
- 10.4.7 Anchor Trenches / 686
- 10.5 Landfill Construction / 688
- 10.6 Slope Stability Considerations / 692
  - 10.6.1 Excavation Slope Stability / 693
  - 10.6.2 Waste Fill Stability / 696
  - 10.6.3 Cover System Stability / 700
- References / 702

**INDEX**
