Ph.D. Dissertation
CU

THE BEHAVIOUR OF SOILS IN THE SIMPLE-SHEAR APPARATUS

by

E. R. L. COLE

THE BOARD OF GRADUATE STUDIES
APPROVED THIS DISSERTATION
FOR THE Ph. D. DEGREE ON 8 DEC 1967

A Dissertation submitted for the
Degree of Doctor of Philosophy
at
Cambridge University

Downing College

August 1967

Table of Contents

		Page
Summary		
Preface		
Table of Contents		
Chapter 1	Introduction	
1.1	General introduction	1- 1
1.2	Development of the simple-shear apparatus	1- 4
Chapter 2	The simple-shear apparatus Mark 5	
2.1	Description of the apparatus	2- 1
2.2	Soil parameters determined with the apparatus	2- 3
2.3	Critical examination of samples within the apparatus	2- 4
2.3a	Measurement of boundary forces	2- 4
2.3b	Uniformity of stresses	2- 5
2.3c	Measurement of boundary displacements	2- 9
2.3d	Uniformity of strains	2-11
Chapter 3	The design and use of the simple-shear apparatus Mark 6	
3.1	Description of the apparatus	3- 1
3.1a	General description	3- 1
3.1b	Data logging system	3- 2
3.1c	Load cells	3- 3
3.1d	Displacement transducers	3- 7
3.2	Sample preparation	3- 8
3.2a	Review of existing methods	3- 8
3.2b	Hopper design	3-10
3.2c	Surface preparation	3-14
3.2d	Measurement of initial voids ratio	3-14
3.3	Test procedure	3-16
3.4	Determination of stresses and strains	3-18
3.4a	Mohr's circle of stress	3-18
3.4b	Mohr's circle of stress increment	3-20
3.4c	Mohr's circle of strain increment	3-20
3.4d	Total strains	3-20
3.5	Data concerning material tested	3-21
3.5a	Grading	3-21
3.5b	Effect of segregation	3-21
3.5c	Specific Gravity	3-22

		Page
3.6	Influence of speed of testing	3-22
3.7	Uniformity of stresses and strains in the SSA Mk6	3-23
3.7a	Uniformity of stresses	3-23
3.7b	Uniformity of strains	3-27
3.7c	Conclusions	3-30
Chapter 4	Test results for Leighton Buzzard sand in the SSA Mk 6	
4.1	Confined compression tests	4- 1
4.1a	Test results	4- 2
4.1b	Value of K_o in Leighton Buzzard sand	4- 5
4.2	Basic shear tests	4- 6
4.2a	Drained tests	4- 6
4.2b	Undrained tests	4-13
4.2c	Effect of state path on the stress-strain behaviour	4-14
4.2d	Shear strain contours	4-15
4.3	Large shear strain tests	4-16
4.3a	The behaviour of sand at large shear strains	4-16
4.3b	Stress ratios at the critical state	4-20
Chapter 5	The application of the theory of plasticity to sands	
5.1	The yield locus	5- 2
5.2	Normality	5- 6
5.3	Elastic and Plastic strains	5- 9
5.4	Orientation of the principal axes in the SSA Mk6	5-14
5.4a	Orientation of the principal axes of stress, of stress increment and of strain increment	5-14
5.4b	Interpretation of shear tests in the SSA and similar apparatus	5-19
5.5	Flow rules	5-23
Chapter 6	Concluding remarks	
	References	
Appendix A	The effect of the weight of the end flaps on the forces applied to the top of the sample.	
Appendix B	Statistical fitting of the Mohr's circle of stress for the centre third of the sample.
