Contents

Preface	xi
1 Introduction	1
1.1 Offshore Pipeline Design Considerations	6
1.2 Buckling and Collapse of Structures	8
1.3 Buckle Propagation in Offshore Pipelines	12
2 Offshore Facilities and Pipeline Installation Methods	15
2.1 Offshore Platforms and Related Production Systems	16
2.1.1 Fixed Platforms	16
2.1.2 Floating and Tethered Platforms	22
2.2 Offshore Pipeline Installation Methods	34
2.2.1 S-Lay	34
2.2.2 J-Lay	38
2.2.3 Reeling	43
2.2.4 Towing	48
2.3 The Mardi Gras Project	52
3 Pipe and Tube Manufacturing Processes	59
3.1 Steelmaking for Line Pipe	60
3.1.1 Strengthening of Steel	60
3.2 Plate Production	63
3.2.1 Steelmaking	64
3.2.2 Vertical Continuous Casting of Slabs	64
3.2.3 Plate Rolling	65
3.3 Seamless Pipe	70
3.3.1 Continuous Casting of Round Billets	70
3.3.2 Plug Mill	72
3.3.3 Mandrel Mill	74
3.3.4 Pilger Mill	76
3.4 Electric Resistance Welded Pipe	78
3.5 Spiral Weld Pipe	80
3.6 UOE Pipe Manufacture	81
3.7 JCO Forming	86

4	Buckling and Collapse Under External Pressure	89
4.1	Elastic Buckling	89
4.1.1	Imperfect Pipe	92
4.2	Plastic Buckling	94
4.2.1	Lateral Pressure	96
4.2.2	Hydrostatic Pressure	97
4.2.3	Pressure with Zero Axial Strain	97
4.3	Nonlinear Formulation	99
4.3.1	Kinematics	100
4.3.2	Constitutive Behavior	100
4.3.3	Principle of Virtual Work	101
4.3.4	Examples	102
4.4	Factors Affecting Pipe Collapse	104
4.4.1	Collapse Pressure Experiments	104
4.4.2	Prediction of Collapse Pressures	106
4.4.3	Effect of Initial Ovality	108
4.4.4	Type of Pressure Loading	111
4.4.5	Wall Thickness Variations	112
4.4.6	Effect of Material Stress-Strain Response	114
4.4.7	Residual Stresses	115
4.4.8	Anisotropic Yielding	115
4.4.9	An Approximate Estimate of Collapse Pressure	117
4.5	Representative Seamless Pipe Imperfections	118
4.5.1	Imperfection Scanning System	118
4.5.2	Data Reduction	119
4.5.3	Four Examples	121
4.6	Conclusions and Design Recommendations	128
5	Collapse of UOE Pipe Under External Pressure	131
5.1	Collapse Pressure of UOE Pipe	131
5.2	Prediction of Collapse Pressure of UOE Pipe	136
5.3	Improvement of Compressive Properties by Heat Treatment of the Pipe	137
5.4	One-Dimensional Model of UOE Pipe Forming	140
5.5	Two-Dimensional Models of UOE/UOC	144
5.5.1	UOE/UOC Forming Steps	144
5.5.2	Numerical Simulation	147
5.5.3	An Example of UOE Forming	148
5.5.4	Parametric Study-Optimization of UOE/UOC	155
5.6	Conclusions and Recommendations	161
6	Collapse of Dented Pipes Under External Pressure	164
6.1	Dent Characteristics	164
6.2	Denting and Collapse Experiments	165
6.2.1	Indentation	165
6.2.2	Collapse Experiments	168

6.3	Modeling of Denting and Collapse	170
6.3.1	Prediction of Collapse Pressure of Dented Tubes	171
6.4	Universal Collapse Resistance Curves for Dented Pipes	175
6.4.1	Localization of Collapse Under External Pressure	175
6.4.2	The Universal Collapse Resistance Curve	177
6.5	Conclusions and Recommendations	180
7	Buckling and Collapse Under Combined External Pressure and Tension	181
7.1	Elastic Buckling	183
7.2	Plastic Buckling	185
7.3	Nonlinear Formulation	186
7.3.1	Examples	187
7.4	Collapse Under External Pressure and Tension	188
7.4.1	Experimental Results and Numerical Predictions	190
7.5	Additional Parametric Study	192
7.6	Conclusions and Recommendations	194
8	Inelastic Response, Buckling and Collapse Under Pure Bending	196
8.1	Features of Inelastic Bending	196
8.2	Bending Experiments	198
8.3	Formulation	208
8.3.1	Kinematics	209
8.3.2	Constitutive Behavior	210
8.3.3	Principle of Virtual Work	210
8.3.4	Bifurcation Buckling Under Pure Bending	211
8.4	Predictions	214
8.5	Parametric Study	219
8.6	Summary and Recommendations	223
9	Buckling and Collapse Under Combined Bending and External Pressure	225
9.1	Features of Inelastic Bending of Tubes Under External Pressure	225
9.2	Combined Bending-External Pressure Experiments	226
9.2.1	Test Facilities	227
9.2.2	Experimental Results	229
9.3	Formulation	233
9.3.1	Principle of Virtual Work	234
9.3.2	Bifurcation Buckling Under Combined Bending and External Pressure	235
9.4	Predictions	235
9.5	Factors That Affect Collapse	238
9.5.1	Effect of Hardening Rule	238
9.5.2	Bifurcation Buckling	239
9.5.3	Effect of Residual Stresses	240
9.5.4	Asymmetric Modes of Collapse	243

9.5.5	Effect of Wall Thickness Variations	248
9.5.6	Effect of Material Stress–Strain Response	249
9.5.7	Effect of Anisotropic Yielding	250
9.6	Collapse of UOE Pipe Bent Under External Pressure	251
9.6.1	Experiments	252
9.6.2	Analysis	256
9.7	Conclusions and Recommendations	257
10	Inelastic Response Under Combined Bending and Tension	260
10.1	Features of Tube Bending Under Tension	261
10.2	Combined Bending–Tension Experiments	261
10.2.1	Test Facility	261
10.2.2	Experimental Procedure and Results	264
10.3	Formulation	270
10.4	Predictions	274
10.4.1	Simulation of Experiments	274
10.5	Parametric Study	275
10.5.1	Effect of Loading Path	275
10.5.2	Transverse Force on Axis of Pipe	276
10.5.3	Effect of Curvature	276
10.5.4	Effect of Yield Anisotropy and Residual Stresses	277
10.6	Conclusions and Recommendations	278
11	Plastic Buckling and Collapse Under Axial Compression	280
11.1	Features of Axial Plastic Buckling	281
11.2	Axial Buckling Experiments	283
11.2.1	Experimental Setup	283
11.2.2	Experimental Results	285
11.3	Onset of Axisymmetric Wrinkling	293
11.3.1	Formulation	293
11.3.2	Predictions	296
11.4	Evolution of Wrinkling	297
11.4.1	Kinematics	297
11.4.2	Principle of Virtual Work	299
11.4.3	Constitutive Equations	299
11.4.4	Axisymmetric Solution	299
11.4.5	Localization of Axisymmetric Wrinkling	304
11.4.6	Bifurcation into Non-Axisymmetric Buckling Modes	305
11.5	Non-Axisymmetric Buckling and Collapse	308
11.5.1	Results	309
11.6	Parametric Study	314
11.7	Summary and Recommendations	316
12	Combined Internal Pressure and Axial Compression	319
12.1	Combined Axial Compression–Internal Pressure Experiments	319

12.1.1	Experimental Set-Up	320
12.1.2	Experimental Results	321
12.2	Onset of Axisymmetric Wrinkling	327
12.2.1	Formulation	327
12.2.2	Predictions	328
12.3	Evolution of Wrinkling	329
12.4	Parametric Study	332
12.5	Summary and Recommendations	334
13	Elements of Plasticity Theory	336
13.1	Preliminaries	336
13.1.1	Aspects of Uniaxial Behavior	336
13.1.2	Discontinuous Yielding	339
13.1.3	Multiaxial Behavior	342
13.1.4	Yield Criteria	342
13.2	Incremental Plasticity	345
13.2.1	The Flow Rule	345
13.2.2	J_2 Flow Theory with Isotropic Hardening	346
13.3	The Deformation Theory of Plasticity	349
13.3.1	The J_2 Deformation Theory	349
13.3.2	Incremental J_2 Deformation Theory	350
13.3.3	Anisotropic Deformation Theory	351
13.4	Nonlinear Kinematic Hardening	352
13.4.1	The Drucker–Palgen Model [13.19]	353
13.4.2	The Dafalias–Popov Two-Surface Model	355
13.4.3	The Tseng–Lee Two-Surface Model	358
Appendix A:	Mechanical Testing	361
A.1	Tensile and Compressive Material Stress–Strain Responses	361
A.1.1	Tension Tests	361
A.1.2	Compression Tests	363
A.2	Toughness	365
A.2.1	Charpy V-Notch Impact Test (CVN)	365
A.2.2	Drop-Weight Tear Test (DWTT)	368
A.3	Hardness Tests	368
A.4	Residual Stresses	369
Appendix B:	Plastic Anisotropy in Tubes	371
B.1	Anisotropy Tests	371
B.1.1	Lateral Pressure Test	372
B.1.2	Hydrostatic Pressure Test	373
B.1.3	Torsion Test	374
Appendix C:	The Ramberg–Osgood Stress–Strain Fit	376

Appendix D: Sanders' Circular Cylindrical Shell Equations	378
Appendix E: Stress–Strain Fitting for the Dafalias–Popov Model	380
Appendix F: Stress–Strain Fitting for the Tseng–Lee Model	383
Appendix G: Glossary and Nomenclature	386
Appendix H: Units and Conversions	393
Index	395
