

PROCEEDINGS OF THE SECOND INTERNATIONAL SYMPOSIUM ON DESIGN  
OF HYDRAULIC STRUCTURES / FORT COLLINS, COLORADO / 26-29 JUNE 1989

# Design of Hydraulic Structures 89

*Edited by*

**MAURICE L. ALBERTSON**

*Department of Civil Engineering, Colorado State University, Fort Collins, USA*

**RAHIM A. KIA**

*Mahab G. Consulting Eng., Tehran, Iran*

*Presently: Department of Civil Engineering, Colorado State University,  
Fort Collins, USA*

**A.A. BALKEMA / ROTTERDAM / BROOKFIELD / 1989**

## Contents

Preface	XI
Acknowledgements	XIII
<b>1 Hydrology, floods and risk</b>	
Design floods of large dams – Non hydrological aspects <i>L.N.Vajda</i>	3
Hydrology and paleohydrology used to improve the understanding of flood hydrometeorology in Colorado <i>Robert D.Jarrett</i>	9
Risk-based design of hydraulic structures <i>T.Giorgis Goitom &amp; Yeou-Koung Tung</i>	17
Applying risk assessment in comparison of rehabilitation alternatives for dams <i>Yin Au-Yeung</i>	29
<b>2 Computers, simulation and optimization</b>	
The optimal layout and automatic drawing of network diagrams <i>Liu Zhengkai, Li Rongxiang &amp; Wu Zhiming</i>	37
Evaluation of dynamic weir control through computer simulation <i>Lowell W.McBurney, Dwight A.MacArthur &amp; Gregory J.Welter</i>	45
Computer-aided design in hydraulic engineering <i>Bobby J.Brown</i>	51
Computer simulation of irrigation system operation for design improvement <i>Guna N.Paudyal &amp; Bitanjaya Das</i>	59

### 3 Modelling, testing and analysis

The role of hydraulic modeling in development of innovative spillway concepts <i>Philip H.Burgi</i>	67
Hydraulic research in service of design – Chinese experience <i>B.Lin (P.N.Lin)</i>	83
Safety control of arch dams by regression model <i>Ryoji Miike &amp; Ichiro Kobayashi</i>	91
Concrete pipe field test <i>John R.Thurston</i>	97
Deformation analysis of a diaphragm wall <i>Ashok K.Chugh</i>	109

### 4 Foundations and materials

Analysis and design of hydraulic structures in swelling clay shale <i>Brij B.Goyal</i>	121
A new method of designing underground contour for sluice-dams on permeable foundations <i>Mao Chang-xi</i>	129
Geophysical methods for discrimination of geologic discontinuities in the design of hydraulic structures <i>Geoffrey W.Blaney, Ada Li &amp; Michael J.Lewis</i>	139
Cushaw hydroelectric foundation rehabilitation <i>G.T.Bischof &amp; J.S.Thornton, Jr.</i>	145
Evaluating concrete in existing spillway piers <i>Andrew R.Blystra</i>	155
Optimization design of temperature control measures employed in a whole dam <i>Li Rongxiang, Qiang Maoshang &amp; Liu Guangting</i>	165
Influence of foundation modulus on gravity dams <i>S.G.Kulkarni, R.S.Patil &amp; S.L.Mokhashi</i>	173

### 5 Storage and conveyance

Selection of optimum live storage capacity – Prefeasibility studies <i>L.N.Vajda &amp; B.B.Rodić</i>	181
Design procedures for grade-control structures in sand-bed channels <i>T.Giorgis Goitom &amp; Michael E.Zeller</i>	189

Siting of pressure tunnels adjacent to valley slopes – An analytical approach <i>P.S.Joshi, R.S.Patil, B.M.Rame Gowda &amp; S.L.Mokhashi</i>	199
Design and application of labyrinth weirs <i>Frederick Lux III</i>	205
Some special considerations for economic design of embankment dams in low-income countries <i>Geremew Mekonnen</i>	217
Design and calculus tasks regarding raising of a large dam <i>Adrian Popovici, Isac Finkelstein &amp; Ion Toma</i>	225
 <i>6 Erosion and sediment control</i>	
Predicting local scour for design of hydraulic structures in alluvial channels <i>Noel E.Bormann</i>	235
Filter and gradation effects on side slope riprap stability <i>A.F.Ahmed</i>	243
Hydraulic control of secondary circulation in a meander bend to reduce outer bank erosion <i>Colin Paice &amp; Richard Hey</i>	249
Behaviour of sheet barrier under overflow conditions <i>Abdullah M.Albrahim</i>	255
A study of scour downstream one vent regulator <i>E.Abdelhafiz, M.Abdellateef &amp; A.Khalifa</i>	263
Rubble mound groins design in area submitted to strong tidal currents <i>José Joaquim Reis de Carvalho, Odair José de Souza &amp; Paolo Alfredini</i>	269
Design aspects for operation to bypass sediment at Cowlitz Falls reservoir <i>J.S.Wang &amp; F.A.Locher</i>	277
 <i>7 Spillways and energy dissipation</i>	
High-and-low trajectory bucket type energy dissipator with jets colliding in the air <i>Chen Shili</i>	285
Flow conditions at submerged drops <i>Ali M.Talaat</i>	291
Modification of SAF and CIT type drop structures for higher unit discharges <i>Herman O.Turner, Jr.</i>	297
Design of low Froude number stilling basins <i>Kevin D.Nielsen</i>	303

Lake Manatee Dam emergency spillway and modifications to the existing gated spillway and dam, Manatee County, Florida <i>Thomas R.Sear</i>	311
---	-----

## 8 Intakes and energy loss

Design of curb inlet structures for South Carolina – A case study <i>Abbas A.Fiuzat, Ben L.Sill &amp; Rudy E.Elling</i>	319
Hydraulic model study on the design of bottom intake structures <i>Tawatchai Tingsanchali, G.N.Paudyal &amp; Gabriel M.Kalinga</i>	327
Design of an underground water intake facility for Austin, Texas <i>Christian C.Sundberg, Richard F.Coon, John S.McLeod, Richard E.Riker, Ray Selk &amp; George Greene</i>	333
Energy losses in channel bends: theory and application <i>R.Pacheco-Ceballos</i>	341
Friction losses for use in the design of hydraulic conveyance tunnels <i>David E.Westfall</i>	349

## 9 Irrigation, drainage and navigation

Current screening systems used by the Bureau of Reclamation on irrigation canal turnouts structures, with emphasis on perforated plate <i>Thomas R.Haider</i>	359
Designing hydraulic structures for water control in irrigation water delivery systems <i>David J.Molden, Timothy K.Gates &amp; Daniel K.Sunada</i>	365
Planning and design of deep, high discharge, drainage structures <i>Brian J.Van Weele, Bill R.Jolly &amp; Placido M.Viarnes</i>	371
Retrofit of a towboat arrester system on a navigation lock <i>Sandra K.Martin &amp; Randy Holmes</i>	377
Model study of the navigation lock at Naga-Hammadi Barrage <i>M.M.Gasser &amp; M.B.E.A.Saad</i>	383
Construction of navigation lock engineering in China and synopsis of design code <i>Ding Xingrui</i>	389

## 10 Hydropower

A three dimensional stability and stress analysis of an existing hydropower headworks structure <i>T.R.Harrell, G.V.Jones &amp; C.K.Toner</i>	397
--	-----

Protecting project performance while providing power generation at Youghiogheny River Dam <i>R.W.Schmitt &amp; L.Varga</i>	405
Design of low head prefabricated composite hydroelectric powerplants <i>F.R.Ferrer-Laloe</i>	413
J.C.Boyle hydroelectric project forebay spillway rehabilitation <i>Thomas C.Demlow &amp; Timothy C.O'Connor</i>	419
Potential of hydroelectric development in existing irrigation and flood control projects <i>T.Giorgis Goitom</i>	425
Design for a combined spillway and powerhouse arrangement <i>M.D.Namikas &amp; F.A.Locher</i>	433
 <i>11 Pumps and valves</i>	
The West Desert Pump Station: Unique solutions to a flooding problem <i>Charles E.Sweeney, Adam W.Borenstadt &amp; James Palmer</i>	441
Prototype hood modification for fixed-cone valves <i>Timothy L.Fagerburg, Frank M.Neilson, James L.Lynch &amp; Randall W.Spurlock</i>	447
 <i>12 Operation, management and rehabilitation</i>	
Operation considerations in the design of canal systems <i>David C.Rogers</i>	457
Environmental design of a surface water management system <i>David H.Schneider &amp; Daniel J.Homblette</i>	469
Case history: required modifications of Elmer Thomas Dam <i>Cheryl Wagner Smith &amp; John W.France</i>	475
Check structure modification for California Aqueduct enlargement <i>Darryl E.Hayes</i>	481
Author index	485
Subject index	487
