

PROCEEDINGS OF THE INTERNATIONAL GEOTECHNICAL SYMPOSIUM ON THEORY  
AND PRACTICE OF EARTH REINFORCEMENT / FUKUOKA KYUSHU / 5-7 OCTOBER 1988

# Theory and Practice of Earth Reinforcement

*Edited by*

**TOYOTOSHI YAMANOUCHI**

*Kyushu Sangyo University, Japan*

**NORHIKO MIURA**

*Saga University, Japan*

**HIDETOSHI OCHIAI**

*Kyushu University, Japan*

*Under the auspices of the Japanese Society of Soil Mechanics and Foundation Engineering*  
**A.A.BALKEMA / ROTTERDAM / BROOKFIELD / 1988**

# Contents

## Special lectures

Fabric reinforced retaining walls <i>B.B.Broms</i>	3
Earth reinforcement – West and east <i>M.Fukuoka</i>	33

## 1. Tests and materials

Mechanics of orthogonally reinforced sand <i>T.Adachi, H.B.Poorooshasb &amp; F.Oka</i>	51
Dilatancy and failure of reinforced sand <i>R.R.Al-Omari, A.K.Mahmood &amp; F.J.Hamodi</i>	57
Evaluation of the effects of construction activities on the physical properties of polymeric soil reinforcing elements <i>D.I.Bush</i>	63
Natural materials for soil reinforcement <i>K.R.Datye</i>	69
Dutch progress in the standardization of geotextile test methods <i>M.Th.de Groot, G.den Hoedt &amp; A.H.J.Nijhof</i>	75
Clay geotextile interaction in in-soil tensile tests <i>K.J.Fabian &amp; A.B.Fourie</i>	81
Friction characteristics of polypropylene straps in reinforced minestone <i>T.W.Finlay, Mei-Jiu Wei &amp; N.Hytiris</i>	87
Strength characteristic of reinforced sand in large scale triaxial compression test <i>S.Fukushima, Y.Mochizuki &amp; K.Kagawa</i>	93
Functions and effects of reinforcing materials in earth reinforcement <i>S.Hayashi, H.Ochiai, A.Yoshimoto, K.Sato &amp; T.Kitamura</i>	99
Present state of knowledge of long term behaviour of materials used as soil reinforcements <i>J.M.Jailloux &amp; P.Ségrestin</i>	105

Creep behaviour of geotextiles <i>M.H.Kabir</i>	111
Long-term pull-out tests of polymergrids in sand <i>K.Kutara, N.Aoyama, H.Yasunaga &amp; T.Kato</i>	117
Modelisation and design of geotextiles submitted to puncture loading <i>F.Lhôte, J.M.Rigo &amp; J.M.Thomas</i>	123
Mobilization of soil-geofabric interface friction <i>K.Makiuchi &amp; T.Miyamori</i>	129
Shaking table test on reinforced sand <i>Y.Mochizuki, S.Fukushima &amp; K.Kagawa</i>	135
Evaluation of polymer grid reinforced asphalt pavement from the circular test track <i>T.Momoi, H.Tsukano, M.Matsui &amp; T.Katsu</i>	141
Field pull-out test of polymer grid in embankment <i>H.Ochiai, S.Hayashi, J.Otani, T.Umezaki &amp; E.Ogisako</i>	147
Restraint effects on deformation of soft foundation with geotextile <i>B.K.Park, M.S.Lee &amp; J.S.Jeong</i>	153
Recent evolution in ISO standardization for mechanical testing of geotextiles <i>J.M.Rigo, F.Lhôte, D.Cazzuffi &amp; G.den Hoedt</i>	159
Soil-reinforcement interaction determined by extension test <i>C.K.Shen, O.Y.Kim, X.S.Li &amp; J.Sohn</i>	165
The earth reinforcement effects of steel bar truss set in embankment <i>H.Yokota, T.Nakazawa, H.Fujimoto &amp; Y.Ono</i>	171
 <b>2. Shallow and deep foundations</b>	
Reinforcement of soft Bangkok clay using granular piles <i>D.T.Bergado, N.Miura, B.Panichayatum &amp; C.L.Sampaco</i>	179
Load-carrying capacity of a soil layer supported by a geosynthetic overlying a void <i>J.P.Giroud, R.Bonaparte, J.F.Beech &amp; B.A.Gross</i>	185
Prediction of bearing capacity in level sandy ground reinforced with strip reinforcement <i>C.-C.Huang &amp; F.Tatsuoka</i>	191
Membranes in layered soils beneath pipelines <i>A.F.L.Hyde &amp; K.Yasuhara</i>	197
A few remarks on the design guide to pile net method <i>T.Iseda, Y.Tanabashi, K.Okayama &amp; E.Arata</i>	203
The use of slip line fields to assess the improvement in bearing capacity of soft ground given by a cellular foundation mattress installed at the base of an embankment <i>C.G.Jenner, R.H.Bassett &amp; D.I.Bush</i>	209
An experimental study on the contribution of geotextiles to bearing capacity of footings on weak clays <i>S.I.Kim &amp; S.D.Cho</i>	215

Effect of installation methods on granular pile response <i>M.R.Madhav &amp; C.Thiruselvam</i>	221
Model and field tests of reinforced pavement on soft clay ground <i>N.Miura, A.Sakai, Y.Taesiri, K.Mouri &amp; M.Ohtsubo</i>	227
Design of geotextile and geogrid reinforced unpaved roads <i>G.P.Saha &amp; M.H.Kabir</i>	233
Experimental studies to improve the surface land reclaimed from the sea <i>H.Uehara, M.Yoshizawa &amp; S.Kohagura</i>	239
Modelling for bearing capacity analysis of reinforced sand subgrades <i>B.P.Verma &amp; A.N.R.Char</i>	245
Mattress foundation by geogrid on soft clay under repeated loading <i>K.Yasuhara, K.Hirao &amp; M.Hyodo</i>	251
Improvement of very soft ground <i>B.R.Ye, J.Zhang &amp; X.Zhang</i>	257
 <b>3. Slopes and excavations</b>	
Major slope stability problems in dam constructions in Thailand <i>N.Deeswasmongkol, P.Noppadol &amp; C.Areepitak</i>	265
Geotechnical approach to reinforcement system of underground openings in a gold mine <i>T.Esaki, T.Kimura, T.Nishida, N.Kameda, K.Nakamura &amp; H.Imada</i>	271
Field behaviour of two instrumented, reinforced soil slopes <i>R.J.Fannin &amp; S.Hermann</i>	277
Soil-nailing – Theoretical basis and practical design <i>G.Gässler</i>	283
Role of facing in reinforcing cohesionless soil slopes by means of metal strips <i>V.Gutierrez &amp; F.Tatsuoka</i>	289
Study on the effect of the vertical RC bolting on the unstable slope <i>M.Iwata, Y.Mitarashi &amp; M.Masuda</i>	295
Kinematical limit analysis approach for the design of nailed soil retaining structures <i>I.Juran, B.George, F.Khalid &amp; V.Elias</i>	301
Effect of rock bolts on volcanic sandy soil 'Shirasu' by floor lowering test <i>R.Kitamura &amp; M.Haruyama</i>	307
Model loading tests of reinforced slope with steel bars <i>T.Kitamura, A.Nagao &amp; S.Uehara</i>	311
Finite element stability analysis method for reinforced slope cutting <i>T.Matsui &amp; K.C.San</i>	317
Field monitoring procedure of cut slopes reinforced with steel bars <i>S.Mino, K.Noritake &amp; S.Innami</i>	323

Field experiment on reinforced earth and its evaluation using FEM analysis <i>A.Nagao, T.Kitamura &amp; J.Mizutani</i>	329
Theory and practice on reinforced slopes with steel bars <i>S.Okuzono, N.Yamada &amp; N.Sano</i>	335
Reinforcement of soil slopes by electrochemical methods <i>A.K.S.A.Perera</i>	341
Proposal for design and construction of reinforced cut slope with steel bars <i>N.Sano, T.Kitamura &amp; K.Matsuoka</i>	347
Analysis of a slope reinforced with rockbolts <i>T.Tsubouchi, Y.Goto &amp; T.Nishioka</i>	353
Rock anchoring of dosing tank for sewerage disposal <i>S.Valliappan, V.Murti, B.Jayaram &amp; M.B.Cao</i>	357
Insitu ground reinforcement for slope improvement in Hong Kong <i>K.P.Yim, A.T.Watkins &amp; G.E.Powell</i>	363
 <b>4. Embankments</b>	
The behaviour of a reinforced trial embankment on soft shallow foundations <i>R.H.Bassett &amp; K.C.Yeo</i>	371
Design and construction of quay wall using geotextile <i>D.Djarwadi</i>	377
Expanded polystyrene – A superlight fill material <i>T.E.Frydenlund &amp; R.Aaboe</i>	383
Design and construction of steel bars with anchor plates applying to strengthen the high embankment on soft ground <i>M.Fukuoka &amp; M.Goto</i>	389
Application of RBSM analysis to earth reinforcement method <i>M.Hada, Y.Taguchi &amp; K.Kagawa</i>	395
Analytical method for geotextiles used for earth spreading work and applicability <i>Y.Higuchi &amp; Y.Watari</i>	401
Finite element analysis of grid reinforcement <i>K.Koga, S.Valliappan &amp; G.Aramaki</i>	407
Seismic resistance of reinforced embankment by model shaking table tests <i>Y.Koga, Y.Ito, S.Washida &amp; T.Shimazu</i>	413
Reinforcement against deep-seated failure: Stability analysis <i>D.Leshchinsky &amp; D.S.Smith</i>	419
Reinforcement of very soft ground using bamboo cross beam with polymer net <i>S.Matsunaga, Y.Watari &amp; S.Isayama</i>	425
Experimental studies on the performance of polymer grid reinforced embankment <i>H.Miki, K.Kutara, T.Minami, J.Nishimura &amp; N.Fukuda</i>	431

Steel reinforced embankments on soft clay foundations <i>B.L.J.Mylleville &amp; R.K.Rowe</i>	437
An experimental study on the performance of a prototype reinforced earth embankment <i>D.N.Naresh, M.V.Ratnam &amp; G.Subrahmanyam</i>	443
A 14 metre high reinforced soil embankment as the abutment of a steel bridge in Tuen Mun, Hong Kong <i>H.Y.Ng &amp; C.H.Mak</i>	449
Stability of reinforced embankment over soft cohesive foundation <i>H.Oikawa</i>	455
Reinforced soil systems in embankments – Construction practices <i>J.Paul</i>	461
Analysis of slopes reinforced with bamboo dowels <i>H.B.Poorooshasb, R.Azevedo &amp; K.Ghavami</i>	467
Collapse of dispersive soil and its prevention using geotextiles <i>Shou-Tian Sheng, You-Wei Hong &amp; An-Jiang Wang</i>	473
Full scale testing and numerical analysis for polymer grid reinforced embankment <i>M.Taki, S.Renge, T.Hachiman, Y.Morioka, H.Matsuda &amp; J.Natori</i>	479
A study on stability analyses of reinforced embankments based on centrifugal model tests <i>E.Taniguchi, Y.Koga, S.Yasuda &amp; I.Morimoto</i>	485
An application of non woven fabrics to embankment of cohesive soil <i>Y.Yunoki &amp; A.Nagao</i>	491
 <b>5. Wall structures</b>	
Reinforced earth bridge abutments <i>M.S.Boyd</i>	499
Laboratory model test and research of the reinforced-earth wall <i>Mingde Cheng &amp; Zhonglun Shi</i>	505
Geotextile-reinforced retaining structures: A few instrumented examples <i>Ph.Delmas, J.P.Gourc, J.C.Blivet &amp; Y.Matichard</i>	511
Design of geosynthetic retaining walls: 'Displacement method' and 'Two blocks method' Comparison and charts <i>J.P.Gourc, Ph.Gotteland &amp; Ph.Delmas</i>	517
Long term performance requirements for polymeric soil reinforcement in the United Kingdom <i>T.S.Ingold</i>	523
The analysis of vertical loads applied to the top of reinforced earth structures <i>P.H.Jackson &amp; C.J.F.P.Jones</i>	529
Predicting the behaviour of reinforced soil structures <i>C.J.F.P.Jones</i>	535

TEXSOL: Already more than 50 successful applications <i>E.Leflaive</i>	541
Optimised computer programs for design of reinforced soil structures <i>P.F.McCombie &amp; D.I.Bush</i>	547
Roles of facings in reinforcing steep clay slopes with a non-woven geotextile <i>K.Nakamura, F.Tatsuoka, Y.Tamura, K.Iwasaki &amp; H.Yamauchi</i>	553
FEM analysis of polymer grid reinforced-soil retaining walls and its application to the design method <i>E.Ogisako, H.Ochiai, S.Hayashi &amp; A.Sakai</i>	559
Theory and practice of 'Reinforcing' steep slopes with nonwoven geotextiles <i>S.Resl, H.Schneider &amp; G.Werner</i>	565
A review of field measurements of the behaviour of geogrid reinforced slopes and walls <i>P.Rimoldi</i>	571
Seismic design of Reinforced Earth <sup>r</sup> retaining walls – The contribution of finite elements analysis <i>P.Segrestin &amp; M.J.Bastick</i>	577
Experimental study of reinforced-earth wall <i>Zhonglun Shi &amp; Mingde Cheng</i>	583
Geotextiles earth reinforced retaining wall tests <i>I.Yamaoka, T.Yamashiro &amp; K.Mondori</i>	589
The limit equilibrium of geotextile reinforced structures <i>Y.Zhang &amp; E.Schwing</i>	595
26m height reinforced soil quaywall: Design and full-scale test <i>Zhongchun Ouyang</i>	599
Soil-nailing – Design and application to modern and ancient retaining walls <i>E.Schwing &amp; G.Gudehus</i>	605
Compatibility, serviceability and design factors for reinforced soil walls <i>R.A.Jewell</i>	611
Authors' index	617
