

PROCEEDINGS OF THE INTERNATIONAL SYMPOSIUM ON MODELLING SOIL-  
WATER-STRUCTURE INTERACTIONS / DELFT / 29 AUGUST-2 SEPTEMBER 1988

# Modelling Soil-Water- Structure Interactions SOWAS 88

*Edited by*

**P.A.KOLKMAN**

*Delft Hydraulics*

**J.LINDENBERG**

*Delft Geotechnics*

**K.W.PILARCZYK**

*Rijkswaterstaat*

**A.A.BALKEMA / ROTTERDAM / BROOKFIELD / 1988**

## Contents

Preface	IX
1. <i>Soil-water-structure interactions</i>	
An introduction to the SOWAS concept <i>J.van der Weide</i>	3
Are models of any use for the designer of civil structures (Keynote lecture) <i>J.K.Vrijling</i>	7
Features of soil behaviour in relation to soil-water-structure interaction (Keynote lecture) <i>A.N.Schofield</i>	17
2. <i>Wave and current induced behaviour of the seabottom</i>	
Estimation of seabed behaviour beneath a breakwater <i>A.Sawicki, W.Świdziński &amp; A.Walter</i>	23
Lateral resistance and displacement patterns for cyclically loaded pipelines in sand inferred from model testing <i>M.Jørgensen, J.O.Steensen-Bach &amp; J.S.Steenfelt</i>	33
Seabed movements and their effect on offshore structures <i>G.L.van der Zwaag &amp; A.J.van Seters</i>	43
Seabed stability near floating structures <i>W.Sulisz &amp; W.G.McDougal</i>	55
Effects of inertia and gravity on seabed response to ocean waves <i>T.Sakai, H.Mase &amp; A.Matsumoto</i>	61
Settlement of a concrete block into a sand bed under water pressure variation <i>S.Maeno &amp; H.Nago</i>	67
Wave and earthquake induced liquefaction potential of silty sand from sea bed <i>N.R.Dhat, M.V.Chhatre, A.M.Vaidya, B.Murlidhar, S.T.Paliwal &amp; S.L.Mokhashi</i>	77
Mathematical modelling of water wave interactions with large offshore structures <i>I.T.Selezov, V.V.Yakovlev &amp; A.V.Pyatetsky</i>	85

### 3. Local scour

Models and scale effects related to erosion of granular dams <i>S.P.Chee</i>	93
Reliability of physical and mathematical modelling of local scour around circular bridge piers <i>M.Nouh</i>	99
Effect of supercritical flow on local scour downstream regulators <i>M.Abdelsalam, M.Hammed, A.Khalifa &amp; S.Kamel</i>	109
Experimental study on horseshoe vortex in the upstream front of cylindrical structure <i>K.Kubo &amp; M.Takezawa</i>	117
Modelling local scour in light weight sediment <i>N.O.Eisenhauer &amp; G.M.Kley</i>	127
Analytical approach to some practical aspects of local scour around bridge piers <i>T.Tsujimoto</i>	137
Local scour and scouring tests in a vicinity of large diameter offshore caisson <i>J.Rytkönen</i>	147
Scouring in movable bed expansions <i>C.Fouladi</i>	155

### 4. Behaviour and stability of block revetments and filter layers

Stability against sliding of flexible revetments <i>K.J.Bakker &amp; P.Meijers</i>	163
Erosion of sediment through cellular revetment blocks applied as slope protection along coasts and inland waterways <i>M.Klein Breteler, J.H.Laboyrie &amp; H.J.Verhey</i>	173
The interaction between soil, water and bed or slope protection <i>M.B.de Groot, A.Bezuijen, A.M.Burger &amp; J.L.M.Konter</i>	183
The permeability of closely placed blocks on gravel <i>M.Klein Breteler &amp; A.Bezuijen</i>	199
Full-scale investigations on the stability of concrete block slope revetments <i>A.Führböter &amp; U.Sparboom</i>	209
A computation method for the settlement of semi-stable filters <i>M.A.Koenders &amp; A.F.Williams</i>	219
Internal stability of minestone <i>H.den Adel, K.J.Bakker &amp; M.Klein Breteler</i>	225

### 5. Wave impact loads and behaviour of asphalt revetments

Wave impact on slope revetment – A problem of long term stability <i>W.Richwien &amp; Th.Wehner</i>	235
--	-----

Shock pressure interactions on prototype sea dykes caused by breaking waves <i>A.Führböter &amp; U.Sparboom</i>	243
Scale effects in modelling the stability of asphalt bed protections <i>J.L.M.Konter &amp; W.G.de Rijke</i>	253
Anatomy of shock pressures (surface and sand core) induced by real sea state breaking waves <i>J.Grüne</i>	261
Effect of wave impact on asphalt revetments of Dutch sea dikes <i>E.H.Ebbens, F.Molenkamp &amp; P.Ruygrok</i>	271
 <b>6. Piles, platforms, piers and gravity structures</b>	
Numerical and physical modelling of piles behaviour under monotonous and cyclic loading <i>M.Boulon</i>	285
Verification of geotechnical design criteria for Eastern Scheldt storm surge barrier <i>J.van Heteren, J.Lindenberg &amp; H.A.M.Nelissen</i>	295
Model studies and numerical analysis of pile-soil interaction of single and arrayed piles under static and dynamic loadings <i>M.Gao, J.P.Tong &amp; H.L.Fang</i>	305
Displacement piles in granular soils with fluctuating pore water pressures and overburden pressures <i>J.W.Armishaw</i>	315
Modelling of the soil-structure interaction for a jack-up platform under storm loading with a cyclic elastoplastic soil model <i>Y.Meimon, F.Lassoudière &amp; C.Perol</i>	325
Analysis of the nonlinear soil-structure interaction of offshore piles by an explicit finite element computer program <i>N.F.F.Ebecken, L.Landau, A.L.G.A.Coutinho, J.L.D.Alves &amp; A.M.da Costa</i>	335
Models for soil-structure interaction of offshore structures <i>H.Ramstad</i>	343
 <b>7. Sand suppletion processes and flow slides</b>	
On the construction of sand fill dams – Part 1: Hydraulic aspects <i>D.R.Mastbergen, A.Bezuijen &amp; J.C.Winterwerp</i>	353
On the construction of sand fill dams – Part 2: Soil mechanical aspects <i>A.Bezuijen &amp; D.R.Mastbergen</i>	363
An engineering approach to under water dumped sandbodies <i>F.T.Heezen &amp; A.C.M.van der Stap</i>	373
A numerical model to describe the initiation of flow slides in under water sand slopes <i>F.Silvis, J.Lindenberg &amp; J.van Heteren</i>	385

## 8. Breakwaters, dams and walls

- Transient effects in geohydrological systems 395  
*J.B.A.Weijers & F.B.J.Barends*
- Uplift pressure on a concrete spillway due to steady-state seepage in the foundation 403  
*E.C.Kalkani*
- Interaction between concrete cutoff wall and core of rock-earth dams 409  
*Pu Jia-Liu & Yu Qiong-Hua*
- Energy dissipation in rubble mound breakwaters 417  
*M.Di Natale*
- Simulation of internal water movement in breakwaters 427  
*P.Hölscher, M.B.de Groot & J.W.van der Meer*

## 9. Miscellaneous

- Froude scale modelling for dynamically loaded saturated fine sand 437  
*P.A.Kolkman*
- On the applicability of a quasi-linear finite element model to buoyancy flow in an artificial aquifer – Validation against field performance 449  
*H.Daniels*
- Some aspects of coupled dynamics of towers 459  
*H.A.Dieterman*
- An experimental study of shock-induced wave propagation in dry, water-saturated, and partially saturated porous media 469  
*J.G.M.van der Grinten, R.W.J.M.Sniekers, M.E.H.van Dongen & H.van der Kogel*
- Emergency models to study the overtopping of a natural dam formed by a landslide: The case of Val Pola rockslide (Italy) 479  
*M.Fanelli, G.Angelico, M.de Gerloni & P.Molinario*
- Fabric reinforced embankment test section Plaquemines Parish, Louisiana 485  
*J.Fowler, E.V.Edris Jr. & G.Comes*
- Interaction of outlet works and soil foundation in modelling 495  
*V.Baronin, B.Dvorkin, U.Enguibaryan & S.Sidorova*
- The influence of sludge on support reactions during construction of the Emstunnel 501  
*J.Linnekamp & W.den Breejen*
