

PROCEEDINGS OF THE 1ST INTERNATIONAL GEOTECHNICAL SEMINAR ON
DEEP FOUNDATIONS ON BORED AND AUGER PILES / GHENT / 7-10 JUNE 1988

Deep Foundations on Bored and Auger Piles

Edited by

W.F.VAN IMPE

Ghent State University

The proceedings of the International Seminar on Deep Foundations on Bored and Auger Piles, held at Ghent University, Belgium, on 7-10 June 1988, are presented in this volume. The seminar was organized by the Department of Soil Mechanics and Foundation Engineering of Ghent University, in cooperation with the Royal Institute of Technology, Stockholm, Sweden, and the University of Groningen, Groningen, The Netherlands.

The seminar was divided into four main sessions:

- Session I: Bored Piles
- Session II: Auger Piles
- Session III: Deep Foundations in Coastal Areas
- Session IV: Deep Foundations in Industrial Areas

The proceedings consist of 11 papers, each dealing with a specific topic related to the four sessions. The topics include:

- Bored piles in sand and clay
- Auger piles in sand and clay
- Deep foundations in coastal areas
- Deep foundations in industrial areas

The seminar was attended by approximately 150 participants from 15 countries, including Belgium, The Netherlands, Germany, France, Italy, Spain, Portugal, Switzerland, Austria, Norway, Sweden, United Kingdom, United States, and Japan. The seminar was well received and provided a valuable opportunity for the exchange of information and ideas on deep foundation technology.

A.A.BALKEMA / ROTTERDAM / BROOKFIELD / 1988

Contents

Preface	IX
<i>Keynote lectures</i>	
The interaction between soil and groups of small diameter bored piles <i>H.Brandl</i>	3
Bored piles in residual soil and weathered rocks in Singapore <i>Bengt B.Broms, M.F.Chang & A.T.C.Goh</i>	17
L'expérience des LPC en matière de pieux vissés moulés et tarières creuses <i>M.G.Bustamante & L.Gianeselli</i>	35
Different behaviour of bored and driven piles <i>E.De Beer</i>	47
Group action between vertical piles under horizontal loads <i>E.Franke</i>	83
Large cast-in-place piles in Japan <i>Masami Fukuoka</i>	95
Relevance of in-situ test results for evaluation of allowable base resistance of bored piles in sands <i>M.Jamiolkowski & R.Lancellotta</i>	107
Short- and long-term behaviour of axially loaded bored piles in permafrost <i>B.Ladanyi</i>	121
Some problems in predicting behaviour of bored pile foundations <i>G.G.Meyerhof</i>	133
Field load tests of drilled shafts <i>L.C.Reese & M.W.O'Neill</i>	145
Considerations on the auger pile design <i>W.F.Van Impe</i>	193
Cast-in-situ piles – Installation methods, soil disturbance and resulting pile behaviour <i>A.F.Van Weele</i>	219

1. Settlement behaviour of bored and auger piles	
Prediction of the load-settlement characteristics of bored piles <i>I.Luker</i>	229
Analysis of non-linear behaviour of reinforced concrete diaphragm walls under horizontal load <i>A.Mazzucato & A.Natali</i>	239
Load transfer along bored piles in stiff clays <i>J.M.Rogel, C.S.Oteo & A.Soriano</i>	245
Settlement of the base of large diameter bored piles in preconsolidated clay <i>Arinos Xavier Tavares</i>	253
2. Case studies / New developments	
Experiences with pile foundations in lake-clay <i>P.Amann, R.Bahn & H.Wollenhaupt</i>	261
Methods to improve the quality of auger piles <i>K.F.Brons & A.F.Kool</i>	269
Some experiences with bored and auger piles in Naples area <i>V.Caputo & C.Viggiani</i>	273
Deepening of heavily loaded building foundations <i>Chester Carville</i>	283
A new method of static pile load test system VUIS-P <i>B.Černák, J.Hlaváček & K.Klein</i>	291
Performance of bored piles in residual soils and weathered rocks <i>M.F.Chang & A.T.C.Goh</i>	303
Bored piling in Bombay region <i>K.R.Datye & D.V.Karandikar</i>	315
Starsol Enbesol procedure <i>G.Y.Fenoux & G.de Buysere</i>	325
Displacement auger piles with compacted base <i>K.Rainer Massarsch, Werner Brieke & Eric Tancre</i>	333
Procedures most frequently used in Mexico for construction of piles in the presence of the phreatic level <i>José Antonio Ponce Serrano</i>	343
Barrettes de forte capacité en zone d'anciennes carrières souterraines <i>B.Simon, F.Schlosser & J.Morey</i>	349
Foundations on drilled and grouted mini piles – A case history <i>Nassef Soliman & George Mufak</i>	363
A new pile foundation composed of soil cement and steel pipe <i>Takashi Okamoto, Kimitoshi Takano, Hiroaki Nagaoka, Tetsuzo Hirose & Syohei Chida</i>	371

3. Soil testing related to bored and auger piles

- Effective stresses on the shafts of bored and cast-in-situ piles in clays 387
W.F.Anderson

- Axial cyclic loaded piles 395
H.-W.Koreck & P.Schwarz

- A direct assessment of pile-soil interaction coefficients in buried piles 401
Kanakapura S.Subba Rao & K.H.Venkatesh

4. Bearing capacity of bored and auger piles

- The shaft friction of bored piles in terms of effective strength 411
J.B.Burland & D.Twine

- Skin bearing capacity of piles 421
Emöke Imre

- Loading tests of bored piles inserted nodular and cylindrical piles 429
S.Kanai & S.Yabuuchi

- Development of skin friction and base resistance of instrumented large bored piles under working load conditions 435
J.Kruizinga

- The load bearing capacity of bored piles, a problem not yet satisfactorily solved – Some proposals 443
F.Lizzi

- The ultimate bored pile load capacity in granular soils: A case history against the current effective stress design theory in comparison to a penetration based design method 451
C.Mordhorst

- Analysis of bored piles in seismically active zones 457
H.B.Poorooshash, L.V.Medeiros & E.A.Vargas, Jr.

- Bearing capacity of bored short piles 467
O.Pula & Cz. Rybak

- Comparison of predicted and measured bearing capacity of auger piles 471
V.Rizkallah

- Vertical load bearing capacity from the soil strength parameters 477
J.Šimek, J.Očenášek & O.Sedlecký

- Measurement of horizontal thrust on piles of a bridge abutment 481
B.R.Thamm & A.Wolf

- End and shaft bearing capacity of piles evaluated separately out of static pile loading test results 489
W.F.Van Impe, K.Thooft & M.Van den Broeck

Experimental research on end bearing capacity of bored and drilled piles <i>Yi-Ming Gong, You-Nian Zhang, Chun Liu & Guo-Dong Ma</i>	499
Examination of some common rules for bored piles against hydraulic gradient models results <i>A.Zelikson</i>	507
5. The use of in-situ testing related to bearing capacity	
The effect of vertical unloading on cone resistance q_c , a theoretical analysis and a practical confirmation <i>N.W.A.Broug</i>	523
Vertical loading tests of large bored piles and their estimation <i>Masahiro Koike, Tamotsu Matsui & Kenji Matsui</i>	531
On the prediction of the bearing capacity of bored piles from dynamic penetration tests <i>Francisco R.Lopes & Hugo Laprovitera</i>	537
Prediction of behaviour of bored piles by pressuremeter tests <i>B.J.Mehta</i>	541
Pile tests on bored piles in Greece <i>K.Pitilakis, St.Tsotsos & T.Hatzigogos</i>	545
Comparative analysis of bearing capacity of large diameter bored pile <i>A.Teichman & K.Gwizdala</i>	553
Corrélation entre les mesures et les prévisions de la capacité portante et du tassement de pieux forés chargés axialement par application des méthodes pressiométriques <i>A.Van Wambeke & J.d'Hemricourt</i>	559
6. Pile testing	
Load and integrity testing of the deep bored piles under the Jeddah port tower <i>A.Candoğan</i>	569
Integrity tests on various types of piles <i>J.De Jaeger, M.Van den Broeck, A.Holeyman & Ch.Legrand</i>	577
Integrity control of bored piles using SID <i>J.C.Holden</i>	587
Particular aspects of integrity control of screw piles <i>J.Vyncke</i>	599
