

Soil Improvement Techniques and their Evolution

By

W.F.VAN IMPE

Soil Mechanical Department, Ghent State University

A.A.BALKEMA / ROTTERDAM / BROOKFIELD / 1989

Table of contents

1. INTRODUCTION	1
2. TEMPORARY SOIL IMPROVEMENT TECHNIQUES	2
2.1 Water table lowering	2
2.2 Ground freezing	2
2.3 Electro-osmosis	9
3. PERMANENT SOIL IMPROVEMENTS WITHOUT THE ADDITION OF ANY MATERIAL	14
3.1 Surface compaction	14
3.2 Heavy tamping	19
3.3 Compaction by explosives	27
3.4 Deep compaction using vibratory probes	34
3.5 Soil improvement by thermal treatment	39
4. PERMANENT SOIL IMPROVEMENT BY ADDING MATERIALS	42
4.1 Lime and cement stabilization for surface compaction	42
4.2 Improvement with gravel or sand columns	48
4.3 Use of lime columns	66
4.4 Soil replacement techniques	72
4.5 Soil improvement by preliminary loading in addition to the use of vertical drains	77
4.6 Grouting of the soil layer to be improved	89
4.7 Soil improvement using separate reinforcing elements	99
4.8 Reinforced earth	100
5. TESTING THE COMPLETED SOIL IMPROVEMENTS	114

6. GENERAL CONCLUSION	120
