SOIL DYNAMICS AND LIQUEFACTION

Edited by

A.S. CAKMAK

Department of Civil Engineering, Princeton University, Princeton, N.J. 08544, U.S.A.

ELSEVIER

Amsterdam – Oxford – New York – Tokyo 1987

Co-published with

COMPUTATIONAL MECHANICS PUBLICATIONS

Southampton – Boston – Los Angeles 1987

CONTENTS

SECTION 1: CONSTITUTIVE RELATIONS IN SOIL DYNAMICS

Computational Approach to Soil Dynamics <i>O.C. Zienkiewicz, A.H.C. Chan, M. Pastor and T. Shiomi</i>	3
The Development of Constitutive Relationship for Seismic Pore Pressure <i>S.K. Bhatia, S. Nanthikesan</i>	19
Effect of Frequency Content on Dynamic Properties of Cohesive Soils <i>M.S. Aggour, K.S. Tawfiq and F. Amini</i>	31
The Markov Framework for Modeling Uncertainties in Soil Constitutive Behavior <i>H. Benaroya, G. Goldstein</i>	41
An Anisotropic Hardening Model for Sand Subjected to Cyclic Loading <i>H. Hirai</i>	53

SECTION 2: LIQUEFACTION OF SOILS

Analysis of Porewater Pressures in Seismic Centrifuge Tests <i>W.D. Liam Finn, M. Yogendrakumar, N. Yoshida and H. Yoshida</i>	71
Earthquake Induced Forces on Retaining Walls <i>R.M. Bakeer, S.K. Bhatia</i>	87
Risk Analysis of BRPL Compressor (Offsites) Foundations <i>N. Puri, K. Kumar and S. Prakash</i>	97
Cyclic Hardening of Sand During Earthquake Events <i>U. Guettler, G. Thiel and H.L. Jessberger</i>	107
Estimation of Bridge Foundation Stiffness from Forced Vibration Data <i>C.B. Crouse, B. Hushmand</i>	123
A Parametric Study of Effect of Vibration on Granular Soils <i>P.W. Chang, Y.S. Chae</i>	137
EQGEN86 – An Artificial Earthquake Simulation Program <i>N.Y. Chang, B.H. Lien and M.J. Huang</i>	153
On the Behavior of Soils During Earthquakes – Liquefaction <i>G. Castro</i>	169
Liquefaction of Shock Loaded Saturated Sand <i>G.E. Veyera, W.A. Charlie</i>	205

Seismic Response of Pore Water Pressure in Surface Sand Layer <i>E. Yanagisawa, H. Ohmiya and T. Shimizu</i>	221
A Study of Earthquake Resistance of Highway Abutments During Liquefaction <i>T. Ishibashi, M. Noda, K. Tanaka, H. Ikemi, M. Kamata and M. Nakamura</i>	231
Assessing the Effects of Potential Liquefaction – A Practising Engineer's Perspective <i>E. E. Rinne</i>	245
SECTION 3: EXPERIMENTAL SOIL DYNAMICS	
Volume Change Behavior of Granular Soil Columns During Vibration <i>G. M. Norman-Gregory, E. T. Selig</i>	255
Cyclic Behavior of a Clay: Experiment and Modelling <i>W. Y. Sheu, N. Y. Chang</i>	269
Cyclic Triaxial Tests at Low Stresses for Parameter Determination <i>A. Bezuijen, A. G. I. Hjortnaes-Pedersen and F. Molenkamp</i>	283
Laboratory Prototype of In Situ Cyclic and Dynamic Geotechnical Testing System <i>R. Henke, W. Henke</i>	299
High Resolution Measurement of Shear Modulus of Clay Using Triaxial Vane Device <i>S. Pamukcu, J. N. Suhayda</i>	307
Model Tests for Earthquake Simulation of Geotechnical Problems <i>R. V. Whitman, H. Klapperich</i>	323
Experiments and Analysis for the Hysteresis Characteristics of Soil <i>A. Hara, Y. Kiyota, Y. Sakai, H. Takano and T. Aoyagi</i>	337
Shear Moduli and Damping Characteristics of Kosovo High Plasticity Clays <i>N. Dzeletović, T. Paskalov</i>	343
Numerical Modelling of Membrane Penetration Effects on Undrained Triaxial Tests <i>J. R. Raines, R. I. Borja, H. Anwar and R. B. Seed</i>	353
Cyclic Properties of Soils Within a Large Range of Strain Amplitude <i>P. Y. Hicher, M. S. El Hosri and M. Homsî</i>	365
