# contents

<i>Foreword</i> .....	VII
<b>NOMENCLATURE</b> .....	1
<b>GENERAL INTRODUCTION</b> .....	5

## Chapter 1 POROUS MEDIA

<b>Introduction</b> .....	9
<b>1.1. Porosity</b> .....	10
1.1.1. The measurement of porosity .....	10
1.1.2. Definition of connected and disconnected porosities .....	11
1.1.3. Specific cases: incoherent media, clay porosity .....	11
<b>1.2. The pore space: microscopic geometric analysis</b> .....	12
1.2.1. Methods for visualizing the pore space .....	12
1.2.2. Simple examples of pore geometries .....	13
1.2.2.1. Intergranular space in a packing of identical spheres .....	13
1.2.2.2. Ideal vuggy medium .....	15
1.2.3. Actual pore spaces .....	15
1.2.3.1. Choquette and Pray classification .....	15
1.2.3.2. Application of mathematical morphology to the description of porous media .....	18
1.2.3.3. Specific case of crack and fracture pore spaces .....	21
<b>1.3. The pore space: capillary approach</b> .....	22
1.3.1. Capillary equilibria: general discussion and definitions .....	22
1.3.2. Capillary pressure curves .....	24
1.3.3. Application of capillary pressure curves to porosimetry .....	26
1.3.4. Fluid distribution at the microscopic scale .....	29
1.3.4.1. Principles of the visualization of fluids in capillary equilibria .....	29
1.3.4.2. Application to the geometric description of pore networks .....	30

<b>1.4. Fluid flow in porous media . . . . .</b>	30
1.4.1. Case of a single fluid totally saturating a pore space: absolute or single-phase permeability . . . . .	31
1.4.1.1. Definition, units and measurements . . . . .	31
1.4.1.2. Characteristics of the pore space affecting permeability . . . . .	33
1.4.1.3. Porosity/permeability relationship in intergranular spaces . . . . .	35
1.4.2. Multiphase flows . . . . .	38
1.4.2.1. Concept of relative permeability . . . . .	38
<b>1.5. Problems of scale in porous media . . . . .</b>	40
1.5.1. Definition of minimum homogenization volume . . . . .	40
1.5.2. Minimum homogenization volume and physical behavior . . . . .	42
<b>1.6. Example of a natural porous medium: Fontainebleau sandstone . . . . .</b>	43
1.6.1. Solid skeleton . . . . .	43
1.6.2. Pore space . . . . .	43
1.6.2.1. Geometric characteristics . . . . .	43
1.6.2.2. Porosity/permeability relationship . . . . .	44
1.6.2.3. Total porosity/trapped porosity relationship . . . . .	47

## Chapter 2

### WAVE PROPAGATION IN SATURATED POROUS MEDIA

<b>Introduction . . . . .</b>	49
<b>2.1. Review of elastodynamics . . . . .</b>	49
2.1.1. Strain tensor . . . . .	49
2.1.2. Stress tensor and equilibrium equations . . . . .	52
2.1.3. Constitutive law of linear elasticity . . . . .	54
2.1.4. Linear elasticity and rock mechanics . . . . .	56
2.1.4.1. Linear elasticity . . . . .	56
2.1.4.2. Rock mechanics and effective moduli . . . . .	58
2.1.5. Wave propagation in an isotropic linear elastic medium . . . . .	59
2.1.5.1. Waves in 3D space . . . . .	59
2.1.5.2. 1D wave equation (elastic case) . . . . .	61
<b>2.2. Wave propagation in saturated porous media: Biot's theory . . . . .</b>	63
2.2.1. Assumptions . . . . .	64
2.2.2. Equations of movement . . . . .	66
2.2.2.1. Strain potential and stresses . . . . .	66
2.2.2.2. Gassmann's equation and Biot's theory . . . . .	67
2.2.2.3. Dissipation pseudo-potential . . . . .	69
2.2.2.4. Kinetic energy . . . . .	70
2.2.2.5. Equations of movement . . . . .	70

<b>2.2.3. Wave propagation . . . . .</b>	<b>72</b>
<b>2.2.3.1. Existence of a slow <math>P</math> wave . . . . .</b>	<b>73</b>
<b>2.2.3.2. Wave velocities and attenuations . . . . .</b>	<b>74</b>
<b>2.2.4. Biot's theory and Terzaghi's law . . . . .</b>	<b>81</b>
<b>2.2.5. Geerstma-Smit equations . . . . .</b>	<b>84</b>
<b>2.2.6. Experimental verification . . . . .</b>	<b>85</b>
<b>2.2.6.1. Qualitative aspects of Biot's model . . . . .</b>	<b>85</b>
<b>2.2.6.2. Experimental results . . . . .</b>	<b>88</b>
<b>2.3. Conclusions . . . . .</b>	<b>94</b>
<b>Appendix 2.1. Wave propagation in a non-isotropic elastic medium . . . . .</b>	<b>95</b>

### Chapter 3

#### WAVE PROPAGATION AND VIBRATION EFFECTS IN VISCOELASTIC MEDIA (unidimensional)

<b>Introduction . . . . .</b>	<b>99</b>
<b>3.1. Delayed behavior of materials . . . . .</b>	<b>100</b>
<b>3.1.1. Creep tests . . . . .</b>	<b>100</b>
<b>3.1.2. Relaxation tests . . . . .</b>	<b>101</b>
<b>3.2. Linear viscoelastic behavior . . . . .</b>	<b>102</b>
<b>3.3. Dynamics of unidimensional linear viscoelastic media, first concepts of the quality factor <math>Q</math> . . . . .</b>	<b>104</b>
<b>3.3.1. Complex modulus . . . . .</b>	<b>104</b>
<b>3.3.2. Harmonic problems . . . . .</b>	<b>105</b>
<b>3.3.3. Wave propagation . . . . .</b>	<b>107</b>
<b>3.3.3.1. Wave propagation and attenuation . . . . .</b>	<b>107</b>
<b>3.3.3.2. Variation in time of a free wave packet: group velocity and phase velocity . . . . .</b>	<b>108</b>
<b>3.3.4. Quality factor preliminary notions . . . . .</b>	<b>112</b>
<b>3.3.5. Example of application of viscoelastic modeling to porous media . . . . .</b>	<b>114</b>
<b>3.4. Important viscoelastic models . . . . .</b>	<b>117</b>
<b>3.4.1. Rheological models, new definitions of the quality factor . . . . .</b>	<b>117</b>
<b>3.4.2. Models defined from the quality factor . . . . .</b>	<b>123</b>
<b>3.4.2.1. NCQ model (Nearly Constant <math>Q</math>) . . . . .</b>	<b>123</b>
<b>3.4.2.2. CQ model (Constant <math>Q</math>) . . . . .</b>	<b>124</b>

<b>3.5. Vibrations in viscoelastic media .....</b>	128
3.5.1. Travelling waves and vibrations .....	128
3.5.2. Modal analysis .....	132
3.5.2.1. Normal modes .....	132
3.5.2.2. Forced vibrations and free vibrations .....	134
3.5.3. Definitions of the quality factor using vibrations .....	135
<b>3.6. Conclusions concerning the quality factor and final remarks .....</b>	139
<b>3.7. Conclusions .....</b>	141
<b>Appendix 3.1. The Kramers-Kronig relations.....</b>	142

#### Chapter 4

#### **EXPERIMENTAL TECHNIQUES FOR MEASURING VELOCITIES AND ATTENUATIONS**

<b>Introduction .....</b>	145
<b>4.1. Measurements using wave propagation .....</b>	146
4.1.1. Difficulties .....	146
4.1.2. Measurement principles and experimental techniques .....	148
4.1.2.1. Velocity measurements .....	148
4.1.2.2. Attenuation measurements .....	151
<b>4.2. Measurements using vibrating systems (standing waves) .....</b>	161
4.2.1. Difficulties .....	161
4.2.2. General principles .....	161
4.2.3. Experimental setups .....	163
4.2.3.1. Pendulums .....	163
4.2.3.2. Resonant bar .....	163
<b>4.3. Methods using stress/strain curves .....</b>	170
<b>4.4. Conclusions .....</b>	171

#### Chapter 5

#### **WAVE PROPAGATION IN POROUS MEDIA RESULTS AND MECHANISMS**

<b>Introduction .....</b>	175
<b>5.1. Results and mechanisms in the laboratory .....</b>	175
5.1.1. Velocities: results and mechanisms .....	176
5.1.1.1. Velocities and pressures .....	176

5.1.1.2.	Velocities and saturations . . . . .	187
5.1.1.3.	Velocities and temperatures . . . . .	193
5.1.1.4.	Velocities and frequency . . . . .	198
5.1.1.5.	Velocities and strains . . . . .	198
5.1.1.6.	Summary . . . . .	202
5.1.2.	Attenuations: results . . . . .	202
5.1.2.1.	Attenuations and pressures . . . . .	204
5.1.2.2.	Attenuations and saturations . . . . .	204
5.1.2.3.	Attenuations and temperatures . . . . .	207
5.1.2.4.	Attenuations and frequency . . . . .	211
5.1.2.5.	Attenuations and strains . . . . .	215
5.1.2.6.	Summary . . . . .	215
5.1.3.	Attenuations: mechanisms . . . . .	217
5.1.3.1.	Intergranular friction . . . . .	218
5.1.3.2.	Attenuation mechanisms in "dry" and very slightly saturated rocks . . . . .	218
5.1.3.3.	Attenuation mechanisms in partially or fully saturated rocks . . . . .	220
5.2.	Results and mechanisms concerning in situ measurements . . . . .	229
5.2.1.	Introduction . . . . .	229
5.2.2.	Velocities . . . . .	230
5.2.2.1.	In situ velocity measurements . . . . .	230
5.2.2.2.	Velocities and porosity . . . . .	230
5.2.2.3.	Velocities and density . . . . .	233
5.2.2.4.	Velocities and clay content . . . . .	233
5.2.2.5.	Velocities and compaction . . . . .	237
5.2.2.6.	$V_p/V_s$ and Poisson's ratio . . . . .	239
5.2.2.7.	Summary on in situ velocity measurements . . . . .	239
5.2.3.	Attenuations . . . . .	240
5.2.3.1.	In situ attenuation measurements . . . . .	240
5.2.3.2.	Results . . . . .	242
5.2.4.	Conclusions on in situ measurements . . . . .	242

## Chapter 6

### WAVES AND INTERFACES

Introduction . . . . .	245
6.1. Wave propagation in saturated porous media. Discontinuity effects . . . . .	245
6.1.1. Boundary conditions . . . . .	246
6.1.2. Wave reflections at the interface of two saturated porous media . . . . .	249
6.1.2.1. Case of normal incidence . . . . .	249
6.1.2.2. Analysis of reflection on the free surface of a semi-infinite saturated porous medium . . . . .	258

<b>6.1.3. Interface problems between porous saturated media. Application to acoustic logging . . . . .</b>	263
6.1.3.1. Interface waves . . . . .	263
6.1.3.2. Seismic source in the vicinity of a fluid/porous medium interface . . . . .	269
6.1.3.3. Conclusions . . . . .	281
<b>6.2. Reflection and transmission in viscoelasticity . . . . .</b>	283
6.2.1. Wave equation in viscoelastic media . . . . .	283
6.2.2. Energy balance and quality factor . . . . .	287
6.2.2.1. Energy balance . . . . .	287
6.2.2.2. Quality factor . . . . .	288
6.2.2.3. Constant $Q$ model in two dimensions . . . . .	288
6.2.3. Reflections and transmissions in two dimensions . . . . .	290
6.2.3.1. Theory . . . . .	290
6.2.3.2. Interface effect of attenuation . . . . .	295
6.2.4. Interface waves in viscoelastic media . . . . .	297
<b>6.3. General conclusion . . . . .</b>	298

## Chapter 7

### SOME APPLICATIONS IN PETROLEUM GEOPHYSICS

<b>Introduction . . . . .</b>	299
<b>7.1. Low frequency seismic prospecting . . . . .</b>	302
7.1.1. General . . . . .	302
7.1.2. Conventional seismic prospecting . . . . .	302
7.1.2.1. Combined use of $P$ and $S$ waves . . . . .	303
7.1.2.2. Signal analysis . . . . .	303
7.1.2.3. Three-component studies . . . . .	306
7.1.3. Reservoir seismics . . . . .	308
7.1.3.1. Variation in fluid phase or pore pressure . . . . .	309
7.1.3.2. Analysis of fractured zones . . . . .	310
<b>7.2. Full waveform acoustic logging . . . . .</b>	310
<b>BIBLIOGRAPHY . . . . .</b>	315
<b>AUTHOR INDEX . . . . .</b>	325
<b>SUBJECT INDEX . . . . .</b>	329
