104 Old setting, new gleam

New York's Penn Station is selling tickets electronically under a bright new canopy and seeking to sell modern development over old grandeur.

110 The odds on motels

They took in more than a million guests last night and are converting themselves into big business, often run by chains, sharply competing.

118 A handsome gas station

Brightly painted and hung on masts by Architects Smith & Williams.

120 Teahouse on stilts

Another roadside facility, the restaurant, is made into a "dream of man amid nature" by Architect Yoshimura at the "Motel on the Mountain."

124 Metropolitan government

New governmental authority is needed before big cities can really move into redevelopment, but care is needed in shaping the instruments.

128 Bright new home for justice

The promising Supreme Court of the Puerto Rican Commonwealth.

132 German architecture and American

A difference in economics, says Architect Peter Blake, reverses the approach of two countries to sharp and complete design.

136 Executive greenery

A gallery of ten rugged perennials that can live companionably with the careless male in his dry, drafty, plant-lonely office.

140 Updating the 1957 construction forecast

Belated federal corrections raising 1956 figures by \$1.8 billion make new figures necessary; but a 3% increase is still the 1957 prediction. Stores are the "hair in the butter."

142 Giant on the tracks

How to build a skyscraper without basement or ground floor: Union Carbide in New York by Architects Skidmore, Owings & Merrill.

146 Citizens make cities

John Osman of Ford Foundation tells how.

148 Moké in camouflage

By weaving with plywood, Architects Smith & Williams also weave together the indoor and outdoor elements of their office in Pasadena.

150 The crusade for clean air

Yearly some 50 million tons of man-made dirt raised into the air cost some \$2 billion. What the cities are doing about it. (For brief accounts of other developments in technology, see p. 161.)
