# The Chemistry of Soils

# Garrison Sposito

University of California at Berkeley

New York • Oxford OXFORD UNIVERSITY PRESS 1989

## Contents

#### 1 The Chemical Composition of Soils 3

- 1.1 Elemental Composition 3
- 1.2 Solid Phases in Soils
- 1.3 Trace Elements in Soil Minerals 10
- 1.4 Soil Air and Soil Water 12
- 1.5 Soil Mineral Transformations 13
  For Further Reading 17
  Problems 17
  Special Topic 1: Balancing Chemical Reactions 19

7

#### 2 Soil Minerals 22

- 2.1 Ionic Solids 22
- 2.2 Primary Silicates 27
- 2.3 Clay Minerals 31
- 2.4 Oxides and Hydroxides 35
- 2.5 Carbonates and Sulfates 37
- For Further Reading 39 Problems 39

#### 3 Soil Organic Matter 42

- 3.1 Biomolecules in Soils 42
- 3.2 Humic Substances 48
- 3.3 Cation Exchange Reactions 51
- 3.4 Reactions with Organic Molecules 56
- 35 Reactions with Soil Minerals 59
   For Further Reading 62
   Problems 62
   Special Topic 2: Film Diffusion Kinetics in Cation Exchange 64

#### Contents

#### 4 The Soil Solution 66

4.1 Sampling the Soil Solution 66
4.2 Soluble Complexes 68
4.3 Speciation Equilibria 72
4.4 Predicting Speciation 76
4.5 The Thermodynamic Stability Constant For Further Reading 82
Problems 83

#### 5 Mineral Solubility 86

79

5.1 Dissolution Reactions 86

- 5.2 Activity-Ratio Diagrams 90
- 5.3 Phosphate Fertilizer Reactions in Calcareous Soils 93
- 5.4 Gypsum in Acid Soils 96
- 5.5 Clay Mineral Weathering 99 For Further Reading 101 Problems 102

#### 6 Electrochemical Phenomena 106

6.1 The Concept of pE 106 6.2 Redox Reactions 109 6.3 pE-pH Diagrams 113 6.4 Flooded Soils 116 6.5 Measuring pE and pH 119 For Further Reading 122 Problems 122 Special Topic 3: Balancing Redox Reactions 124

#### 7 Soil Particle Surfaces 127

- 7.1 Surface Functional Groups 127
- 7.2 Adsorption 132
- 7.3 Surface Charge 134
- 7.4 Points of Zero Charge 137
- 7.5 Adsorbed Water 141 For Further Reading 145

## Problems 145

#### 8 Soil Adsorption Phenomena 148

8.1 Measuring Adsorption 148
8.2 Adsorption Kinetics and Equilibria 150
8.3 Metal Cation Adsorption 154

8.4 Anion Adsorption 157
8.5 Molecular Adsorption Models 160 For Further Reading 166 Problems 166

#### 9 Exchangeable Ions 170

9.1 Soil Exchange Capacities 170
9.2 Exchange Isotherms 173
9.3 Ion Exchange Reactions 175
9.4 Cation Exchange Equilibria 178
9.5 Cation Exchange Models 182
For Further Reading 184
Problems 184

#### 10 Soil Colloidal Phenomena 188

10.1 Colloidal Suspensions 188
10.2 Soil Colloids 190
10.3 Interparticle Forces 195
10.4 The DLVO Model 200
10.5 Adsorption Effects on Colloidal Stability 203
For Further Reading 205
Problems 206

#### 11 Soil Acidity 209

11.1 Proton Cycling 209
11.2 Exchangeable Acidity 213
11.3 Aluminum Chemistry 215
11.4 Redox Effects 218
11.5 Neutralization of Soil Acidity 220
For Further Reading 222
Problems 223

#### 12 Soil Salinity 226

12.1 Saline Soil Solutions 226
12.2 Cation Exchange and Colloidal Phenomena 228
12.3 Mineral Weathering 233
12.4 Boron Chemistry 236
12.5 Irrigation Water Quality 238
For Further Reading 242
Problems 242

16

X

#### Contents

### 13 Soil Fertility 246

- 13.1 Essential and Toxic Elements 246
- 13.2 Bioavailability 250
- 13.3 Nutrient Uptake Kinetics 253
- 13.4 Soil pE and pH Effects 256 For Further Reading 259 Problems 259

#### Appendix: Units and Physical Constants in Soil Chemistry 263

Index 269
