List of Contributors, vii

Preface, xi

About the Companion Website, xiii

## 1 What is a Coherent Flow Structure in Geophysical Flow?, 1

*Jeremy G. Venditti, Richard J. Hardy, Michael Church, & James L. Best*

## 2 Structure of Turbulent Boundary Layers, 17

*Ronald J. Adrian*

## 3 Structural Attributes of Turbulent Flow over a Complex Topography, 25

*Ricardo Mejia-Alvarez, Julio M. Barros, & Kenneth T. Christensen*

## 4 Coherent Flow Structures in the Pore Spaces of Permeable Beds underlying a Unidirectional Turbulent Boundary Layer: A Review and some New Experimental Results, 43

*Gianluca Blois, James L. Best, Kenneth T. Christensen, Richard J. Hardy, & Gregory H. Sambrook Smith*

## 5 Instabilities in Stratified Shear Flow, 63

*Gregory A. Lawrence, Edmund W. Tedford, & Jeffrey R. Carpenter*

## 6 Scalar Turbulence within the Canopy Sublayer, 73

*Gabriel G. Katul, Daniela Cava, Mario Siqueira, & Davide Poggi*

## 7 On the Structure of Wall Turbulence in the Thermally Neutral Atmospheric Surface Layer, 97

*Michele Guala, Jeff LeHew, Meredith Metzger, & Beverley J. McKeon*

## 8 Critical Reflections on the Coherent Flow Structures Paradigm in Aeolian Geomorphology, 111

*Bernard O. Bauer, Ian J. Walker, Andreas C.W. Baas, Derek W.T. Jackson, Cheryl McKenna Neuman, Giles F.S. Wiggs, & Patrick A. Hesp*

## 9 Coherent Flow Structures in Vegetated Channels, 135

*Heidi Nepf, Jeffrey Rominger, & Lijun Zong*

## 10 Coherent Eddy Structures over Plant Canopies, 149

*Roger H. Shaw, Edward G. Patton, & John J. Finnigan*

## 11 SPIV Analysis of Coherent Structures in a Vegetation Canopy Model Flow, 161

*Laurent Perret & Tony Ruiz*
