# CONTENTS

Three-dimensional computer graphics in geology Reinhard Pflug	xiii
Major issues in simulating geologic processes John W. Harbaugh	xv
<b>Chapter 1</b> <b>Modeling and rendering of structures</b>	1
Conversion of 3D grid into T-surfaces Y.G. Huang and J.L. Mallet	3
Rational splines and multidimensional geologic modeling T.R. Fisher and R.Q. Wales	17
3-D visualization of geologic structures and processes R. Pflug, H. Klein, Ch. Ramshorn, M. Genter and A. Stärk	29
An atlas of three dimensional functions J.F. Raper	41
Solid computational models of geological structures in boreholes S.M. Luthi	51
Three-dimensional reconstruction of pore geometry from serial sections: Image algebraic approach Y. Ohashi	63
Computer graphics techniques to represent volcanic hazard and risk M.T. Pareschi	77
3-D modeling of a complex fault pattern on an entry level 2-D workstation M. Verschuren	83
Computer modeling of surfaces: Structural geology applications M. Barchi, C. Federico, F. Guzzetti and G. Minelli	89

- Preliminary mass-balanced 3-D reconstructions of the Alps and surrounding areas during the Miocene  
W.W. Hay, C.N. Wold and J.M. Herzog 99

## Chapter 2

### Process simulation

- Stanford's SEDSIM project: Dynamic three-dimensional simulation of geologic processes that affect clastic sediments  
Y.-H. Lee and J.W. Harbaugh 113
- Three-dimensional simulation of littoral transport  
P.A. Martinez 129
- Modeling compaction and isostatic compensation in SEDSIM for basin analysis and subsurface fluid flow  
J. Wendebourg and J.W.D. Ulmer 143
- Landforms developing and basins filling: Three-dimensional simulation of erosion, sediment transport, and deposition  
J.C. Tipper 155
- 3D computer graphics in modeling pluton emplacement  
G. Guglielmo, Jr. 171

## Chapter 3

### Economic applications

- An interactive 3-D modeling system for integrated interpretation in hydrocarbon reservoir exploration and production  
T.J. Lasseter 189
- Direct geostatistical estimation of irregular 3D volumes  
S.W. Houlding, M.A. Stoakes and I. Clark 199
- Modeling of geological discontinuities for reserve estimation purposes at Neves-Corvo, Portugal  
E.J. Sides 213

- Three-dimensional predictive deposit modeling based on the linear octree data structure  
R. Prissang 229
- 3D-modeling of big stratiform deposits  
G.J. Peschel and J.U. Berthold 239
- Geostatistical modeling of geological layers and optimization of survey design for the Channel tunnel  
R. Blanchin and J.-P. Chilès 251
- Potential applications of three-dimensional geoscientific mapping and modeling systems to regional hydrogeological assessments at Yucca mountain, Nevada  
A.K. Turner and K.E. Kolm 257
- Three-dimensional modeling and geothermal process simulation  
K.L. Burns 271
- Application of rock-CAD modeling system in characterization of crystalline bedrock  
P. Saksa 285
- Subject Index** 295
