

Cretaceous of the Western Tethys

In 1979, the German Subcommission on Cretaceous Stratigraphy organized the first International Symposium on the Cretaceous. The focus of the symposium was on Germany and Central Europe. The proceedings were published in 1979. The second symposium was held in 1982 in Munich and

Proceedings of the 3rd International Cretaceous Symposium Tübingen 1987

The diversity of topics presented during the Tübingen Symposium can be grouped together in the following subtopics: (A) Cretaceous at the Western Mediterranean, including its transition to the North Atlantic; (B) The Alps, Carpathians, Dinarids, and Caucasus; (C) Cretaceous Biostratigraphy, Correlation, and Paleogeography; and (D) Volcanoes and Magnetotellurigraphy. I hope that this diversity will be appreciated by members of the Cretaceous community.

Publication of this volume was only possible with the continuous support of many people contributing in different ways such as reviewing present papers. I would like to express my gratitude to all of them, but above all to my friend FRANZ BIRKELUND (Bern), who was also responsible for the success of the symposium, as well as to HANS J. HANSEN and WALTER K. CHRISTENSEN (both Copenhagen), BRAD RAGEMAN (now Boulder, CO), KAI-UWE PROSS and WOLFGANG SCHRÖDER.

With 41 plates, 372 figures and 37 tables in the text and on 5 foldouts of this volume. This are the Deutsche Forschungsgemeinschaft and the Alexander von Humboldt Foundation. Last but not least, I would like to thank Dr. E. NÄGELE and his crew from Schweizerbart Editors for their great effort of this volume.

Tübingen, 1989
