Preface

xi

Chapter 1 Introductory and Background Material

1.1 Scope and Goals of the Text	1
1.2 Structure of the Neutral Atmosphere and the Ionosphere	4
1.3 The Earth's Magnetic Field and Magnetosphere	10
References	21

Chapter 2 Fundamentals of Ionospheric Plasma Dynamics

2.1 The Basic Fluid Equations	24
2.2 Steady-State Ionospheric Plasma Motions Due to Applied Forces	34
2.3 Generation of Electric Fields	41
2.4 Electric Field Mapping	42
2.5 Elements of Magnetospheric Physics	48
2.6 Coordinate Systems	62
References	62

Chapter 3 Electrodynamics of the Equatorial Zone

3.1 Motions of the Equatorial F Region: The Data Base	65
3.2 The Equatorial F-Region Dynamo	71
3.3 E-Region Dynamo Theory and the Daytime Equatorial Electrojet	83
3.4 Further Complexities of Equatorial Electrodynamics	92
3.5 Feedback between the Electrodynamics and the Thermospheric Winds	104
References	110

Chapter 4 Equatorial Plasma Instabilities

4.1 F-Region Plasma Instabilities: Observations	113
4.2 Development and Initiation of Equatorial Spread F	121
4.3 Nonlinear Theories of ESF	135
4.4 Short Wavelength Waves in Equatorial Spread F	143
4.5 ESF Summary	154
4.6 E-Region Plasma Instabilities: The Observational Data Base	154
4.7 Linear Theories of Electrojet Instabilities	167
4.8 Nonlinear Theories of Electrojet Instabilities	174
4.9 Future Directions	182
References	182

Chapter 5 The Mid-Latitude Ionosphere

5.1 Competing Influences on the Tropical and Mid-Latitude Ionospheres	187
5.2 Electrodynamics of the Tropical and Mid-Latitude Zone	197
5.3 Irregularities in the Mid-Latitude Ionosphere	219
5.4 Mid-Latitude Plasma Instabilities	238
References	257

Chapter 6 High-Latitude Electrodynamics

6.1 Electrical Coupling between the Ionosphere, Magnetosphere, and Solar Wind	261
6.2 Observations of Ionospheric Convection	273
6.3 Simple Models of Convection in the Magnetosphere	284
6.4 Empirical and Analytic Representations of High-Latitude Convection	291
6.5 Observations of Field-Aligned Currents	296
6.6 Horizontal Currents at High Latitudes	304
References	309

Chapter 7 Effects of Plasma Flow at High Latitudes

7.1 Ionospheric Effects of Parallel Plasma Dynamics	311
7.2 Ionospheric Effects of Perpendicular Plasma Dynamics	322
7.3 Electrodynamical Forcing of the Neutral Atmosphere	333
7.4 Summary	341
References	342

Chapter 8 Instabilities and Structure in the High-Latitude Ionosphere

8.1 Planetary and Large-Scale Structures in the High-Latitude F Region	345
8.2 Intermediate-Scale Structure in the High-Latitude F Region	369
8.3 Small-Scale Waves in the High-Latitude F Region	390
8.4 Plasma Waves and Irregularities in the High-Latitude E Region—Observations	396

8.5 Auroral Electrojet Theories	406
8.6 Summary	419
References	419

Appendix A Ionospheric Measurement Techniques

A.1 Radio Wave Techniques in Ionospheric Physics	425
A.2 <i>In Situ</i> Measurements	437
References	455

Appendix B Reference Material and Equations

B.1 Atmospheric and Ionospheric Structure	459
B.2 Miscellaneous Formulas	465
B.3 Surface Magnetic Field Measurements and Magnetic Activity Indices	467
References	471
