

Engineering Geomorphology

Theory and Practice

P. G. Fookes

Consulting Engineering Geologist and Distinguished Research Associate,
Oxford University, UK

E. M. Lee

Consulting Engineering Geomorphologist, York, UK, and

J. S. Griffiths

Professor of Engineering Geology and Geomorphology and Head of School of Earth, Ocean and
Environmental Sciences, University of Plymouth, UK

Whittles Publishing

CRC Press
Taylor & Francis Group

Contents

Foreword	vii
Prologue	ix
Preface	xi
Acknowledgements.....	xiii

Part 1: Landform Change

1. Geomorphology and Engineering.....	1
2. The Impetus for Change: Energy Inputs and Geomorphological Activity.....	6
3. The Basics of Change: Stress, Strain and Strength	15
4. Earth Surface Systems.....	19
5. The Behaviour of Earth Surface Systems	24
6. System Controls: Geology.....	30
7. System Controls: Engineering Soils.....	39
8. System Controls: Mobile Sediments.....	49
9. System Controls: Climate Variation	54
10. System Controls: Sea-level Change	61
11. The Nature of Change: Rates and Events	69
12. The Implications of Change: Hazards and Risks.....	74
13. The Implications of Change: Construction Resources.....	81
14. The Implications of Change: Environmental Impacts.....	86

Part 2: Slopes

15. The Supply of Water and Sediment.....	90
16. The Role of Water.....	96
17. Soil Erosion by Water	100
18. Wind Erosion and Deposition.....	106
19. Landslides	113
20. Landslide Hazard and Risk	121
21. Karst Terrain	131

Part 3: Rivers

22. The Drainage Basin	136
23. Water and Sediment Loads	146
24. Channel Form	152
25. Channel Change	160
26. Flooding.....	164
27. Flood Hazard and Risk.....	168

Part 4: The coast

28. Energy Inputs.....	175
29. Sediment Cells and Budgets.....	182
30. Hazard and Risk Assessment.....	190
31. Estuaries, Mudflats and Saltmarshes	197
32. Deltas	207
33. Fringing Beaches	213
34. Barrier Beaches	218
35. Dunes.....	225
36. Cliffs.....	229

Part 5: Investigation techniques

37. Methods of Investigation.....	235
38. Desk Study and Initial Terrain Models.....	242
39. Satellite Imagery and Aerial Photographs.....	248
40. Analysis of Change.....	252
41. Terrain Evaluation.....	258
42. Geomorphological Mapping.....	264
43. Uncertainty and Expert Judgement.....	267
Key References.....	271
Index.....	275
