

Fundamentals of Engineering Geology

F G Bell

Butterworths

London · Boston · Durban · Singapore · Sydney · Toronto · Wellington

Contents

	Preface	
1	Igneous rocks	1
2	Metamorphism and metamorphic rocks	48
3	Sedimentary rocks and stratigraphy	69
4	Geological structures: folds and faults	121
5	Discontinuities	165
6	Groundwater	211
7	Geomorphological processes I	258
8	Geomorphological processes II	320
9	The mechanics of soils	373
10	Soil types and their engineering behaviour	435
11	Mechanical properties of rocks	488
12	Geotechnical description and classification of rocks and rock masses	528
13	Engineering performance of rocks	555
14	Photogeology and maps for engineering purposes	592
	Appendix 1	636
	Appendix 2	638
	Index	642
