Fuzzy Logic in Geology

Edited by Robert V. Demicco and George J. Klir
with contributions by 30 international scholars in geology, environmental science,
and related sciences in engineering, medicine, and other disciplines.

This book presents the state-of-the-art in fuzzy logic applications in geology and environmental science. It is intended for researchers, students, and professionals in geology, environmental science, and related fields who are interested in the application of fuzzy logic to their discipline.
