

IGNEOUS PETROGENESIS

Marjorie Wilson

Department of Earth Sciences, University of Leeds

London

UNWIN HYMAN

Boston Sydney Wellington

CONTENTS

PREFACE	vii	2.3 Chemical variation diagrams	14
ACKNOWLEDGEMENTS	ix	2.4 Geochemical characteristics of primary magmas	21
LIST OF TABLES	xv	2.5 Isotopes as petrogenetic indicators	22
SOME COMMON ABBREVIATIONS USED IN THE TEXT	xix	2.6 Geochemical criteria for the identification of the palaeotectonic setting of ancient volcanic sequences	32
		Further reading	34
PART ONE		CHAPTER THREE	
Magmatism and global tectonic processes	1	<i>Partial melting processes in the Earth's upper mantle</i>	37
CHAPTER ONE		3.1 Introduction	37
<i>Relation of present-day magmatism to global tectonic processes</i>	3	3.2 The physical state of the upper mantle	38
1.1 Introduction	3	3.3 Chemical composition and mineralogy of the upper mantle	44
1.2 Characteristic magma series associated with specific tectonic settings	7	3.4 Partial melting processes in the upper mantle	58
Further reading	11	3.5 The basaltic magma spectrum in relation to partial melting processes	67
CHAPTER TWO		3.6 Segregation and ascent of magma	70
<i>Geochemical characteristics of igneous rocks as petrogenetic indicators</i>	13	Further reading	72
2.1 Introduction	13	CHAPTER FOUR	
2.2 Chemical analysis of igneous rocks	14	<i>Processes which modify the composition of primary magmas</i>	73
		4.1 Introduction	73
		4.2 Convection and mixing in magma chambers	78

4.3 Fractional crystallization	82	processes	159
4.4 Crustal contamination	89	6.6 Segregation, ascent and storage of magma	162
4.5 Zone refining	96	6.7 Characteristic magma series	164
4.6 Liquid immiscibility	97	6.8 Spatial and temporal variations in island-arc magmatism	167
4.7 Gaseous transfer processes	97	6.9 Surface volcanic features	168
Further reading	97	6.10 Petrography of island-arc volcanic rocks	169
PART TWO		6.11 Chemical composition of erupted magmas	172
Magmatism at constructive plate margins	99	6.12 Detailed petrogenetic model	188
		Further reading	190
CHAPTER FIVE		CHAPTER SEVEN	
<i>Mid-ocean ridges</i>	101	<i>Active continental margins</i>	191
5.1 Introduction	101	7.1 Introduction	191
5.2 Simplified petrogenetic model	104	7.2 Simplified petrogenetic model	196
5.3 Nature of the oceanic crust	106	7.3 The structure of active continental margins	198
5.4 Structure of mid-ocean ridges	110	7.4 Thermal structure and partial melting processes	201
5.5 Heat flow and metamorphism	119	7.5 Magma storage in the crust	203
5.6 Convection systems at constructive plate margins	124	7.6 Petrographic characteristics of the volcanic and plutonic rocks	206
5.7 Partial melting processes	125	7.7 Chemical composition of the magmas	208
5.8 Magma storage and release	126	7.8 Detailed petrogenetic model	223
5.9 Petrography of mid-ocean ridge basalts	129	Further reading	225
5.10 Chemical composition of erupted magmas	132		
5.11 Detailed petrogenetic model	145		
Further reading	149		
PART THREE		CHAPTER EIGHT	
Magmatism at destructive plate margins	151	<i>Back-arc basins</i>	227
CHAPTER SIX		8.1 Introduction	227
<i>Island arcs</i>	153	8.2 Simplified petrogenetic model	229
6.1 Introduction	153	8.3 Petrography of the volcanic rocks	231
6.2 Simplified petrogenetic model	154	8.4 Chemical composition of the erupted magmas	231
6.3 Structure of island arcs	157	8.5 Detailed petrogenetic model	239
6.4 Earthquakes and magma genesis	158	Further reading	241
6.5 Thermal structure and partial melting			

PART FOUR

Magmatism within plates	243	CHAPTER ELEVEN	
		<i>Continental rift zone magmatism</i>	325
		11.1 Introduction	325
		11.2 Simplified petrogenetic model	332
		11.3 Crust and upper mantle structure	335
		11.4 Petrography of the volcanic rocks	339
		11.5 Chemical composition of the erupted magmas	342
		11.6 Detailed petrogenetic model	371
		Further reading	374
CHAPTER NINE		CHAPTER TWELVE	
<i>Oceanic islands</i>	245	<i>Potassic magmatism within continental plates</i>	375
9.1 Introduction	245	12.1 Introduction	375
9.2 Simplified petrogenetic model	250	12.2 Simplified petrogenetic model	380
9.3 Crustal structure of oceanic islands	253	12.3 Partial melting processes in the upper mantle	384
9.4 Partial melting processes	255	12.4 Petrographic characteristics of kimberlites and ultrapotassic rocks	388
9.5 High-level magma storage	256	12.5 Chemical composition of kimberlites and ultrapotassic rocks	391
9.6 Petrography of oceanic-island volcanic rocks	258	12.6 Detailed petrogenetic model	411
9.7 Chemical composition of erupted magmas	261	Further reading	416
9.8 Detailed petrogenetic model	282		
Further reading	285		
CHAPTER TEN		APPENDIX	417
<i>Continental tholeiitic flood basalt provinces</i>	287	<i>Approximate ranges of D values for the partitioning of trace elements between the common rock-forming minerals and liquids of basic-intermediate composition</i>	
10.1 Introduction	287	BIBLIOGRAPHY	423
10.2 Simplified petrogenetic model	291	INDEX	457
10.3 Crustal structure and magma storage reservoirs	294		
10.4 Crustal contamination of magmas	295		
10.5 Petrography of the volcanic rocks	296		
10.6 Chemical composition of the erupted magmas	298		
10.7 Detailed petrogenetic model	321		
Further reading	323
