Contents

Foreword

Introduction

The perception of Man's geomorphological activity

From Marsh to Sherlock

From Sherlock to Brown

Demographic, social, and economic factors in anthropic geomorphology

The concept of "steady state" in geomorphology

The landscape as a system

The "steady state" in geomorphology

Man's intervention in the steady state

Chapter 1: Man and Forest

The clearing of forests

The purpose and effects of forest clearing

Destruction of forest by fire

Clearing of forest by cutting

Biostasy versus rhexistasy

Change of soil profile by forest clearing

Effects on permeability and density

Effects of vegetation clearing on the soil salinity

Effects of destruction of tropical forest: accelerate lateralization

Erosion in deforested areas

Topographical and climatic conditions

Effects of deforestation on the erosion of slopes

Deforestation and sedimentation

Chapter 2: Pasture and Grazing	33
Introduction	33
Problems of overgrazing	34
The ratio of livestock/grazing area	34
The paths followed by the gathering of animals	34
Geomorphological effects of overgrazing	35
Chapter 3: Geomorphology of Agriculture	37
Metapedology	37
Techniques of soil cultivation	38
Ploughing	38
Terracing	40
The geomorphological effects of irrigation	49
The extent of irrigation	49
Salination caused by irrigation	49
Subsidence of soil as a result of water extraction	50
Changes in sediment transportation and in rivers' regime	51
Effects of drainage in geomorphological processes	52
Erosion of tilled soil	54
"Normal" versus "accelerated" erosion	54
The soil-loss equation	56
Wind erosion of tilled soils	57
Tilled soil and frost morphology	58
Some estimates of the rate of soil erosion	59
Soil conservation	59
Conservation by contour ploughing	59
Control of gullies	61
Use of fertilizers	61
Chapter 4: Mining and its Implications	63
Introduction	63
Open pit and strip mining	64
Open pit mining of coal	64
Effects of dredging for and washing of gold-bearing deposits	67
The effects of subsurface mining	68
Subsidence of the surface	68
The impact of injecting liquids into the ground	69
Subsidence above mines — an economic problem?	69
Quarrying of gravel, sand, and stone	69
Morphology of tips and dumps: potential instability of artificial slopes	71

Reclamation of derelict land	72
Cost and means of reclamation	72
Uses of reclaimed areas	73
Chapter 5: Means of Transportation	75
Roads and highways	75
Introduction	75
Geomorphological effects of road building	76
Erosion by highways	82
Railways	83
Bridges	84
Airfields and airports	86
Waterways	87
Inland waterways	87
Erosion of canal banks	89
Canals through isthmuses	89
Pipelines	90
Chapter 6: Riverbed Management	93
Introduction	93
Changing rivers by regulation	93
Dikes and levees	94
Shortening rivers by channels	95
Dams	96
Introduction	96
Dams as factors of accelerated erosion	97
Dams' influence on the distribution of sediment	98
Seismic effects of dams	98
Changes of water courses and sedimentation rates	102
Chapter 7: Shore Management	103
Introduction	103
Protection of coasts against erosion	104
Seawalls	104
Groynes	104
Coast protection by improvement of the dunes	106
Changes in the coastline resulting from extraction of materials	106
Harbors	107
Reclamation of land from the sea	108
Introduction	108

Reclamation of land from the sea in The Netherlands	108
Reclamation of land from the sea in the United Kingdom	109
Chapter 8: Geomorphology of Settlement	113
Introduction	113
Demography and the urban area	113
Man-made changes in urban topography	114
Stages in the environmental impact of built-up areas	117
Morphology of the "construction" period	120
Runoff and stream discharge	120
Soil erosion	120
Sedimentation	121
Geomorphology of the developed urban environment	124
Runoff and stream discharges	124
Erosion and sedimentation	127
Hydrology of developed urban environment	128
Geomorphological management of urban areas	130
Chapter 9: In Conclusion	131
Methods of research	131
Rates of anthropogeomorphological processes	132
Towards a model in anthropogeomorphology	134
Introduction	134
The degree of development	135
The degree of perception	136
A quantitative measure of Man's influence on the AGP	138
Integration of the human and the environmental factors	139
Appendix: The Influence of Warfare	143
Bibliography	145
Index	157
