PREFACE	IX
1 MATHEMATICS IN APPLIED RESEARCH	1
2 PROBLEMS OF MODELLING	7
2.1 Concepts and contents of models	7
2.1.1 Internal (esoteric) aspect	8
2.1.2 External (exoteric) aspect of reality	11
2.2 Role of observations and facts	13
2.3 Language of description	14
2.4 Aims and details of description	16
3 MODELS OF PHENOMENA	19
3.1 Modelling of natural processes	19
3.1.1 Dynamical models	21
3.1.2 Structural models	38
3.1.3 Probabilistic models	45
3.1.3.1 Models of stochastic dispersion	46
3.1.3.2 Models of phenomena with random perturbation	53
3.2 Models of phenomena with human participation	63
3.2.1 Models of controlled processes	63
3.2.2 Models of uncontrolled processes	78
4 MODELS IN TERMS OF PROCESSES	82
4.1 Model of factor (component) analysis	83
4.2 Decomposition of functions into empirical orthogonal components	89
4.3 Models of periodic processes	93
4.3.1 Decomposition into harmonic components	93
4.3.1.1 Spectral analysis	94
4.3.1.2 Second approach	97
4.3.2 Models of seasonal processes	102
4.4 Autoregression models	106

4.5 Models of spatial filtering	110
4.5.1 General	110
4.5.1.1 Geologic foundations of modelling	111
4.5.1.2 Mathematical foundations of modelling	113
4.5.2 Mathematical model of spatial filtering	114
<b>5 MODELS OF OBJECTS</b>	<b>126</b>
5.1 Modelling the varying size and properties of homogeneous objects	127
5.2 Modelling relationships between properties of objects	130
5.2.1 Variance analysis	131
5.2.2 Regression analysis	133
5.2.3 Covariance analysis	141
5.3 Models for spatial variation of properties of geologic objects	143
5.3.1 Models of spatial variability in solution of exploratory tasks	144
5.3.1.1 Regression	145
5.3.1.2 Smoothing	146
5.3.2 Models of spatial variability in solution of estimation tasks	148
5.3.2.1 Models employed in oil geology	149
5.3.2.2 Models employed in ore geology	157
5.4 Classification models for geologic objects	162
5.4.1 Characteristics of models	163
5.4.2 Statistical (analytical) methods	166
5.4.2.1 Discrimination analysis	166
5.4.2.2 Cluster analysis	172
5.4.3 Fuzzy methods	175
5.4.4 Linguistic methods	177
<b>6 ANALYSIS OF MODELS</b>	<b>179</b>
6.1 Analysis of differential equations	179
6.2 Estimation of dynamic characteristics of stochastic models and parameters of statistical distributions	181
6.3 Estimation of model parameters	185
6.3.1 Models of linear systems	186
6.3.1.1 Deterministic approach	186
6.3.1.2 Statistical approach	187
6.3.2 Models of nonlinear systems	190
<b>CONCLUDING REMARKS</b>	<b>194</b>
<b>REFERENCES</b>	<b>198</b>
