PREFACE

vii

Chapter 1

Introduction

MOUNTAINS AND HUMAN AFFAIRS

1

MOUNTAINS AND THE CONCEPTS OF MECHANICS

2

Chapter 2

Strains and Displacements

3

LINEAR STRAIN

5

Summation and Integral Forms 7

Strain Rate 7

Logarithmic Strain 8

Stretch 8

Change of Area and Volume 9

Rates of Change 10

Conservation of Area and Volume 10

Spread Ratio 11

Variation of Linear Strain with Direction 13

Homogeneous Strain 13

Principal Axes 14

Lines Inclined to the Axes 15

Summary 16

SHEAR STRAIN

16

Distinction from Rotation 18

Variation of Shear Strain with Direction 19

Maximum Shear Strain 20

Summary 23

LAMINAR MATERIALS

24

Cumulative Shear Strain 24

Slip Surfaces 25

ix

Linear Strain in Laminar Behavior	26
Comparison with Coaxial Deformation	27
Summary	29
CHANGE OF STRAIN FROM POINT TO POINT	30
Folding	30
Circular Arcs	33
Summary	34
Surface Waves	34
THE MOHR CIRCLE AND PARTITION OF STRAIN	36
The Mohr Circle	37
Change of Area, Change of Shape	38
Change of Volume	39
Summary	41
ANSWERS	41
Chapter 3	
<i>Forces and Stresses</i>	51
RELATING FORCES AND PRESSURES TO DAILY EXPERIENCE	53
RELATING PRESSURE TO DEPTH	54
Instability: Vertical Columns in Parallel but Mismatched	55
Isostasy	56
FORCE BALANCE, WEIGHT VERSUS PRESSURE	57
Forces Vertical	57
Forces Parallel to a Slope	58
Application to Glaciers	58
Forces Vertical, Pressures Partitioned over Two Areas	59
Weighted Mean Pressure	60
Generalization	61
Weighted Mean	62
FORCE BALANCE, SHEAR STRESS VERSUS WEIGHT	62
Force Balance, One Shear Stress and Weight	63
Force Balance, Two Shear Stresses and Weight	64
FORCE BALANCE, SHEAR STRESS VERSUS PRESSURE	65
FORCE BALANCE: SHEAR STRESS, WEIGHT, AND PRESSURE	67
Force Balance with Moving Body	67
Vertical Torpedo, or Submerged Vertical Pencil	67
Pyrenees	69
SUMMARY AND GENERALIZATIONS	71
STRESSES AT AN INTERFACE	74
Three Dimensions	76
Planes Oblique to Each Other	77
CHANGE OF STRESS FROM POINT TO POINT	77
Stress Fields	78
The Stress Field in a Fluid at Rest in a Gravity Field	78

The Stress Field in a Fluid Subject to Gravity Plus Extra Horizontal Compression	79
The Stress Field Beneath an Undulating Topography	79
Summary	81
ANSWERS	81
Chapter 4	
<i>Variation of Stress with Direction</i>	89
STRESS ON OBLIQUE PLANES	91
The Calculation Process	92
Stresses at a Point	92
Area Ratios	92
Summary	95
MOHR CIRCLE AND SINE-WAVE DIAGRAM FOR STRESSES	95
Summary of Stress Relations	98
Connection with Mohr Circle	98
REFRACTION OF STRESS	98
Generalizations	100
STRESS RELATIONS IN THREE DIMENSIONS	100
ANSWERS	101
Chapter 5	
<i>Rheology: Relations Between Forces and a Material's Response</i>	111
SHEAR STRESS, SHEAR STRAIN, AND VISCOSITY	113
Is "Plate Tectonics" True?	115
Summary and Comment	116
Relation of GTU and GUV to Standard Units	116
NORMAL STRESSES AND LINEAR STRAINS	117
Shale and Limestone Layers Spreading at Different Rates	121
Coherent and Incoherent Interfaces	121
Summary and Comment	123
A ROCK HAS VARIABLE VISCOSITY	123
Variation in Shear Stress	124
Summary	127
PRINCIPAL STRESS INCLINED TO AN INTERFACE	127
Refraction	129
Observables at an Interface	130
Refraction of Cleavage	130
ALTERNATING MULTILAYERS AND ANISOTROPY	131
Summary	134
Angular Relations	134
STRAIGHT-LIMBED FOLDS	135
Rounded Folds and Saddle Reefs	137
Behavior of Multilayers	138

CHANGE OF VOLUME	140
Permeability	143
Flow Rates	144
Permeability and Darcy's Law	145
Nonuniform Pressure Gradients	147
Column of Sediment	147
Generalization	149
Solution Transfer	150
Direction of Shortening and Direction of Escape	150
Special Cases	152
Summary	154
ANSWERS	155
 Chapter 6	
Parting	167
TWO KINDS OF PARTING: THE FAILURE ENVELOPE	169
Experimental Arrangements	169
Stress Magnitudes	173
ATTITUDES OF FAULTS AND FRACTURES	174
INHOMOGENEOUS ROCK AND THRUST SHEETS	175
Slip on Bedding Planes	175
Tapered Slab	176
Wedge-Shaped Thrust Sheets	177
Wedge with Inclined Base	179
EFFECT OF PORE FLUID ON PARTING	183
Tensile Parting	183
Hydrofracture and Vein Formation	184
Shear Parting	187
A Rock's Response Affects Its Properties	189
Effective Stress	190
Tensile Parting	190
Shear Fracture	190
Effective Coefficient of Friction	191
Summary	192
ANSWERS	193
 Chapter 7	
Concurrent Fracture and Flow	205
LINKS BETWEEN THE PROCESSES	207
Change of Temperature and Pressure	208
Summary	208
A MOHR DIAGRAM FOR FLOW BEHAVIOR	209
Stress Points	209
Failure Envelope Using Stress Points	209
Flow Behavior Using Stress Points	210
Summary	212

EFFECT OF PORE FLUID ON FLOW BEHAVIOR	212
Effect of Fluid Pressure on Behavior	213
First Example: Strike-Slip Regime	213
Flow Rates	216
Summary	217
Effect of Fluid Composition and Amount	217
A Changing Population of Microfractures	218
Fluid Amount and Microfracturing	219
CONCLUDING EXAMPLE: THE PYRENEES	220
Assembling the Parts	221
Source of the Fluid	222
A Unified Mechanics	224
Fluid Pulses and Dilation	226
Review and Summary	227
ANSWERS	230
 APPENDICES	
A. LIST OF ABBREVIATIONS	233
B. PRECISION AND SIGNIFICANT FIGURES	235
C. WEIGHTS AS UNITS OF FORCE	237
D. EXPERIMENTAL WORK ON ROCK DEFORMATION	239
E. BOOKS ON RELATED MATERIAL	243
 INDEX	245
 UNITS	(see inside back cover)
