

# Mediterranean Mountain Environments

Edited by

**Ioannis N. Vogiartzakis**

*School of Pure and Applied Sciences, Open University of Cyprus, Nicosia, Cyprus*

This book is the first to offer a comprehensive overview of the mountain environments of the Mediterranean basin. It covers all major aspects of mountain ecology, from the highest peaks to the coastal areas, and includes chapters on the biology of plants and animals, soil science, hydrology, glaciology, geomorphology, meteorology, and climatology. The book is divided into four main parts: Part I: The Alpine Environment, Part II: The Mediterranean Environment, Part III: The Alpine Environment, and Part IV: The Alpine Environment. The book is intended for students, researchers, and practitioners in the fields of environmental science, geography, and ecology.

	CONTENTS	PAGES
8.4	Recent land use changes	Geological setting 167
8.5	Discussion	Soil characteristics of Mediterranean landscapes 173
8.6	Northern Mediterranean mountain landscapes: from the Pyrenees to the Alps	Northern Mediterranean mountains: the Pyrenees 178
		Himalayas 178
		Eastern Mediterranean mountains: the Lebanon Mountains 179
		Southern Mediterranean mountains: Italy, Mountains and Alpine People 179
9.1	Climate change and its impact	Climate and hydrology 185
D. Nogués-Bravo, A. Caneiro, M. J. Llorente, J. M. Moreno, I. P. Moreno, J. M. Rodríguez, J. Sánchez, J. Solà, J. Vayreda, J. Vilà, J. Vives		Climate change in the Mediterranean environment 185
E.2	Introduction	Climate as a tool to predict future climate 186
E.2	Climate change in Mediterranean mountains	Climate and hydrology 186
