Microtectonics

With 254 Figures

Springer

Contents

1 A Framework of Microtectonic Studies	1
1.1 Introduction	1
1.2 Establishing and Interpreting Deformation Phases	3
1.3 Deformation Phases and Metamorphic Events	5
2 Flow and Deformation	7
2.1 Introduction	7
2.2 Terminology	7
2.3 Description and Reconstruction of Deformation	7
2.4 Reference Frames	8
2.5 Homogeneous and Inhomogeneous Flow and Deformation	11
2.5.1 Introduction	11
2.5.2 Numerical Description of Homogeneous Flow and Deformation	13
2.6 Deformation and Strain	17
2.7 Progressive and Finite Deformation	18
2.8 Flow and Deformation in Three Dimensions	19
2.9 Fabric Attractor	19
2.10 Application to Rocks	20
2.11 Stress and Deformation	20
2.12 Rheology	21
3 Deformation Mechanisms	25
3.1 Introduction	25
3.2 Cataclastic Flow	25
3.3 Pressure Solution	26
3.4 Intracrystalline Deformation	29
3.5 Twinning	31
3.6 Recovery	32
3.7 Recrystallisation	36
3.7.1 Grain Boundary Migration Recrystallisation	36
3.7.2 Subgrain Rotation Recrystallisation	36
3.7.3 Competing Processes During Deformation	40
3.8 Solid-State Diffusion Creep	40
3.9 Grain Boundary Sliding and Superplasticity	41
3.10 Grain Boundary Area Reduction (GBAR)	43
3.11 Static Recrystallisation	45
3.12 Deformation of Some Rock-Forming Minerals	48
3.12.1 Introduction	48
3.12.2 Quartz	48
3.12.3 Calcite and Dolomite	48

3.12.4	Feldspars	49
3.12.5	Micas	50
3.12.6	Olivine	50
3.12.7	Orthopyroxene	50
3.12.8	Clinopyroxene	51
3.12.9	Amphiboles	51
3.13	Deformation of Polymineralic Rocks	51
3.13.1	Introduction	51
3.13.2	Quartz-Feldspar Aggregates	52
3.13.3	Deformed Igimbrites	53
3.14	Flow Laws and Deformation Mechanism Maps	53
4	Foliations, Lineations and Lattice Preferred Orientation	57
4.1	Introduction	57
4.2	Foliations	58
4.3	Primary Foliation	59
4.4	Diagenetic Foliation	61
4.5	Secondary Foliations	61
4.6	Morphology of Foliations	63
4.7	Continuous Foliation	64
4.8	Spaced Foliation	65
4.9	Mechanisms of Foliation Development	69
4.9.1	Introduction	69
4.9.2	Mechanical Rotation of Tabular or Elongate Grains.	69
4.9.3	Solution Transfer	70
4.9.4	Crystalplastic Deformation	74
4.9.5	Dynamic Recrystallisation and Related Processes	75
4.9.6	Mimetic Growth	76
4.9.7	Oriented Growth Defined by a Stress Field	77
4.9.8	Microfolding	77
4.10	Geological Context of Foliation Development	78
4.10.1	Foliations and Folds	78
4.10.2	Foliations and The XY Plane of Tectonic Strain	78
4.10.3	Foliations, Strain and Volume Change	82
4.10.4	Foliations, Lithotype and Metamorphic Conditions	83
4.11	Practical Use of Foliations	84
4.11.1	Introduction	84
4.11.2	Overprinting Relations	86
4.12	Lattice-Preferred Orientation (LPO)	88
4.13	Origin of Lattice-Preferred Orientation	89
4.14	Presentation of LPO Data	90
4.15	LPO Patterns of Quartz	92
4.15.1	Introduction	92
4.15.2	The Effects of Strain and Recrystallisation	93
4.15.3	Shear Sense Determination Using Quartz Fabrics	95
4.16	LPO Patterns of Other Minerals	95
5	Shear Zones	97
5.1	Introduction	97
5.2	Brittle Fault Rocks	98
5.2.1	Incohesive Fault Rocks	98
5.2.2	Cohesive Fault Rocks	99
5.2.3	Pseudotachlyte	99

5.3 Mylonite	102
5.3.1 Introduction	102
5.3.2 Characteristic Fabric Elements	103
5.3.3 Mylonite Classification	106
5.3.4 Dynamics of Mylonite Development	106
5.3.5 Mylonite and Metamorphic Conditions	106
5.4 Complex Fault Rocks	108
5.5 Sense of Shear	109
5.5.1 Introduction	109
5.5.2 Displacement and Deflection of Markers	109
5.5.3 Foliation Curvature	109
5.6 Microscopic Shear Sense Indicators in Mylonite	110
5.6.1 Introduction	110
5.6.2 Foliation Orientation	110
5.6.3 Oblique Foliations	111
5.6.4 Shear Band Cleavages	111
5.6.5 Mantled Porphyroclasts	115
5.6.6 Development of Mantled Porphyroclasts	116
5.6.7 Mica Fish	121
5.6.8 Quarter Structures	123
5.6.9 Lattice-Preferred Orientation	124
5.6.10 Vergence of Asymmetric Fold Sections	124
5.6.11 Potential Shear Sense Markers	124
5.7 Shear Sense Indicators in the Brittle Regime	128
5.7.1 Introduction	128
5.7.2 Incohesive Brittle Fault Rocks	128
5.7.3 Cohesive Brittle Fault Rocks	128
5.7.4 Pseudotachylite	129
6 Dilatation Sites: Vibrous Veins, Strain Shadwos, Strain Fringes and Boudins	131
6.1 Introduction	131
6.2 Fibrous Veins	133
6.2.1 Introduction	133
6.2.2 Curved Fibres and Fibre Growth Direction	136
6.2.3 Veins in Non-Coaxial Progressive Deformation	139
6.3 Strain Fringes	141
6.3.1 Introduction	141
6.3.2 Fringes on Spherical Core Objects	141
6.3.3 Fringes on Angular Core Objects	143
6.4 Fibres and the Deformation Path	145
6.5 Non-Fibrous Strain Shadows and Strain Caps	148
6.6 Microboudinage	149
7 Porphyroblasts and Reaction Rims	153
7.1 Introduction	153
7.2 Porphyroblast Nucleation and Growth	154
7.3 Inclusions	154
7.4 Classification of Porphyroblast-Matrix Relations	157
7.4.1 Introduction	157
7.4.2 Pre-tectonic Porphyroblast Growth	159
7.4.3 Intertectonic Porphyroblast Growth	161
7.4.4 Syntectonic Porphyroblast Growth	162
7.4.5 Post-Tectonic Porphyroblast Growth	163

7.4.6	Complex Porphyroblast Growth	163
7.5	Millipede and Deflection-Fold Microstructures	169
7.6	Problematic Porphyroblast Microstructures	170
7.6.1	Inclusion-Free Porphyroblasts	170
7.6.2	Shape and Size of Inclusion and Matrix Grains	170
7.6.3	False Inclusion Patterns	172
7.6.4	Mimetic Growth	172
7.6.5	Deformed Porphyroblasts	173
7.6.6	Uncertain Age Relation of Host and Inclusions	173
7.6.7	Discontinuous S_i and S_e	176
7.6.8	Rotation of Porphyroblasts	176
7.7	Crystallographically Determined Inclusion Patterns	182
7.8	Reaction Rims	185
7.8.1	Introduction	185
7.8.2	Coronas and Moats	187
7.8.3	Symplectites	190
7.8.4	Establishing the Nature of Reactions	192
7.8.5	Pseudomorphs	194
7.8.6	Relation with Deformation	194
7.9	Reconstruction of Tectono-Metamorphic Evolution	194
8	Natural Microgauges	197
8.1	Introduction	197
8.2	Strain Gauges	197
8.3	Vorticity Gauges	199
8.3.1	Introduction	199
8.3.2	Deformed Sets of Veins	199
8.3.3	Lattice-Preferred Orientation	199
8.3.4	Mantled Porphyroclasts, Fibrous Veins and Fringes	200
8.3.5	Porphyroblasts	200
8.3.6	Tension Gashes and Foliations in Shear Zones	200
8.3.7	Oblique Foliations	200
8.3.8	Al-Cr Zoning in Spinell	200
8.3.9	W_k History	200
8.4	The Concept of Palaeostress Gauges	201
8.5	Gauges for the Orientation of Palaeostress Principal Axes	201
8.5.1	Calcite Twins	201
8.5.2	Deformation Lamellae	201
8.6	Differential Stress Gauges (Palaeopiezometers)	202
8.6.1	Dynamically Recrystallised Grain Size	202
8.6.2	Twins in Calcite and Dolomite	203
8.6.3	Microboudins	203
8.6.4	Deformation Lamellae	203
8.7	Pressure Gauges	203
8.8	Strain Rate Gauges	204
8.9	Temperature Gauges	204
8.10	Rheology Gauges	206
8.10.1	Introduction	206
8.10.2	Folding and Boudinage	207
8.10.3	Mantled Objects	207
9	Special Techniques	209
9.1	Introduction	209
9.2	Cathodoluminescence	209

9.3 Fluid Inclusion Studies	210
9.4 Electron Microscopy	211
9.5 Scanning Electron Microscope (SEM)	211
9.5.1 Introduction	211
9.5.2 Secondary and Backscatter Electrons	212
9.5.3 Problems with Orientation	213
9.5.4 Sample Preparation	213
9.6 Transmission Electron Microscope (TEM)	216
9.6.1 Introduction	216
9.6.2 Sample Preparation	217
9.7 Image Analysis	217
9.7.1 Introduction	217
9.7.2 Heilbronner Method	218
9.8 Lattice-Preferred Orientation	218
9.8.1 Introduction	218
9.8.2 U-Stage Measurements	218
9.8.3 Sample Selection and Preparation for Measurement	219
9.8.4 Optical Bulk Analysis – Price Method	219
9.8.5 CIP Method	219
9.8.6 Texture Goniometers	220
9.8.7 Channelling	220
9.9 Analogue Modelling	220
9.9.1 Introduction	220
9.9.2 Linear Rig	220
9.9.3 Torsion Rig	223
9.9.4 Triaxial Rig	223
9.9.5 Marker Particles	223
9.9.6 Analogue Experiments	224
9.10 Use of the U-Stage	225
9.10.1 Introduction	225
9.10.2 Preparation of the Stage for Measurement	225
9.10.3 Measurement of c-Axes of Quartz	228
9.10.4 Notation of Measurements	230
10 From Sample to Section	231
10.1 Introduction	231
10.2 Sampling	231
10.3 Orientation of Hand Specimens	231
10.4 Where to Sample in Outcrop	231
10.5 Cutting Samples	233
10.6 Types of Thin Sections	233
10.7 Geometries in Thin Section – a Problem of Dimensions	234
10.8 Choosing the Orientation of Thin Sections	236
11 Exercises	239
11.1 Introduction	239
11.2 Problem Section	239
11.3 Interpretations	250
Glossary	255
References	267
Index	283
