Multivariate Geostatistics

Introduction with **Applications**

Third Edition

Hans Wackernagel

Multivariate Geostatistics

An Introduction with Applications

Third, completely revised edition

with 117 Figures and 7 Tables

Contents

1	Introduction of the contract o	1
A	From Statistics to Geostatistics	7
2	Mean, Variance, Covariance The mean: center of mass	9 11 12 13 14
3	Linear Regression and Simple Kriging Experimental covariance Linear regression Variance-covariance matrix Multiple linear regression Simple kriging	15 16 20 21 24
4	Kriging the Mean Arithmetic mean and its estimation variance Estimating the mean with spatial correlation No systematic bias Variance of the estimation error Minimal estimation variance Kriging equations Case of no correlation	27 28 29 30 30 31 32
В	Geostatistics	35
5	Regionalized Variable and Random Function Multivariate time/space data Regionalized variable Random variable and regionalized value	39 39 40 41

	Random function	41 42 43 44
	Stationarity of first two moments	IIII-
6	Variogram Cloud	45
	Dissimilarity versus separation	45
	Experimental variogram	48
	Replacing the experimental by a theoretical variogram	40
	V. t	50
7	Variogram and Covariance Function Regional variogram	50
	Theoretical variogram	50
	Covariance function	52
	Positive definite function	53
	Conditionally negative definite function	53
	Fitting the variogram with a covariance function	55
8	Examples of Covariance Functions	57
	Nugget-effect model	01
	Exponential covariance function	57
	Spherical model	58
	Derivation of the spherical covariance	58
		62
9	Anisotropy	62
	Geometric Anisotropy	62
	Rotating and dilating an ellipsoid	64
	Exploring 3D space for anisotropy	
	Zonal anisotropy	
	Nonlinear deformations of space	
1	10 Extension and Dispersion Variance	66
	Support	66
	Extension variance	67
	Dispersion variance	. 68
	Krige's relation	. 69
	Change of support effect	. 70
	Change of support: affine model	. 71
	Application: acoustic data	. 73
	Comparison of sampling designs	. 76
	11 Ordinary Kriging	79
	Ordinary kriging problem	. 19
	Simple kriging of increments	. 81
	Block kriging	. 82

	Simple kriging with an estimated mean	84
	Kriging the residual	
	Cross validation	
	Kriging with known measurement error variance	88
12	Kriging Weights	89
100	Geometry	89
	Geometric anisotropy	91
	Relative position of samples	91
	Screen effect	92
	Factorizable covariance functions	93
	Negative kriging weights	94
13	Mapping with Kriging	96
	Kriging for spatial interpolation	96
	Neighborhood	97
14	Linear Model of Regionalization	101
17	Zinear Maddel of Actionalization	101
		102
		102
	Second-order stationary regionalization	
	Intrinsic regionalization	
		105
	Locally stationary regionalization	
	Counting direction and data as a complex variable xirthing neutring construction	
15		107
	Kriging of the intrinsic component	
	Kriging of a second-order stationary component	
	Filtering	110
	Application: kriging spatial components of arsenic data	111
16	The Smoothness of Kriging	113
10	Kriging with irregularly spaced data	113
	Sensitivity to choice of variogram model	115
	Application: kriging topographic data	
	replication. Right topographic data	11/
C	Multivariate Analysis	21
17	Principal Component Analysis	122
17		123
	liege of PCA	
		123
	Transformation into factors	123
	Transformation into factors	123 125
	Transformation into factors	123 125 126

18 Canonical Analysis and the same beautiful and the same alone 137	25 Isotopic Cokriging
Factors in two groups of variables	Cokriging with isotopic data
Intermezzo: singular value decomposition	Autokrigeability
Maximization of the correlation	Bivariate ordinary cokriging
19 Correspondence Analysis 140	26 Multivariate Nested Variogram
Disjunctive table	Linear model of coregionalization
Contingency table	Bivariate fit of the experimental va
Canonical analysis of disjunctive tables	Multivariate fit
Canonical analysis of disjunctive tables	The need for an analysis of the cor
Coding of a quantitative variable	The field for all allarysis of the cor
Contingencies between two quantitative variables	27 Case Study: Ebro Estuary
Continuous correspondence analysis	Kriging conductivity
	Cokriging of chlorophyll
D. Multivariate Constatistics 143	Conditional simulation of chloroph
D Multivariate Geostatistics 143	Conditional simulation of emotopi
20 Direct and Cross Covariances 145	28 Coregionalization Analysis
Cross covariance function	Regionalized principal component
Delay effect	Generalizing the analysis
Cross variogram	Regionalized canonical and redund
Pseudo cross variogram	Cokriging regionalized factors
Difficult characterization of the cross covariance function	Regionalized multivariate analysis
21 Covariance Function Matrices 151	29 Kriging a Complex Variable
Covariance function matrix	Coding directional data as a compl
Cramer's theorem	Complex covariance function
Cramer's theorem	Complex kriging
Spectral densities	Cokriging of the real and imaginar
Phase shift	Complex kriging and cokriging ver
22 Intrinsic Multivariate Correlation 154	Complex covariance function mode
Intrinsic Correlation model	Complex covariance function mode
Intrinsic correlation model	30 Bilinear Coregionalization Mod
Linear model	Complex linear model of coregional
Codispersion coefficients	Bilinear model of coregionalization
22 W Assistant Coloring	Billical filodel of coregionalization
23 Heterotopic Cokriging	
Isotopy and heterotopy	E Selective Geostatistics
Ordinary cokriging	B Scientific Geostatistics
Simple cokriging	31 Thresholds and Selectivity Curv
24 Collocated Cokriging 165	Threshold and proportion
	Tonnage, recovered quantity, invest
Cokriging neighborhood	
Collocated simple cokriging	Selectivity
Collocated ordinary cokriging	Recovered quantity as a function of
Simplification with a particular covariance model	Time series in environmental moni

25	Isotopic Cokriging	170
	Cokriging with isotopic data	170
	Autokrigeability	
	Bivariate ordinary cokriging	173
26	Multivariata Nested Variannam	
26	Withtivariate Nested variogram	1/5
	Linear model of coregionalization	
	Bivariate fit of the experimental variograms	177
	Multivariate fit	178
	The need for an analysis of the coregionalization	181
27	Case Study: Ebro Estuary	183
	Kriging conductivity	
	Cokriging of chlorophyll	185
	Conditional simulation of chlorophyll	187
612		
28	COLCEIONAILEALION AMAIYSIS	94
	Regionalized principal component analysis	194
	Generalizing the analysis	
	Regionalized canonical and redundancy analysis	
	Cokriging regionalized factors	
	Regionalized multivariate analysis	197
29	Kriging a Complex Variable	200
000	Coding directional data as a complex variable	
	Complex covariance function	200
	Complex kriging	201
	Cokriging of the real and imaginary parts	202
	Complex kriging and cokriging versus a separate kriging	203
	Complex covariance function modeling	205
100	normediate types between diffusion and mosaic models	
30	Bilinear Coregionalization Model	207
	Complex linear model of coregionalization	
	Bilinear model of coregionalization	208
E	Selective Geostatistics	211
	eneral structure of isofactorial charge of support	
31	Thresholds and Selectivity Curves	213
	Threshold and proportion	213
	Ionnage, recovered quantity, investment and profit	213
	Selectivity	
	Recovered quantity as a function of tonnage	217
	Time series in environmental monitoring	219

	Logiot mai Estimation	221
	Information effect and quality of estimators	221
	Logarithmic Gaussian model	223
	Moments of the lognormal variable	224
	Lognormal simple kriging	226
	Proportional effect	228
	Permanence of lognormality	228
	Stable variogram model	233
	Lognormal point and block ordinary kriging	233
33	Gaussian Anamorphosis with Hermite Polynomials	238
18	Gaussian anamorphosis	238
	Hermite polynomials	239
	Expanding a function into Hermite polynomials	240
	Probabilistic interpretation	240
	Moments of a function of a Gaussian variable	241
	Conditional expectation of a function of a Gaussian variable	
	Empirical Gaussian anamorphosis	244
	Smoothing the empirical anamorphosis	245
	Bijectivity of Gaussian anamorphosis	
34	Isofactorial Models	250
34	Isofactorial bivariate distribution	250
34	Isofactorial Models Isofactorial bivariate distribution	250 251
34	Isofactorial Models Isofactorial bivariate distribution	250251252
34	Isofactorial Models Isofactorial bivariate distribution	250 251 252 253
34	Isofactorial Models Isofactorial bivariate distribution	250 251 252 253 254
34	Isofactorial Models Isofactorial bivariate distribution	250 251 252 253 254 258
00 00 00 00 00 00 00 00 00 00 00 00 00	Isofactorial Models Isofactorial bivariate distribution Isofactorial decomposition Isofactorial models Choice of marginal and of isofactorial bivariate distribution Hermitian and Laguerre isofactorial distributions Intermediate types between diffusion and mosaic models	250 251 252 253 254 258
34	Isofactorial Models Isofactorial bivariate distribution Isofactorial decomposition Isofactorial models Choice of marginal and of isofactorial bivariate distribution Hermitian and Laguerre isofactorial distributions Intermediate types between diffusion and mosaic models Isofactorial Change of Support	250 251 252 253 254 258 262
00 00 00 00 00 00 00 00 00 00 00 00 00	Isofactorial Models Isofactorial bivariate distribution Isofactorial decomposition Isofactorial models Choice of marginal and of isofactorial bivariate distribution Hermitian and Laguerre isofactorial distributions Intermediate types between diffusion and mosaic models Isofactorial Change of Support The point-block-panel problem	250 251 252 253 254 258 262 262
00 00 00 00 00 00 00 00 00 00 00 00 00	Isofactorial Models Isofactorial bivariate distribution Isofactorial decomposition Isofactorial models Choice of marginal and of isofactorial bivariate distribution Hermitian and Laguerre isofactorial distributions Intermediate types between diffusion and mosaic models Isofactorial Change of Support The point-block-panel problem Cartier's relation and point-block correlation	250 251 252 253 254 258 262 262 262
00 00 00 00 00 00 00 00 00 00 00 00 00	Isofactorial Models Isofactorial bivariate distribution Isofactorial decomposition Isofactorial models Choice of marginal and of isofactorial bivariate distribution Hermitian and Laguerre isofactorial distributions Intermediate types between diffusion and mosaic models Isofactorial Change of Support The point-block-panel problem Cartier's relation and point-block correlation Discrete Gaussian point-block model	250 251 252 253 254 258 262 262 262 266
00 00 00 00 00 00 00 00 00 00 00 00 00	Isofactorial Models Isofactorial bivariate distribution Isofactorial decomposition Isofactorial models Choice of marginal and of isofactorial bivariate distribution Hermitian and Laguerre isofactorial distributions Intermediate types between diffusion and mosaic models Isofactorial Change of Support The point-block-panel problem Cartier's relation and point-block correlation Discrete Gaussian point-block model General structure of isofactorial change-of-support	250 251 252 253 254 258 262 262 262
00 00 00 00 00 00 00 00 00 00 00 00 00	Isofactorial Models Isofactorial bivariate distribution Isofactorial decomposition Isofactorial models Choice of marginal and of isofactorial bivariate distribution Hermitian and Laguerre isofactorial distributions Intermediate types between diffusion and mosaic models Isofactorial Change of Support The point-block-panel problem Cartier's relation and point-block correlation Discrete Gaussian point-block model General structure of isofactorial change-of-support Kriging with Discrete Point-Bloc Models	250 251 252 253 254 258 262 262 262 266 267 273
35	Isofactorial bivariate distribution Isofactorial decomposition Isofactorial models Choice of marginal and of isofactorial bivariate distribution Hermitian and Laguerre isofactorial distributions Intermediate types between diffusion and mosaic models Isofactorial Change of Support The point-block-panel problem Cartier's relation and point-block correlation Discrete Gaussian point-block model General structure of isofactorial change-of-support Kriging with Discrete Point-Bloc Models Non-linear function of a block variable	250 251 252 253 254 258 262 262 266 267 273 273
35	Isofactorial Models Isofactorial bivariate distribution Isofactorial decomposition Isofactorial models Choice of marginal and of isofactorial bivariate distribution Hermitian and Laguerre isofactorial distributions Intermediate types between diffusion and mosaic models Isofactorial Change of Support The point-block-panel problem Cartier's relation and point-block correlation Discrete Gaussian point-block model General structure of isofactorial change-of-support Kriging with Discrete Point-Bloc Models Non-linear function of a block variable Conditional expectation and disjunctive kriging of a bloc	250 251 252 253 254 258 262 262 266 267 273 273 274
35	Isofactorial bivariate distribution Isofactorial decomposition Isofactorial models Choice of marginal and of isofactorial bivariate distribution Hermitian and Laguerre isofactorial distributions Intermediate types between diffusion and mosaic models Isofactorial Change of Support The point-block-panel problem Cartier's relation and point-block correlation Discrete Gaussian point-block model General structure of isofactorial change-of-support Kriging with Discrete Point-Bloc Models Non-linear function of a block variable	250 251 252 253 254 258 262 262 262 266 267 273 273 274 275
