# Contents

<b>1</b>	<b>— Origin of Sedimentary Components . . . . .</b>	<b>1</b>
1.1	— Terrigenous Clastic Particles . . . . .	1
1.1.1	Introduction . . . . .	1
1.1.2	Physical Weathering . . . . .	1
1.1.3	Chemical Weathering . . . . .	2
1.1.4	General Distribution of Mineral Associations Resulting from Weathering . . . . .	5
1.1.5	Paleogeographic Application . . . . .	9
1.2	— Formation of Sedimentary Carbonates . . . . .	12
1.2.1	Introduction . . . . .	12
1.2.2	Main Minerals and Conditions of Formation . . . . .	14
1.2.3	Primary Chemical Precipitation of Carbonate . . . . .	15
1.2.4	Organic Contribution to Carbonate Sedimentation . . . . .	16
1.2.5	Other Factors Contributing to Carbonate Sedimentation . . . . .	19
1.2.6	General Appearance of Marine Carbonate Sediments . . . . .	23
1.3	— Origin of Other Main Sedimentary Components . . . . .	30
1.3.1	Silica . . . . .	30
1.3.2	Phosphates . . . . .	35
1.3.3	Organic Matter . . . . .	38
1.3.4	Evaporites . . . . .	41
<b>2</b>	<b>— Properties of Sedimentary Particles . . . . .</b>	<b>47</b>
2.1	— Grain Size . . . . .	47
2.1.1	Scales . . . . .	47
2.1.2	Graphic Presentation of Grain Size Data . . . . .	49
2.1.3	Characterization of Sedimentary Environments . . . . .	51
2.1.4	Influence of Transport Processes . . . . .	53

2.2	Shape, Surface, and Orientation of Grains . . . . .	53
2.2.1	Shape . . . . .	53
2.2.2	Surface Morphology . . . . .	54
2.2.3	Spatial Arrangements . . . . .	55
2.3	Classification of Sediments . . . . .	57
<b>3</b>	<b>Deposition of Sediments . . . . .</b>	<b>61</b>
3.1	Principal Transport Mechanisms . . . . .	61
3.1.1	Sedimentary Particles . . . . .	61
3.1.2	Flows of Sedimentary Particles . . . . .	64
3.2	Formation of Basic Sedimentary Structures . . . . .	66
3.2.1	Introduction . . . . .	66
3.2.2	Formation of Ripples, Current Structures . . . . .	66
3.3	Formation of Post-Depositional Sedimentary Structures . . . . .	76
3.3.1	Erosion Structures . . . . .	76
3.3.2	Surface Structures or Imprints . . . . .	78
3.3.3	Synsedimentary Deformation . . . . .	82
3.4	General Mechanisms of Sedimentation and Resulting Deposits . . . . .	86
3.4.1	Settling . . . . .	86
3.4.2	Gravitational Sliding . . . . .	88
3.4.3	Deposition by Density or Gravity Currents . . . . .	90
3.4.4	Deposition by Bottom Currents . . . . .	93
3.4.5	Deposition by Violent or Exceptional Currents . . . . .	96
3.5	Identification of Depositional Environments of Ancient Sediments: Potential and Limitations . . . . .	99
3.5.1	Introduction . . . . .	99
3.5.2	Distance from Coastline . . . . .	100
3.5.3	Depth of Deposition . . . . .	101
3.5.4	Paleocurrents . . . . .	102
3.5.5	Polarity of Beds . . . . .	103
<b>4</b>	<b>From Sediment to Sedimentary Rock . . . . .</b>	<b>105</b>
4.1	Introduction . . . . .	105

4.2	Formation of Sandstones . . . . .	107
4.2.1	Main Stages and Classification . . . . .	107
4.2.2	Surface Phenomena . . . . .	108
4.2.3	Phenomena of Deeper Levels . . . . .	109
4.3	Evolution of Clays . . . . .	111
4.3.1	Early Diagenesis . . . . .	111
4.3.2	Late Diagenesis . . . . .	113
4.4	Carbonate Diagenesis . . . . .	116
4.4.1	Introduction . . . . .	116
4.4.2	Calcitic Cement . . . . .	117
4.4.3	Conditions for Dolomitization . . . . .	121
4.5	Evolution of Siliceous Deposits . . . . .	122
4.6	Formation of Fossil Fuels . . . . .	124
4.6.1	Coal . . . . .	124
4.6.2	Hydrocarbons . . . . .	127
<b>5</b>	<b>Continental Sedimentation . . . . .</b>	<b>131</b>
5.1	Glacial Environments . . . . .	131
5.1.1	Introduction . . . . .	131
5.1.2	Main Types of Glacial Deposits . . . . .	132
5.1.3	Glacial Sequences and Environments of the Past . . . . .	137
5.2	Deserts . . . . .	139
5.2.1	Introduction . . . . .	139
5.2.2	Recent Desert Sediments . . . . .	140
5.2.3	Ancient Desert Sediments . . . . .	144
5.3	Lakes . . . . .	144
5.3.1	Introduction . . . . .	144
5.3.2	Recent Lacustrine Deposits . . . . .	147
5.3.3	Ancient Lacustrine Deposits . . . . .	150
5.4	Alluvial Fans . . . . .	153
5.4.1	Introduction . . . . .	153
5.4.2	Alluvial Fans in Humid Regions . . . . .	154
5.4.3	Alluvial Fans in Arid Regions . . . . .	156
5.5	Rivers and Streams . . . . .	157
5.5.1	Introduction . . . . .	157
5.5.2	Sedimentary Sequences in Recent Fluvial Deposits . . . . .	159
5.5.3	Ancient Fluvial Environments . . . . .	162

<b>6</b>	<b>Marine Coastal Environments . . . . .</b>	<b>167</b>
6.1	Deltas and Estuaries . . . . .	167
6.1.1	Hydrodynamic and Sedimentational Mechanisms . . . . .	167
6.1.2	Formation of Delta Complexes . . . . .	176
6.1.3	Fossil Estuaries and Deltas . . . . .	182
6.2	Littoral Environments . . . . .	184
6.2.1	Hydrosedimentary Mechanisms . . . . .	184
6.2.2	Detrital Environments . . . . .	189
6.2.3	Carbonate and Evaporite Environments . . . . .	197
6.3	Shelf Environments . . . . .	204
6.3.1	General Hydrosedimentary Mechanisms . . . . .	204
6.3.2	Detrital Environments . . . . .	209
6.3.3	Carbonate Environments . . . . .	215
<b>7</b>	<b>Open-Marine Environments . . . . .</b>	<b>227</b>
7.1	Submarine Relief and Sedimentation . . . . .	227
7.1.1	Introduction . . . . .	227
7.1.2	The Continental Margins . . . . .	227
7.1.3	Abyssal Plains . . . . .	229
7.2	Dynamics of Deep-Water Sedimentation . . . . .	231
7.2.1	Continental Margins . . . . .	231
7.2.2	Open-Marine Basins . . . . .	240
7.3	Main Deep-Sea Sediments . . . . .	244
7.3.1	Carbonate Oozes . . . . .	244
7.3.2	Siliceous Oozes . . . . .	247
7.3.3	Clays and Argillaceous Oozes . . . . .	249
7.3.4	Polymetallic or Manganese Nodules . . . . .	253
7.3.5	Metalliferous and Hydrothermal Sediments . . . . .	256
7.3.6	Other Sediments . . . . .	259
7.3.7	Global Tectonics vs Deep-Sea Sedimentation . . . . .	263
