1.1 Shallow Foundations: General	Chapter 1	Intro	duction
1.2 Types of Failure in Soil at Ultimate Load 1 1.3 Settlement at Ultimate Load 6 1.4 Ultimate and Allowable Bearing Capacities 10 References 12 Chapter 2 Ultimate Bearing Capacity Theories: Centric Vertical Loading 13 2.1 Introduction 13 2.2 Terzaghi's Bearing Capacity Theory 13		1.1	Shallow Foundations: General
1.3 Settlement at Ultimate Load		1.2	Types of Failure in Soil at Ultimate Load
1.4 Ultimate and Allowable Bearing Capacities 10 References 12 Chapter 2 Ultimate Bearing Capacity Theories: Centric Vertical Loading 13 2.1 Introduction 13 2.2 Terzaghi's Bearing Capacity Theory 13		1.3	Settlement at Ultimate Load
References 12 Chapter 2 Ultimate Bearing Capacity Theories: Centric Vertical Loading 2.1 Introduction 2.2 Terzaghi's Bearing Capacity Theory		1.4	Ultimate and Allowable Bearing Capacities
Chapter 2 Ultimate Bearing Capacity Theories: Centric Vertical Loading		Refei	rences
2.1 Introduction 13 2.2 Terzaghi's Bearing Capacity Theory 13	Chanter 2	Ultin	nate Bearing Canacity Theories: Centric Vertical Loading 13
2.1 Introduction		C IIII	model to visit and a stand stand of the
2.2 Terzaghi's Bearing Capacity Theory		2.1	Introduction
		2.2	Terzaghi's Bearing Capacity Theory
2.2.1 Relationship for P_{pq} ($\phi \neq 0, \gamma = 0, q \neq 0, c = 0$)			2.2.1 Relationship for P_{pq} ($\phi \neq 0, \gamma = 0, q \neq 0, c = 0$)
2.2.2 Relationship for P_{pc} ($\phi \neq 0, \gamma = 0, q = 0, c \neq 0$)			2.2.2 Relationship for P_{pc} ($\phi \neq 0, \gamma = 0, q = 0, c \neq 0$)
2.2.3 Relationship for $P_{p\gamma}$ ($\phi \neq 0, \gamma \neq 0, q = 0, c = 0$)			2.2.3 Relationship for $P_{p\gamma}$ ($\phi \neq 0, \gamma \neq 0, q = 0, c = 0$)
2.2.4 Ultimate Bearing Capacity			2.2.4 Ultimate Bearing Capacity
2.3 Terzaghi's Bearing Capacity Theory for Local		2.3	Terzaghi's Bearing Capacity Theory for Local
Shear Failure			Shear Failure
2.4 Meyerhof's Bearing Capacity Theory		2.4	Meyerhof's Bearing Capacity Theory
2.4.1 Derivation of N_c and N_q ($\phi \neq 0, \gamma = 0, p_o \neq 0, c \neq 0$)28			2.4.1 Derivation of N_c and N_q ($\phi \neq 0, \gamma = 0, p_o \neq 0, c \neq 0$)28
2.4.2 Derivation of N_{γ} ($\phi \neq 0, \gamma \neq 0, p_o = 0, c = 0$)			2.4.2 Derivation of $N_{\gamma} (\phi \neq 0, \gamma \neq 0, p_o = 0, c = 0)$
2.5 General Discussion on the Relationships of Bearing		2.5	General Discussion on the Relationships of Bearing
Capacity Factors			Capacity Factors
2.6 Other Bearing Capacity Theories		2.6	Other Bearing Capacity Theories45
2.7 Scale Effects on Ultimate Bearing Capacity		2.7	Scale Effects on Ultimate Bearing Capacity47
2.8 Effect of Water Table		2.8	Effect of Water Table
2.9 General Bearing Capacity Equation		2.9	General Bearing Capacity Equation
2.10 Effect of Soil Compressibility		2.10	Effect of Soil Compressibility
2.11 Bearing Capacity of Foundations on Anisotropic Soils		2.11	Bearing Capacity of Foundations on Anisotropic Soils
2.11.1 Foundation on Sand $(c = 0)$			2.11.1 Foundation on Sand $(c = 0)$
2.11.2 Foundations on Saturated Clay ($\phi = 0$ Concept)65			2.11.2 Foundations on Saturated Clay ($\phi = 0$ Concept)65
2.11.3 Foundations on $c-\phi$ Soil			2.11.3 Foundations on $c-\phi$ Soil
2.12 Allowable Bearing Capacity with Respect to Failure		2.12	Allowable Bearing Capacity with Respect to Failure
2.12.1 Gross Allowable Bearing Capacity			2.12.1 Gross Allowable Bearing Capacity
2.12.2 Net Allowable Bearing Capacity74			2.12.2 Net Allowable Bearing Capacity
2.12.3 Allowable Bearing Capacity with Respect to			2.12.3 Allowable Bearing Capacity with Respect to
Shear Failure [qall(shear)]			Shear Failure [q _{all(shear}]
2.13 Interference of Continuous Foundations in Granular Soil 78		2.13	Interference of Continuous Foundations in Granular Soil 78
